M^r Walleys Receipt for Brewing ale

Ale to Brew?

Hops. —

Tuning —

When y^e Water begins to Boyl lade it into y^e Mash fat & after put in y^e Malt & stir it well wth y^e Mash Rule leaving it a thick Mash, covered close wth dry Malt. Let it stand 3 or 4 hours before y^e let it run off. then let it pass gently if you'll have it Strong. When tis off leech on more Boiling water as much as will keep y^e fat Running till y^e Quantity be gathered. Which if y^e Malt be good, may be 25 Gallons from 4 Strike of Malt. Broyle y^e Hops in the Wort about an hour on a Gentle fire. I use half a pe to a Barrell of ale more or less as y^e hops are good or bad. Do not stir y^e mash till y^e ale is Run off then leech on the Rest of y^e hot water. & then cold for Small Beer. Take a burl 2 quarts of y^e liquor before it is Broild & set it to cool, In y^e put y^e yeast to rise in a Wooden vessel. When you have strain'd it of from y^e Copper set y^e liquor a broad thin to cool, When tis cold put y^e liquor wth yeast in by small quantities at a time, for if much it will kill y^e Head, Don't work it hot. After 2 days working in y^e fat it will take long Rises betwixt time of beating in. Turn it while only firmment & begins to settle all sweetness work'd off & has a flavor. If it falls in y^e fat it will never Surge. When it will be flat till y^e bottle quicken it. If you hit it Right Bottle ale will be laid aside. And you'll Brew for y^e own Drinking once in 3 Weeks

Remember to keep it warm in Winter & cool in Summer
In the Fat

To Cure Ale or Beer grown Sower.

First draw off 2 Gallons, or more of y^e Sower Ale or Bear, Then boile a handful of Hops or more (ac- cording to y^e quantity of liquor) in y^e fat. The same quantity of New wort would be better if you can get it. After you have boild it till the virtue of the Hops be got out, put all together in to y^e Vessel of Sower Drink, let it stand open a Day, or 2, for least it work again; Sometimes it will sometimes not. Then let it stand a week or a fortnight, as you see good before you draw it.

(NLM)

10
The first of the year 1791

On the 1st of January 1791 I was informed that the
British Government had declared war against France
and that the French Republic had been proclaimed.

The French Republic was proclaimed on the 21st of
September 1792 and the French people were
called upon to defend their liberties.

The French people were called upon to defend their
liberties and to resist the tyranny of the British
Government.

The French people were called upon to defend their
liberties and to resist the tyranny of the British
Government.

Stirring

Handwritten text in a cursive script, likely a historical document or manuscript. The text is written in dark ink on aged, yellowed paper. The script is dense and fills most of the page, with some lines appearing to be headings or section markers. The handwriting is somewhat faded and difficult to decipher in many places due to the age and fading of the ink. There are several lines of text that appear to be repeated or written in a similar pattern, possibly indicating a list or a series of entries. The overall appearance is that of a well-used, old book or notebook.

Stirring itt till itt be quite dissolued, then Lett it boyle halfe an hower, and Lett itt to coole, and when itt is cold putt a spoonfull of Ale barme, and Lett itt worke 24 howres, then putt it into y^e caske, and Lett itt stand a fortnight, or three weekes, then bottle itt, throwing awaye the hearbes, putting the bagg of Spice in the caske, ~ ~ ~ ~ ~

White mead ~ ~ ~ ~ ~

Gellys.

A Gelly.

35

Boyle a knuckle of Veale, and two calves feet, first cleane from fitt, and steeped 12 howres, in faire water, in white wine and Spring water, of each two quartes till itt gelly Straine itt into a bason, putt itt in a Skillett cleane from dross with three quarters of a pound of fine Sugar, beaten, a Stick of cynamon broken a nutt megg, and a halfe in peeces, a race of ginger, pared, and beaten flatt, when itt is melted. putt three whites of eggs, Shells and all, boyle till cleane and hard run itt through a Gelly bagg, 2 or 3 times with a branch of rosmary or two in the bottom,

Gelly.

Boyle a Shoulder of Veale, 4 Calves feet, the fitt pickt cleane off, and soaked 24 howres in faire water, or more, in Ten gallons of water, to halfe a gallon, Strained, when cold take of the fitt cleane, to a quart of this add two pound of Sugar, Som nutt megg, ginger an ounce, and of cynamon, a Spoonfull of corriander Seed, halfe a pint of whit wine, as much of rose water, boyle all halfe an hower, Skimming cleane, add the whites of 10 eggs beaten, boyle a quarter of an hower more, run itt through a Gelly bagg, by the fitt

A good Gelly.

Take a knuckle of Veale, and a payre of calves feet, Laye them in water all night to Soake out the blood, then wash itt cleane, and seath itt on the fitt, in a greete pipkin of water, that will hold 4 quartes, when itt is halfe boyled, putt in a pint of whit wine, Lett itt boyle while itt is hard gelly then putt itt through a Strainer, and Lett a cooling, when cold take of all the fitt, and putt the rest in a skillett, all butt the druggs, then Lett itt over the fitt, when itt is all melted take itt off a gaine, then putt in itt a Large Stick of cynamon, two nutt meggs grated, 4 cloues, a Little, Salt, and Sugar, to y^e tast, the Juice of two or three Lemons, then take the whites of Six eggs, putt them in some rose water, beate them Lightly, and there will arise a froath, on the topp of them, and Doe doe till they be all, beaten to froath, Stirr them well in the Skillett, Lett itt boyle Softly till itt will, Gelly.

A Gelly of Harts horne.

Take half a pound of Harts horne, Shaved, and putt in to a gallon of faire water cold, make itt boyle as Soft as maye be for itt will be white and Doe Lett itt boyle, till all most wasted to two pintes, then pover itt into

Into a bason, all the clearest, and Lett itt Settle a quarter of an houre
then cleare itt into another bason, when itt is cold putt in double refined Sugar
and a little Amber greece, and musk in a bagg, when y^e Jelly is Scalding hott
then putt in y^e Juice of Lemon or orringe to y^e taste, either Sweete or Sharpe
as you please, and a little rose water, Soe putt itt in a glass for y^e use - - - -

To make Jelly of Pare plums

Take pare plums, and putt them into a glass, and Sett itt on the fire, in a
posnett of water, with a little haye betwene the glass, and the posnett, to
keepe the glass from breaking, and couer y^e glass with a Loose paper, and
sift upp the paper often, when you perseave water to issue out of
the plums, power itt into a platter, Standing on a chaffing dish of coales, for
itt must not be cold, untill you have made an end, when you have gotten
soe much water, as you will out of them, and boyled itt a quarter of an
houre, putt as much Sugar to itt, made into candy, as will Sweeten itt, be
sure, to have candy enough, for if you Leave any itt will Seare another
time, after you have mingled itt, Sett itt, on the fire, on a chaffing dish of
coales, and keepe stirring halfe an houre, then take itt off and Stir itt a
while, to keepe from creaming, till itt be cold enough to putt into boxes
or glasses, then Sett itt in some warme, cubbard, or place, where itt may candy
all berryes, or plums may be done in this manner - - - -

To make Jelly of orringes - - - -

Take the Juice of the orringes, and putt itt out, through a Streiner, then
putt itt into a posnett, and there to putt halfe a pound of very fine Sugar
and boyle the Same on a very soft fire, Scum itt cleane, and Lett itt Seeth
till such time as you see itt growe to Jelly, then take itt from the fire
and putt itt into glasses, butt couer them not, till itt is cold - - - -

To make Jelly of Quinces - - - -

Take y^e Quinces, pare them, core them, and quarter them, then putt
them into an earthen pott well gleared, putt to them, a handfull of the
coares, and Stopp them upp close with past, then bake them in a oven
when they be baked Straine them through a Strainer, crushing them
betweene two trenchers, as long as itt runs cleare, putt to every pinte
of Liquor, a pound or 3 quarters, of a pound of Sugar, beate y^e Sugar, very
fine, and Lett itt dissolve, in the Liquor, then Sett itt on the embers, till the
Scum arise, when the Scum is risen, boyle itt a little, continually stirring
till itt begin to Jelly, then putt itt into boxes, or glasses, - - - -

To Preserve Peaches. Lady Aston

Take Newington Peaches Pare them as thin as possible, strew sugar on them to keep colour, give them a slit in the seam to the stone. then take half the weight in Double refined Sugar. To every pound of Sugar, a quarter of a Pint of water, boil it, & skim it, & put in the Peaches. Let them boil half a dozen Walms, & set them by till next day, Laying a sheet of white paper close to them. The next day boil 'em so again, strewing on 'em the other half of y^e Sugar, which will make y^e full weight. The 3^d Day take them out of y^e Syrup, & wth a Penknife take out the Stones & lay them flat & smooth, & boil them a walm or 2. Then have ready drawn in a Pot y^e Juice of some white Pear-plums, of those which are greenest to every half pint of Juice half a pound of fine Sugar beaten fine, put this to the Peaches The Syrup being with them also, Let them boil till it jellys, So put them up y^e Next day cover them wth more Jelly, Keep them in Deep pots or Glasses.

Preseruing, and Candring - - - - -

37

To preserue cherries. in Jelly - - - - -

Take the weight of the cherries of double refined Sugar, being finely beaten, strowe a handfull of the Sugar in the bottom of the posnett, then as you strowe the cherries, putt them in the posnett, when you haue couered the Sugar, then putt more, soe couer them with Sugar, as you strowe them, then take a little Sugar from the weight, as much as you thinke the weight of the stalkes, and the stones contaynes, then sett them on a mighty gentle fire that the Sugar maye dissolue, then boyle them, and scum them, and when you thinke they are almost thoroughly, preserued, haue ready some Juice of redde corraunts, take the corraunts picked cleane, in a silver dish or coupp and with the back of a spoone, bruisse them, and soe straine itt, and putt some Sugar to itt, soe boyle itt and scum itt, and putt it to the cherries, and giue itt one boyle after, and scum itt, and when itt is almost cold, dish itt upp, you must haue to 3 pound of Sugar, aboue halfe a pinte, of Juice of corraunts. . .

You thinke the Strength of the berries is boyled out, power out the cleare, with out pressing the goosberries, and two a pound of Dutch Liquor putt a pound of refined Sugar, being beaten, and boyled upp uery fast, untill itt will gelly, if you have a mind to doe y^e berries whole, Lett them be ready Stoned, When y^e Liquor, is putt to boyling putt in y^e Stoned goosberries with there waight in Sugar, and boyle itt fast untill you See itt will gelly when itt is a Little cold, glass them upp ~ ~ ~ ~ ~

To drye Plum̃s ~ ~ ~ ~ ~

Take plum̃s and Stone them, waigh them, and to a pound of plum̃s, take halfe a pound of Sugar, halfe a pinte of water, boyle upp the Syrrupe, when itt is Limmed, putt in the plum̃s Lett them Simer a Little on the fire, then take them off, and the next daye giue them a walme or two, and the next day after as mutch, then Lett them with the Syrrupe, in the Stoue, three dayes, putting in fire euery foorth, then take them out, and Laye them on glasses, in the Stoue, and Doe Lett them drye, when they be dry wash them a Little, with warme water, and putt them into the Stoue, and the next day wash them with cold water, then dry them upp, when they be dry putt them in glasses, and Doe keep them, ~ ~ ~ ~ ~

To make orringe marmalett ~ ~ ~ ~ ~

Take orringes, and pare them uery well and thin, rubb them well with salt, and wash itt well off, then cutt them through, the midle, take out the Juice, and the meate cleane, then boyle them in a Skillett of fagre water, while they boyle in one water, take another, boyling hott, ready to Shift them in, Doe boyle them in 3. or 4 waters, or according, as you Like them, for bitterness, then drye them well with a cloth, and cutt them in Little square peeces, to euery pound of orringes, putt a pound of Sugar, butt you must only dipp the Lumps of Sugar in water, then take pippins, and slice them coare, and all, you must pare them, then boyle them with a Little water, when the Liquor, is thick Scum itt from the apples, and of that Liquor, putt Som thing, more then a pinte to y^e Sugar, then boyle the orringes, and that together, about a quarter of an hower, then take the meate, and Juice, that comes, from y^e orringes, and cutt the meat uery small, picking out the Seeds, and Strings, then putt into the orringes more then a quarter of a pinte, and Som thing more then halfe a quarter of a pint of the Juice, of Lemonds, before you putt itt in, warme itt a Little, and in a thin peece of Lane boyle itt a Little, muske, and amber

Amber greese, if you Like itt, keepe itt Still boyling till itt will gelly pretty thick, then you may take itt upp, putt in the Juice of orringes, and Lemonds to y^e tast, butt this is the right proportion, ~ ~ ~ ~ ~

To presarue Pippins ~ ~ ~ ~ ~

Boyle pippins cutt in quarters in faire water, till they mash, then run the Liquor from them, and take halfe a pinte of that Liquor, and halfe a pinte of white, or rhenish wine, putt to itt a pound, of dubble, refined Sugar and Lett itt on the fire, when itt is Scumd, and ready to boyle, putt in a pound of the best, and clearest pippins, pared, and cutt coares awaye, in three or foure peeces of a pippin, or as they are in bigness, putt in the pill of a Lemond, which must, be taken out of water, they must boyle fast, and as itt, boyleth, putt in the Juice of 2 Lemonds, or orringes to y^e tast, when all most boyled putt in peeces of orring pill, which must be first boyled, in 3 or 4 waters, Soe make them tender, and take out the exstream bitterness when the pippins Looke cleare, and the Syrryp white, itt is enough ~ ~

To make marmalett of Apricokes ~ ~ ~ ~ ~

Take apricokes, and pare them, and cutt them in quarters, then take a pound of apricokes, to a pound of Sugar, then putt in Some Sugar in the bottom of the possnett, putt in a Spoonfull, or two of faire water then Laye the Apricokes, in quarters, in quarters in the Sugar, putt more Sugar over them, Soe boyle, them on a quick fire, keepe them Stirring, for feare of burning, in the bottom, halfe an ounce ounce of Apricokes more then the Sugar, ~ ~ ~ ~ ~

To Presarue pippins ~ ~ ~ ~ ~

Take y^e pippins, and pare them, and core them, well, then take Sugar and waigh with y^e pippins, then take a pinte of faire water, and halfe a pinte of whit wine, and boyle y^e Sugar, with itt, and Scum itt, then putt in y^e pippins and Lett them boyle, Softly, to culler deepe, ~ ~ ~ ~ ~

To presarue, white currants, in gelly ~ ~ ~ ~ ~

Take of currants when they are ripe to Stone, and to a pound of Stoned currants take a pound of refined Sugar, then take Juice of currants, nott ripe being Strained, and Lett itt Stand all night, the next day power off the clearest, into a glass, take off this Juice Soe much, as you thinke will satisfye, to make y^e currants, into a gelly, adding the waight of the Juice in Sugar, Soe Lett y^e Juice and Sugar boyle upp fast, and strowe in y^e

In y^e corraunts, being newly Stoned, and boyle them exstream
- ly fast, untill you see they will gelly, then glass them upp for
y^e use. ~ ~ ~ ~ ~

To presarue raspberries. ~ ~ ~ ~ ~

Take raspberries nott over ripe, and to them take there waight in
in Sugar, then take greene Apples, and cutt them in two, Spring water be
Stronge, Soe Straine itt, and take of the cleare of itt, into a glass, as
much as you thinke fitt, to make y^e gelly, and the waight of y^e water in
Sugar, then boyle y^e water, and Sugar, and Scum itt, and putt in your
raspberries, boyling itt uery fast till itt will gelly. ~ ~ ~ ~ ~

To make marmalett of Cherries. ~ ~ ~ ~ ~

Take 12 pound of cherries, and Stone them, and keepe the Juice by
in a bason, then take 3: pound of ordinary Loafe Sugar, being beaten
and Sett them ouer, a quick fiar, and boyle them exstreame fast, a good
while, and Skim them, being halfe boyled, putt in the Juice of white
corraunts, a pinte, for want of white take red, when they are boyled
that they will come cleane, from the thing, that they are boyled in
then glass them upp for y^e use. ~ ~ ~ ~ ~

To drye Cherries

Take cherries and Stone them, keeping the Juice, in a dish, that comes
from them, in the Stoning, and to 8 pound of Stoned cherries, take a pound
of ordinary Sugar, putt y^e cherries, and Juice with the Sugar, Soe boyle
on a quick fiar, and boyle them a pace. untill they be boyled, Scum
them uery well, untill they be boyled, then putt them forth into Silver
or earthen uessells, and Lett them Stand in the Syrrupe two dayes, ~
then take them out, and Laye, one by one another, on the bottoms
of cleane Lues, and Sett them in the Sunn, adrying, and turne them; when
drye dipp, a cloth, in warme water, and wipe them ouer, and Sett them
again adrying, and being dryed, box them upp for y^e use. ~ ~ ~ ~ ~

To presarue Quinces White. ~ ~ ~ ~ ~

Take yellow quinces coare them butt nott pare them, then parboyle
them, and when they be cold pare them, then take to euery pound of
quinces, a pound of Sugar, and claryfye itt, when itt is perfect cleare
putt

47

Put in y^e quinces, and Lett them boyle Leasurably, uncovered, allwaye stirring them, when they be boyled tender, take them upp, and boyle y^e Syrrupe a Little by its Selve, when itt is blood warme, you may pott them

To Candy Angellico

Cutt Angellico when itt is young and tender, and cutt the beynes in in the Joynts, as itt growes, then boyle itt in a pott close couered, with a Little Salt in the water, and the water must be cold when you putt in the Angellico butt there must be good Store of water, then Lett itt boyle till the Stalkes be tender, take itt upp and pill itt, putt itt into cold water as you doe itt, this done take y^e Angellico out of the water, and draine itt in a Sieve, then putt for euery pound of Angellico a pound of Sugar, beat y^e Sugar, then Laye y^e Angellico on a earthen dish, Stalke by Stalke, and Lett all the Stalkes be pilled and Laye a flowring of Sugar and more Stalkes, and this maner till all is Layd, and couer itt close, and Doe Lett itt Stand all night, in the morning Laye itt in the presaruing pann, and you may take a Spoon full or two of water, to reuce the Sugar, forth of the dish, but noe more water, then Lett itt to boyle Softly, when itt hath boyled a while take off the couer, and Skim itt, as you see cause, be Sure to Stirr often about for feare of burning, and couert itt noe more, after itt grow a Little thick take itt off the fire Sometimes, and Lett itt on a gaine, itt will make itt the apter to candy, when you see Sugar drye about the pann, then Laye a Stalke to coole, and if itt growe hard att a candy light, then take itt upp if itt be enough will hard when colde, if you please to make cakes then take of the Smalest of the Stalkes, which are in the pann, and Shreed them uery Small, if you thinke good of itt you may take mint, and Shreed Small, and boyle them upp, and then dropp them on a plate, - - - - -

To make Cleare Cakes of goosberries, corraunts Rasberries or damsons - - - - -

Take y^e fruite and Lett it in a Siluer tankard, into a Skett of boyling water, Doe boyle itt untill the Juice part from the fruite, then power out the cleare into a Siluer or earthen bason, and Lett itt Stand and settle, then power of the cleare, and take the weight in duple refined -
Sugar

1891

Suger, beaten uery fine, and Sett y^e Liquor, and Suger to geather, ouer a cleare fiar, keeping itt stirring, and Skim itt if there be need, untill itt be ready to boyle, then take itt off and power itt into glasses, and Sett itt in a Stoue, and when itt is on the other Side, then turne itt out on glass plats and Sett itt in y^e Stoue, to keepe for y^e use; The Same waye a priocks done, only you Stone them pare them, and take the pulpe. . . .

To make white past of Quinces

Take quinces and parboyle them, then pare them, and Scrape off the pulpe, from the coares, and to a pound of Dutch pulpe, take a pound of fine Suger, beaten fine, then beat y^e pulpe in a mortar, then mingle y^e Suger and pulpe to geather uery well, and glass itt up in little glasses, Sett itt adrying in a Stoue, when itt is Iced over, turne itt out on glasses, and keepe itt for y^e use. . . .

To preserue pippins in gelly. . . .

To a pound of pippins pared and coared, and quartered, take a pound, and quarter of fine Suger, and to itt take a pinte of water, boyle y^e Suger, and Scum itt uery well, and putt in y^e pippins, w^{ch} if pared before you imediately use them, must be flong into faire water, then putt in som orringe pill, which before hath been boyled in 3. Seauerall waters the first water hauing Salt in itt, then boyle itt fast till itt begin to gelly, then putt in two Spoonfulls of the Juice of orringes, and as much Juice of Lemons, then Lett itt Just boyle, and take out y^e pippins, and glass them up, putting, a Little of y^e Syrrupe, the rest putt in the next morning when itt is cold. . . .

To drye plums, without any Suger to be Seene. . .

Take a pound of Suger, and putt to itt a pinte and halfe of water - boyle itt uery well and Skim itt cleane, when y^e Syrrupe is cold, take plums, and Sett them on the dired Side, being in quantytie two pound and putt them into y^e Syrrupe, and Sett itt ouer a Soft fiar, and Lett them Stand, and Stew continually, turning them till they be tender, to the Stone, but not Lett them boyle, then take them off, and Lett them Stand, in the Syrrupe two dayes, then Sett them ouer the fiar, and Lett them be hott, through to the Stone, Soe Lett them Stand a colding

1

a Colding, one dayes Space more, then putt them over the fire, as before and when they be hott through, take them out of the Syrrupe, and Laye them arunning on Little plates, and have Some Scalding water ready, and wash euery plum in the hott water, cleane from the Syrrupe, and drye them in a fine cloth, and soe Laye them on cleane Siue bottoms, and sett them adrying in the Sun, or in a oven, the morning after manchett hath beene drawen, if you find any claminess on them, they must be washed in hott water, and dryed, as before, any kind of plums that is black or blue, butt y^e plums, must be a day Longer, in the Liquor the ordinary and for to blene them, a deepe, peauter dish is best, to doe them in, white pare plums, are done in the Same mannet, on quicker in Siluer or brass.

To make white marmalett, of Quinces, with Less - then the waight in Sugar, - - - - -

Take to a pound of quinces, unpared, and coared, 6 ounces of fine Sugar, being boyled uery fine, Laye Some of itt, in the bottom of y^e Skillett then pare and quarter y^e quinces, and putt a Layne of them into y^e Skillett on the Layne of Sugar, and soe untill they be all Layd the Sugar with them, and sett itt ouer a Soft fire, shaking them untill the Sugar be all dissolved, then boyle them, exstreame fast, untill y^e quinces, be all to mash then glass itt upp to y^e use, - - - - -

To preserue Quinces, white, whole - - - - -

Take y^e quinces, and waigh them, and to euery pound of Quinces, take a pound, and halfe of refined Sugar. then parboyle them, then coare them and, Afterwards pare them, and to a pound, and halfe of Sugar you must putt a pinte of pippin water, then boyle y^e water and Sugar, and Scum itt, then y^e quinces being, Layd upp, in tiffany, or Lanne, putt into y^e Syrrupe, with a few quince Seedes, tied upp in a tiffany, and boyle itt upp fast, untill itt gelly then take out youre quinces, and putt them in potts, with the holes upwards filling the holes, only with the hott Syrrupe, the rest of y^e Syrrupe - keepe in a glass, untill the next morning, then power itt into y^e quinces - make y^e pippin water thus, take 8: pippins, and pare them, and quarter them and two whole quinces, quartered, and uncoared, and unpared, and putt y^e pippins, and quinces, thus ordered, into a Skillett, with a quantytie of Spring water, and boyle itt till the fruit, be all mashed, then power itt through a Strainer, into a white bason, and Lett itt Settle, untill the next morning, and take of the cleane of itt for y^e use - - - - -

Handwritten text in a cursive script, likely a historical document or manuscript. The text is written in dark ink on aged, yellowed paper. There are several lines of text, with some words or phrases highlighted in red ink. The handwriting is somewhat faded and difficult to decipher in some places. The left edge of the page shows the binding of the book, with visible stitching and some wear.

To Candy Angellica ~ ~ ~ ~ ~

50

Take the Stalkes, and cutt them in what Length, you will, and Lay them in fayre water, and Lett them, Lye all night, if you please, then boyle them in the Same water, till itt be tender, keeping, itt close couered all the while, then take them upp, and peelee them, then putt them into the Same water, againe couer them close, and giue them, one boyle, and Soe Lett itt Stand one howre, ~ take them upp, and Laye them on dry cleare cloth, then take the waight in Double refine Sugar, finely beaten, then Laye them on a earthen bason, putting, Sugar betweene, euery rowe, Soe Lett them Stand all night, the next Day, putt them in a bell mettell Skillett, and boyle them uery tender, on a soft fire, being close couered, Some times Sturr them, then take of the couer and boyle them to a candy, Soe drye them, ~ ~ ~ ~ ~

To Greene plums ~ ~ ~ ~ ~

Take y^e plums and codle them, Soe that they maye peelee, and when you haue peeled them, greene them in the Same water, they weare codled in, then take them upp, and take there waight in Sugar, then make a Syrrupe, with the, Sugar, and Scum itt, and then putt in, the plums, and Soe boyle them, till they, Looke cleare, and the Syrrupe gelly ~ ~ ~ ~ ~

To make Iumballs ~ ~ ~ ~ ~

Take halfe a pound of Allmonds, and blanch them, and beat them wth some rose water, putt in a Spooonefull of Sugar, and Stirr them well, to geather, take the whites of 3 or 4 eggs, and froath them uery well, with a quill, and Stirr itt into the Allmonds, and Sugar, make them into what shape you please, putt them into a pretty hott ouen, and Lett them Stand till they are baked ~ ~ ~ ~ ~

To make mackarones ~ ~ ~ ~ ~

Take a quarter of a pound of blanchd Allmonds, beate them with rose water, taking halfe, a pound of Sugar, and two Spooonefulls of flower, Stiring them all togeather, then take the whites of two or three eggs, beate them with a Little rose water, Stirr them well togeather, make them, in what shape you please, Sett them on papers, and bake them in a hott ouen, ~ ~ ~

To make Iumballs ~ ~ ~ ~ ~

Take a pound of flower, and dry itt, and a quarter of a pound of Sugar, and drye itt, and the ycolkes of 21 eggs and putt itt all togeather, with a Spoonfull of rose water, 4 Spooonefulls of creame, beate all togeather halfe an hower then putt

gellica: leaves of each a handfull: wash them: and drye them
in a cloth: then cutt it: and bruse it a little: putt to it: 3 pintes
of white wine: in a flagg: stopp'd: Close: for 24: hours: during
which time: lett it be often shaken: then straine it: and add to
it fresh hearbes: and lett it stand as before: then straine it: and
and take a pound of the best Beearmeniac: made into fine
pouder: putt as much of the wine: as will make it of the thick
ness of butter: then lett it in the Sun: till it be drye: doe putt
to it more wine as before: till it be all drunk upp: and when
you putt in the wine the last time: putt to it the white: dias
cordium: burnt hartt horne: Surmentick: of each one ounce: soft
iron: bezar: Contrayerva: of each half a quarter of an ounce
Astermis: half an ounce: prepared pebble: a quarter of an ounce
of red Correll: a quarter of an ounce: and a booke of Castegold
doe sett it in the Sun againe: and when it is drye: make it upp
in balls: and keepe it for use.

This is good for Agues: and feavours: it produceth sweat
and drives out the small pox: and Measles: from the stomack:
or any other distemper: except the pluressey: you must give
to a man: as much: as will lye on a shilling: to a woman: or
Child: as much as will lye on six pence.

Take one ounce of Scordium: mix it with as much precipitate as will lye on a
pence: and lay the dust in a jar: to keep it on a plate of the stone: salt:
It is good for sore breath or any other wound: water sett the wound to this:
bottomne but just to keep it open:
To depose a Humour:
Take unquertum albem: mix it strong with Camphire: and a myght
above the wound: if that will not doe y must make an unne:
Take a little mutton suet: Jussure it betwixt a laye of red hot tongs: strep it
in hot coe water: spread it on a cloth: and lay it on the soie: = = = = =
Take Beefe tryt 2 quart: to a handfull of sage: Bason: and a handfull of Confrey ready:
Et it good: till harte bee consumed: then bath the part good:

58

With itt: 3 or 4 Pyboles, and Some Champonyons, you must all
Soe boyle, two Sweet breads, of Veale, to Steere in the Sauce.
itt is only the breast bone that is to be tooke out, and the
flesh there off to be minced, the eggs, are nott, to be boyled.

To Pickle Mushrooms Mrs Roses way.

To a quart of whit wine Vinegar, a pint of whit wine; 5: or 6: taces:
of ginger, Sliced, two or 3: blades of mace; 5: or 6: pepper Cornes, and
4: or 5: Cloues, Som bay Leaues; 3: or 4: onyons, cutt in peeces,
Some Lemond peece, and Salt to y^e tast, boyle all this togeather.
Some half a quarter, of an houre, then take itt off, and take out
the onyons, and Lett itt Stand to be Cold, and keepe itt for y^e use.

Take the mushrooms, deuide the Small from the others, putt them
in water, and take them upp, and rubb them, with a Course Cloth, and
throw them into water, when all is rubbed, take them out and in
a Cullender, draine them, then putt them into Some Milk and water
and boyle them till all the Scumm is risen, Lett them nott boyle too
much then putt them into a Cullender, when drayned, drye them
in a Course Cloth, and when quite drye, and Cold putt them into potts
and putt the pickle Cold to them.

How to Dress a Shoulder of Venison.

When you kill y^e buck. Saue a quantity of blood, take the
shoulder off, warme, take a fewe Crumms of bread, grated nutmegg
a little quantity of pepper, a little ginger, a little time, Stript, Some
Sweet margerum, a little Sauory. Thread all these togeather, and putt
them to the Crumms of bread, and Seasoning, take two, or 3: Spoonfulls
of the blood, and mingle, all, togeather, then Stuff the inside of the
shoulder, with these hearts, itt being dipt, all ouer, in the blood
then Laye the Cale, ouer itt, and as itt roast, fast itt with butter
for Sauce, take Clarrett, wine, and the gray, one Anchouis, and an
onyon, Stew them all togeather, the Juice of Lemonds, and orrange
and a little Sweet butter, power this on itt when you Serue itt upp.

151
 Keepe good above: 2 months, but you may take it as new as you please
 commonly take it in morning, and sleepe After it, as howver: or two
 which doctor Howes allows

For the Strk. m^{re} El. Well.

Two pound of Elecompare rootes, boyled in: 4: quartes of water, till
 it come to two, then pour that away, and boyle it, in: 4: quart, more, till
 it comes to two againe, and doe a third time, save the last water, and
 boyle it with: 12: pennyworth of saffron, then pour it out and sweeten
 it to your tast, and when it is cold bottle it up, and drink every mor-
 ning half a beere glass full, as long as it last, take the Elecompare
 pap, and pound it with two pound of sugar, till it comes to a soft oyat
 ment, then knead your self all over, before adior, especially the wrists
 and Joints, twice aday, till you are well, this is a souveraigne cure for the Strk.

AFomatium

Take a quart of heats foot oyle, and heat it in water, then straine it
 into an earthen pan, and wash it in spring water, an howver, together
 every day for a fortnight or till it be white, then take soft mens scale
 rootes, and mash mallows, and white silly of each as some full, slit, and
 put them into an earthen pot, and draine the water from y^e oyle, and put
 it to the rootes, then take frogs Sparrow water, the blood of the Vine
 red may wine, and plantin water, of each a quarter of a pinte, and put
 it into the rootes, and the oyle, and boyle it in a kettle: 3: howers, then
 take your oyle from the water, and put in an ounce, of paeonacie, a
 pennyworth of white hartshorn dissolved, then take the Affomatium fresh -
 water, and put them into the oyle, and draine it, till it be cold, and comes
 to a body, then put it into pots, and lett it be all ways covered, with it
 blood of the Vine, for it will not, keepe without that water, - and that
 must be poured in the sun, after you draine it from the Vine -
 Take an ounce of the powder of a seed mout full, that way never dries, and an ounce
 of muskettine of the oyle, half an ounce of prepared bottle, half an ounce of -
 prepared small half an ounce of single strong root, half an ounce of Ricinus
 root, make all into a fine powder, and any of the Sythia water, or Blackberry -
 Water, Worm water, as much as will be dry six pence, at night when y^e goe to bed,
 3 dayes before the full of the moon, or at any time, in a full and 3 night
 after:

59

How to preserve Apricocks in Chipps, my Mothers Way
Make Syrrupe, with 3 quarters of a pound. of double refined
Sugar, and boyle itt almost, to a Candy, then Lett itt Stand, and coole, a
Little, then Slice in a pound of Apricocks, pared and cutt round Like
chipps, butt nott neare the Stone, Least they be too deepe Coulored, and
when you have Sliced them in, Lett them boyle as fast as possible,
till they be Cleare, and then they be enough, if you will have them
Lye in Jelly, putt a boutt half a pint of pippin water, and the waight
of itt in Sugar, when the Apricockes, are half boyled, or rather Less
then Lett all boyle to geather, you may doe Apricocks, in half thus, and
they will Look uery well, and pale, y Apricocks, must nott be ripe. For as to
be yellow

Directions For preserving: my Mothers Waye . . .

To a pound of Cherries take a pint. of white ran Currant Water
To a pound of Apricocks, in peeces, take Less, then half, a pint of Coddling Juice.

Take of the finest pippins, cutt them in halpes, and Sett them over the fire, and Coddle, them, uery, tender, then haue a basket with a cleare Cloath, and as they tender, putt them in the basket, that the water may run from, them, and when they are all in, twist the two ends of the Cloath, that the water may run Cleare from them, then putt two att a time on the reuge, and with the back of a spoone, driue the pulp through, then weigh the pulp, and to euery pound take a pound of Sugar, then putt as much water, as will more then wet the Sugar, Sett itt ouer the fire, and Lett itt boyle, Soe Long, as when you drapp itt into water, itt will be harde, and breake Like a peece of glass, then itt is enough, then take itt off fire, and putt in the pulpe, and Soe keepe itt stirring, till itt be Cold, then putt itt in a Tinn pann, and Soe drye itt, you may doe quinces, the Same way, only, you must add aquart of Sugar more,

To preserve Apricokes

Take Apricokes, when the Stones, are firme in them, and to euery pound of apricokes, take a pound Sugar, pare them uery thinn, and flitt the Same as you pare them, and putt them into Cold water, as you pare them, to keepe there Coullor, then putt them in a skillett, with Cold water ouer the fire, Close Couered, till the water, be Scalding hott, then take them off, the fire, and Lett them stand, till they be pretty Cold, then Lett

A Syrrupe for a sore Throat: in the Throat.

Take rue, Sage, Collumbine Leaves, rosemary, Ginnell, Egermomy, Sink
folia, Straberie Leaves, Violet Leaves, bramble Leaves, woodbine Leaves
Adders tongue: Heratwort, plantin, of each two handfulls: pound them, and
take the Juice, add to it two good Spoonfulls of honey, and as much Sugers
as will make it to a good thick Syrrupe, before you take it off, putt
into it as much Alome: as will make it rough, upon the tongue, this
may be taken, in the small pox: measles. or Quinsy - - -

To make Lynamon Water: in the Draycott.

Take half a pound of French barly, and 5: quarts of Spring water
boyle it till a pint be consumed, then putt in: 5: ounces of the best Lyn
namon, beaten, and soe distill it in a Lomon still, draw: 3: pints of the
water, the rest will, be good for Little - - -

For a Soreness in Adam, Ireland.

Make a glyster of Chicken broth, and give it the party: probatum est

To make the mellancolly Water: Madam Compton

Take of mall flowers: 4: handfulls, of Violets, one handfull, of res mary
flowers, 4 handfulls, of Lontip flowers: 2 handfulls, of Damask rose buds
the white cut off: 3: handfulls: of pink: 4: handfulls, of burage, and buglas
of each: 2: handfulls: of may gold flowers: 4 handfulls, of bitany, and sage
flowers, of each: 2: handfulls: and of Lilly Conually: and Clouggilly flowers
of each one: handfull, putt all these flowers, into one pint of strong Angellie
water, and 2: quarts of the strongest, and best Herby sack: putt in your
Liquor, and flowers, into a great glass, of Stone Jugge, that have any
mouth, and soe lett them stand close stopp'd: till all your flowers, be in, but
be sure to keepe it in a cold place, or else your name will be apt to Jorney
you must once aday, filter it with a long strick: then take off your stopp'd
bame: 5: handfulls: half an ounce of Lynamon: one ounce of Anniseeds -
3: nuttm eggs: 6: penyworth of Saffron, all your spices must be greatly bruised
putt all these to your flowers, and wine: Adding one quart of sack more
lett all these: stand for two dayes: and nights, then distill them in a glass

To Drye Apricocks, Mrs Buckland, Junior.

Take y^e fairest, Apricocks, and Stone them, and pare them, taking there full waight, in double refined Sugar, well pounded, and Seared, filling up the hole, as you pare them, with Sugar, Lett them Stand: 12. hours: with all the Sugar uppon them, then boyle them upp quick, and Skimm them, Cleane, when you see them, tender: they be enough, Lett them, Stand: 12. hours more in the Syrrupe, then take them out, and Lay them on glasse. Dust them ouer, with fine Sifted Sugar, putt them into a hott Stone, - keeping the fire well to them, they will be drye, in 4. or 5. dayes, and - Looke uery Louely - - - - -

To Drye Figgs: Mrs Buckland: Junior. -

Take a pound of Figgs, and a pound, and a quarter of Sugar, a pinte of water, Lett the water, and Sugar boyle upp, then Skimm itt Cleane. then Slitt y^e Figgs on that Side y^e Seane is on, putt them into y^e Syrrupe and Lett them boyle, a good round pace, for an hour, then putt them into a gally pott, Lett them into a warme Stone, and in two, or 3. dayes, they will haue a little Candy on the top: then take them out and drye them, in a hott Stone: Lett y^e Figgs be through ripe, when you doe them, you may keepe your Figgs in Syrrupe all the yeare, and drye them, as you haue occasion, - - -

How to drye. Ploombes - - - - -

Take ploombs, and Stone them, and weigh them, and to a pound of plums take half a pound of Sugar, and half a pint of water, and boyle upp y^e Syrrupe and Skimm, itt, and then putt in the plums, Lett them Simber. a Little ouer the fire, then take them off, and the next day, giue them. a warme or two, and the next After, as much, then Lett them with the Syrrupe into the Stone, three dayes, putting in fire every foote, then take them out, and Lay them on glasses, in the Stone to drye, when they be drye, wash them with warme, water, a Little, and putt them in to the Stone, againe, and the next day wash them, with Cold water and drye them upp, and when they be drye, putt them in glasses to keepe

148
 Affix as the neck of the Urinal, then set it on a Even glass, undifferent
 quick, but not to hot, when y^e oyle begins to heate, and y^emer, you must
 be very Carefull of the glass, for should it be in the least too hott
 it will flye all out without staye, therefore it must boyle very gently
 and when you see it tooke Cleare, and Change Colour, like a pale
 Claret wine, take it from the glass, and the heate of the sand will
 keepe it boyling halfe an hour After, in which time it will be enough
 you may, in the boyling of it, Stir it som times, with a slender stick.
 very gently, then set it stand in the sand, till it be cold, then take it
 out and draine the balsome from the brimstone, which will be at the
 bottom, and keepe it in a glass, for your use, it must be booke 4. drams
 in a spoonfull of the best sack, fast at night and first in the morning
 fasting an hour After.

A medicine for the Stone: All Teacomb.

Take a gallon of newe milk, draine, from a red Cow, and put thereto
 a handfull of pebblery of the wall, a handfull of y^e time, a handfull
 of Saxifrage, a handfull of meade perely, and two or three radish rootes
 sliced, Steepe all these together in the milk one night, the next morning dis
 till the heate with the milk, with a moderate fire, the best time yet to
 distill this water, is about the later end of may, use it in the manner
 following, take of the water six Spoonfulls, and of renish wine, or
 white wine: x. or xij. Spoonfulls, and mixe the Sugar, and some slices, of nut
 megg, make it like warme, and drink it, and fast 3. hours, using tem
 perate exercise, take it two mornings together, and alsoe, the two
 night of those dayes, to bedward, every night, at the full of the moon.

This medicine, hath bene used by many to there great profit, but espes
 sially by m^r Warham, apertitioner to his majesty, who having bene for the
 space of thirty yeares, most grievously troubled, with the Stone, was by the
 use here of, not only eased, and freed, but to his dying day, Joe pre
 served from that disease, that being opened After his death, there was
 not found Joe much, as a signe of a stone in any part of his body.

This is in no: 46

To make Codling Creame: my Lady: Shasberys Way
 Coddle y^r Codlings, uery tender; then pulp them, through, a haire Sieve
 and take of that pulp, a pound, or half a pound, according to the bigness.
 of the Vessell, you intend to putt them in, and putt itt into a siluer, or
 earthen, Vessell, and heate itt Scalding hott, Stirring itt for feare of
 burning, then take the Same quantity of Searced Sugar, and heate that
 Scalding hott, putt the Codlings and the Sugar, together, in an earthen
 pann, and beate itt uery well with a spoone, then take two whites of
 eggs, and whisk them with a whisk, to a uery high white froath, and
 putt in a spoonefull, or two, in the beating upp y^r Creame, and Lett
 itt be beaten, till itt is as white as anye Creame, and soe thick that
 you maye Lay itt in any forme, with a spoone, thus you may make
 Creame, with any Sorte of Fruite: - - - - -

To pickell Concombers - - - - -

Take them, and rubb them, in a Course Cloth, then putt them, into a
 pott, with Salt, Cloues, mace, pepper, all whole, a handfull of dill: as
 much Viniger, as will Couer them, soe Lett them Lye a month, then, boyle
 the pickle, and putt itt into the Concombers, as hott as you can, couer, them, close.

To pickell Samphear: - - - - -

Gather itt drye. putt itt in faire water, Vinegar, and Sault. in a month
 itt will be fitt to Serue, - - - - -

To make a Cake. madam Ireland - - - - -

Take a peck of fine flower, well dryed, and: 3: pound of butter, uery
 well rubbed in the flower, one pound of Sugar, finely beaten, and
 strewed in the flower, as much Spice as you think fitt, beaten
 and Searced, in the flower, when all this is done, add: 10: pound
 of Currants, uery well washed, and thoroughly, dried, two pound of
 reasons of the Sunn, Stoned, and Cutt Small, when all these things
 are well mingled together, putt: 3: pints of Ale yeist, and as
 much Creame as will, make itt, as soft, as for a pudding: you
 must putt one wine glass full, of Sweet, water, with two grains
 of Amber.

Are done the red poppies: The Water is now made thus, take a
quarte of the spirit of Cardus, and a quart of the spirit of poppy, a
little stronger then sack, infuse therein 4 ounces of marygold flowers
six ounces of Juicy roots, two ounces of London Treacle, 4 ounces
of Cardus seed, two ounces of hart's Horne, and twenty Greene Wallnuts.
sticed, infuse all these 9 or 10 dayes, then distill them in a Common
Cold Still, mingle it about the strength of sack, and give it the patient
fasting, two hours before, and after the taking of it, he must be in bed, you
must two hours after the taking of it, give the party draught of mace Ale
or port wine, if they be not asleepe, it may be given them once, in twenty
four hours: or 12 hours if need be: 3 large Spoonfulls for a man or two,
man, and two for a Child.

To make Lemonade Mada Smiths Way.

Take a gallon of London water, one pound of blen reasons of the Sun
stoned, and half a pound of sugar, squeeze the Juice of the Lemons, upon
the reasons, and stive the rinde upon them, boyle the water, and pover it
in hott on the ingredients, in an earthen pott, and stir them well together

Shew 3 spots on my paper 11

2. The first of these is the fact that the

A Receipt for the Tooth Ache

Take a little white Vinegar, and put it in a saucer, over a good
coals, put into it a little Lump of Allom, and as much tobacco Ashes
tyed in a rag, as is left of the Smoking of two pipes, after it hath
steede a little while on the coals, take a little rag, moistened on a
stick, and dip in the liquor, and put it to the hollow part of the
tooth.

A receipt for the Kings Evil

Take a good quantity of red Nettles, and halve as much of Spedwell
or fluellen, take of guaiacum, half a pound, Sarsaparilla: 4: ounces, bruised
hearts well, before you put them in, and add new milk, one gallon, two
quarters of white wine, and two quarters of Ale, and draw off 6 quarts, take
a quarter, of a pint, every morning, and at 4: a clock, in the Afternoone
and at night, sweetened with Symppe, of Elder berries.

To make the Mellilote Salve

Take Sheeps Suet: 2 pound, minced very small, put it into a skillett, over
the embers, then take 5: or 6: handfulls of mellilote, minced small, and
put into the Suet, and when it is well boyled, Straine it out, and put
there to: 2: ounces of Turpentine, as much wax, with an ounce and halfe
of rosum, more or less, according, as you will have it for stiffness, then
set it boyle a gaine, over a soft fire, and keepe it stirring, till all be
melted, then Straine it up, for use.

A Very good Wash, for the Face

Take a quart of butter milk, a quart of beane flowers, and 4: young
puppye Doggs, quartered, and cleane wiped, and put into the Still, with
2: or 3: demons, and still it in a cold Still, youes this water every, mor
ning with a fine cloth.

How to make a Pomato

Take the Caul, of a salt weather, that is white, throw it into Spring
water, as soone, as it comes out of the sheeps belly, wash it in cleaver
all, waters, till the water looks cleare, then pick it from Vaines
skins, and kernels, water it: 9: dayes, Striking it twice a daye, butt
not touch it, then drye it in a cleane cloth, and beat it, in a
course cloth, till it be as soft as butter, to a pound of this Suet
you must have a white Lilly roote, cleane washed, and picked, from
all.

[Faint, illegible handwriting throughout the page, likely bleed-through from the reverse side. The text is written in cursive and spans most of the page.]

Tumatum, for the breast.

Take the right of a fat weather, whilst it is hot, putt it into
whitewine: 24: hortes, to soake out the blood, then pick it cleane
from Vaines, skins, and kernells, then putt it into running water
for: 8 or 9 days, thrist it hore aday, then drye it well, in a course
cloth, then beat it with a rolling pin, till it will worke like doe
then putt it into a glased pott, putt to it a marsh mallon roote
a white lile roote, one ounce of parmaceti: 20: earth wortmes
washt cleane, and dryed in a cloth: 20: great snayles, gedd with
suger, 9 or 10: dayes, and after, cleansed in bran, breake the shells
and ripe the snayles, sett all these, in a pott of water, cover it
and lett it boyle: 4: hortes, straine it through a thicke fine cloth
and beate it in a gally pott: 2: hortes, still pouring out the dross
water, then putt to it one good Spoonfull, of oyle of bene, as
much of oyle of bitter Almonds, beate it upp one hore more, if
you desire to have it sweeter, putt in to the suett: 2 graines of
musk, bruised, and tyed upp in a tiffany, beat it with suett, then put
it, or cast it into a cake.

Doctor: Senbarts Salve: for the Seatica, or any old Ache.

Take of the oyle of oxes feet, and sheeps feet, of the oyle of St Johns
wort, earth wortmes, and mares fat of each halfe a pound, of white
lead, and cerus, of each five ounces, of minium a pound, of yellers
wax, and turpentine, of each: 4: ounces, of Saffron, and camphor, of
each: 3: drams, of Lapis, hementibis, and Sanguis, dragons, and cassia
extracted: in Aqua, Spematis, ranarum, of each foure ounces.

To make the Black Salve.

Take Stone pitch: 2: pound, and being bruised, putt it into a pan or a
pott, over the fire, then take resinum, and Frankincense, of each: 2: pound,
beaten to powder, one pound of sheeps suett, cloves, Saffron, and mace
of each, two ounces, Sandanum: 3: ounces, half a pound of comminseed
dryed, and well beaten, all these made to powder, putt in to geather, with
your pitch when it hath boyled, make it upp into roles, and soe keepe it
this Salve, being employed to the sole, of the feet, helpeth, any, impedym
ment, either, for the sight, or hearing, or any humors.

The Table for the receipts: received
from your Ladyship: at Ostock.

Handwritten text in a cursive script, likely a letter or a page from a manuscript. The text is written in dark ink on aged, slightly discolored paper. The handwriting is fluid and characteristic of the 17th or 18th century. The text is arranged in several lines, with some words appearing to be underlined or written in a larger, bolder hand than others. The overall appearance is that of a personal or official document from a historical period.

Handwritten title or section header, possibly indicating the subject of the document. The text is written in a cursive script, consistent with the rest of the page. It appears to be a single line of text, possibly a name or a title, written in a slightly larger hand than the main body of text.

Handwritten text in a cursive script, continuing the narrative or list from the top section. The text is written in dark ink on aged, slightly discolored paper. The handwriting is fluid and characteristic of the 17th or 18th century. The text is arranged in several lines, with some words appearing to be underlined or written in a larger, bolder hand than others. The overall appearance is that of a personal or official document from a historical period.

Directions for the removing, and setting of slips of Artichokes, gooseberries, roses, I will, white thorne, and all manner of flowers - Remove, and set slips, and all kind of flowers, from our Lady day in August to our Lady day in September.

Sett all kind of quicketts from September to March, sett trees in No: Decem: Febr: March: sett all manner of flowers, and hartichokes, in the latter end of Febr: March, and April. Graft all manner of trees, as pear, Apple, Plum, Cherry, in March, the moone, being in true trees, and open the earth, about the roote, and lance the bark, in December, Febr: new moone. - Cut vines, in the latter end of Jan, Febr: March, the moone, in the waine. Cut roses, damaske, and red, in October, the moone in the waine, it is sufficient to cut them once in two yeares, to have them, beare, plenty of roses, for if you cut them, twice a yeare, as some use to doe, they will springe, with many leaves, and give blossomes. Open the earth, about y^e old trees: so foot compass, and take away the earth, till you come to the roote, and for sett them stand open, Decemb: and January, and to notes, the latter end of Febr: put a load or two of kennell dung, to every tree, and it will bringe downe the mosse, this is to be done, once in foure yeares.

For the killing of a canker, in any tree, take a Chisell, and a mallet, and cut the canker till you come to the wery quick, then take a quantity of Swines dung, and fill up the place, putt claye on it, and mosse on that, then binde all in, with a cloth, and lett it re mayne till it fall off itt selfe, and soe the barke reneweth.

A note of the best times for sowing, these hearbes, and Seedes following

Cabbage, cole, both white and red, sowe in Jan: Febr: March, and August, the moone in the waine, replant the same. - Lettice, Cabbage, white Lettice, soe at times the moone in the waine. - Radish, white, and black, soe in March, April, Maye, June, July, August, the moone decreasing. Scutched, it will heale it, in foure, or five, times dressing, soe noe other thing be applied
Secondly it healeth any burninge or scalding, by heat or water, or any other meanes, like
wise it healeth any bruse, or cut, being first annointed with the same oyle, and a peece of
linen cloth, or lint dippt, in the oyle, warmed, and layde, unto the place, it healeth it without any
scart remaining

Thirdly it taketh away any paine or greife, that might grow by reason of cold moisture
catarrhe, or Aches, in the bones, or Joints, first annoynting the partes soe offended, with the saide
oyle, heated, and a warme cloth, layd upon it
Fourthly, it helpeth the head ache, only, annoynting, the temples, and nostrills, there with
Fifthly it is good against the collick, wind, or sick, in the side, applied there to
warmed, with hott clothes, foure mornings, together, every morning a quarter of an ounce
Sixtly, it is good against poyson, and healeth a swelled, taking an ounce, in a little sack warme
Seauntly it is good against the plague, annoynting only the nostrills, there with in the
morning, before the party goeth forth, and for that daye by gods hee neede not feare the plague

Eighthly it healeth, the biting of a madd dog, or any other beast
Ninthly it alsoe healeth a sigtula, or ulcer, be it neuer soe deepe, in any parte of the body
being applied, as a foresaide for a cure.

Tenthly, it is good against wormes, or cancers, being used as for a cut, but require longer time
Eleauently, is very good for one infected with the plague, measles, or the like, soe it be
presently taken in warme broth, the quantity, of a quarter, of an ounce, foure mornings to
gether, and I treat upon it, alsoe it keepeth one from Vermine
Inueluently it alsoe helpeth digestion, annoynting, the hawill, and stomack, there with
when the party, goeth to bed, it will stanch any blood of a greene wounde, presently put
ing a plaster of Linde on it, and he it very hard, the saide oyle or balme maye be kept
honey yeare, and neuer loose its vertue, but be much the better.

To make a Balsam for the better May by J. 127.
Take a pound of of cloves, clauing, 3 pint of the best white wine, or
Rosh wine, and one ounce of red Jamberry, Cherry, Sherry, or a quarter of a pint of
y. What you will with the best. Then put the wine, and Jamberry, and the wine, in a
new, bryne with a still, and stir it gently over the fire for an hour
and a half, with an open lye continually. Take off the fire, and when it is
cold, Strain it, and put it in a glass, but if you have any more, you may
add more, still stirring it, then take it off, and put it in a glass, and keep it
it till it be cold.

the deaves of to hacco, greene, four ounces, of resin halfe a pounde, of deares juett tryd a pound
dissolve the resin, and deares sent on the fire, then putt in y heartes, and juice, and after
they are sodden a while, straine them strongly, through a linnen cloth, and keepe this oint
ment for use, when you applye it rubb it in, and chafe it warme into the partes affected
with warme clothes, and by gods graue you shall finde ease beyonde y expectation.

M^r Wakemans oint, a redd, ointment, to be given both

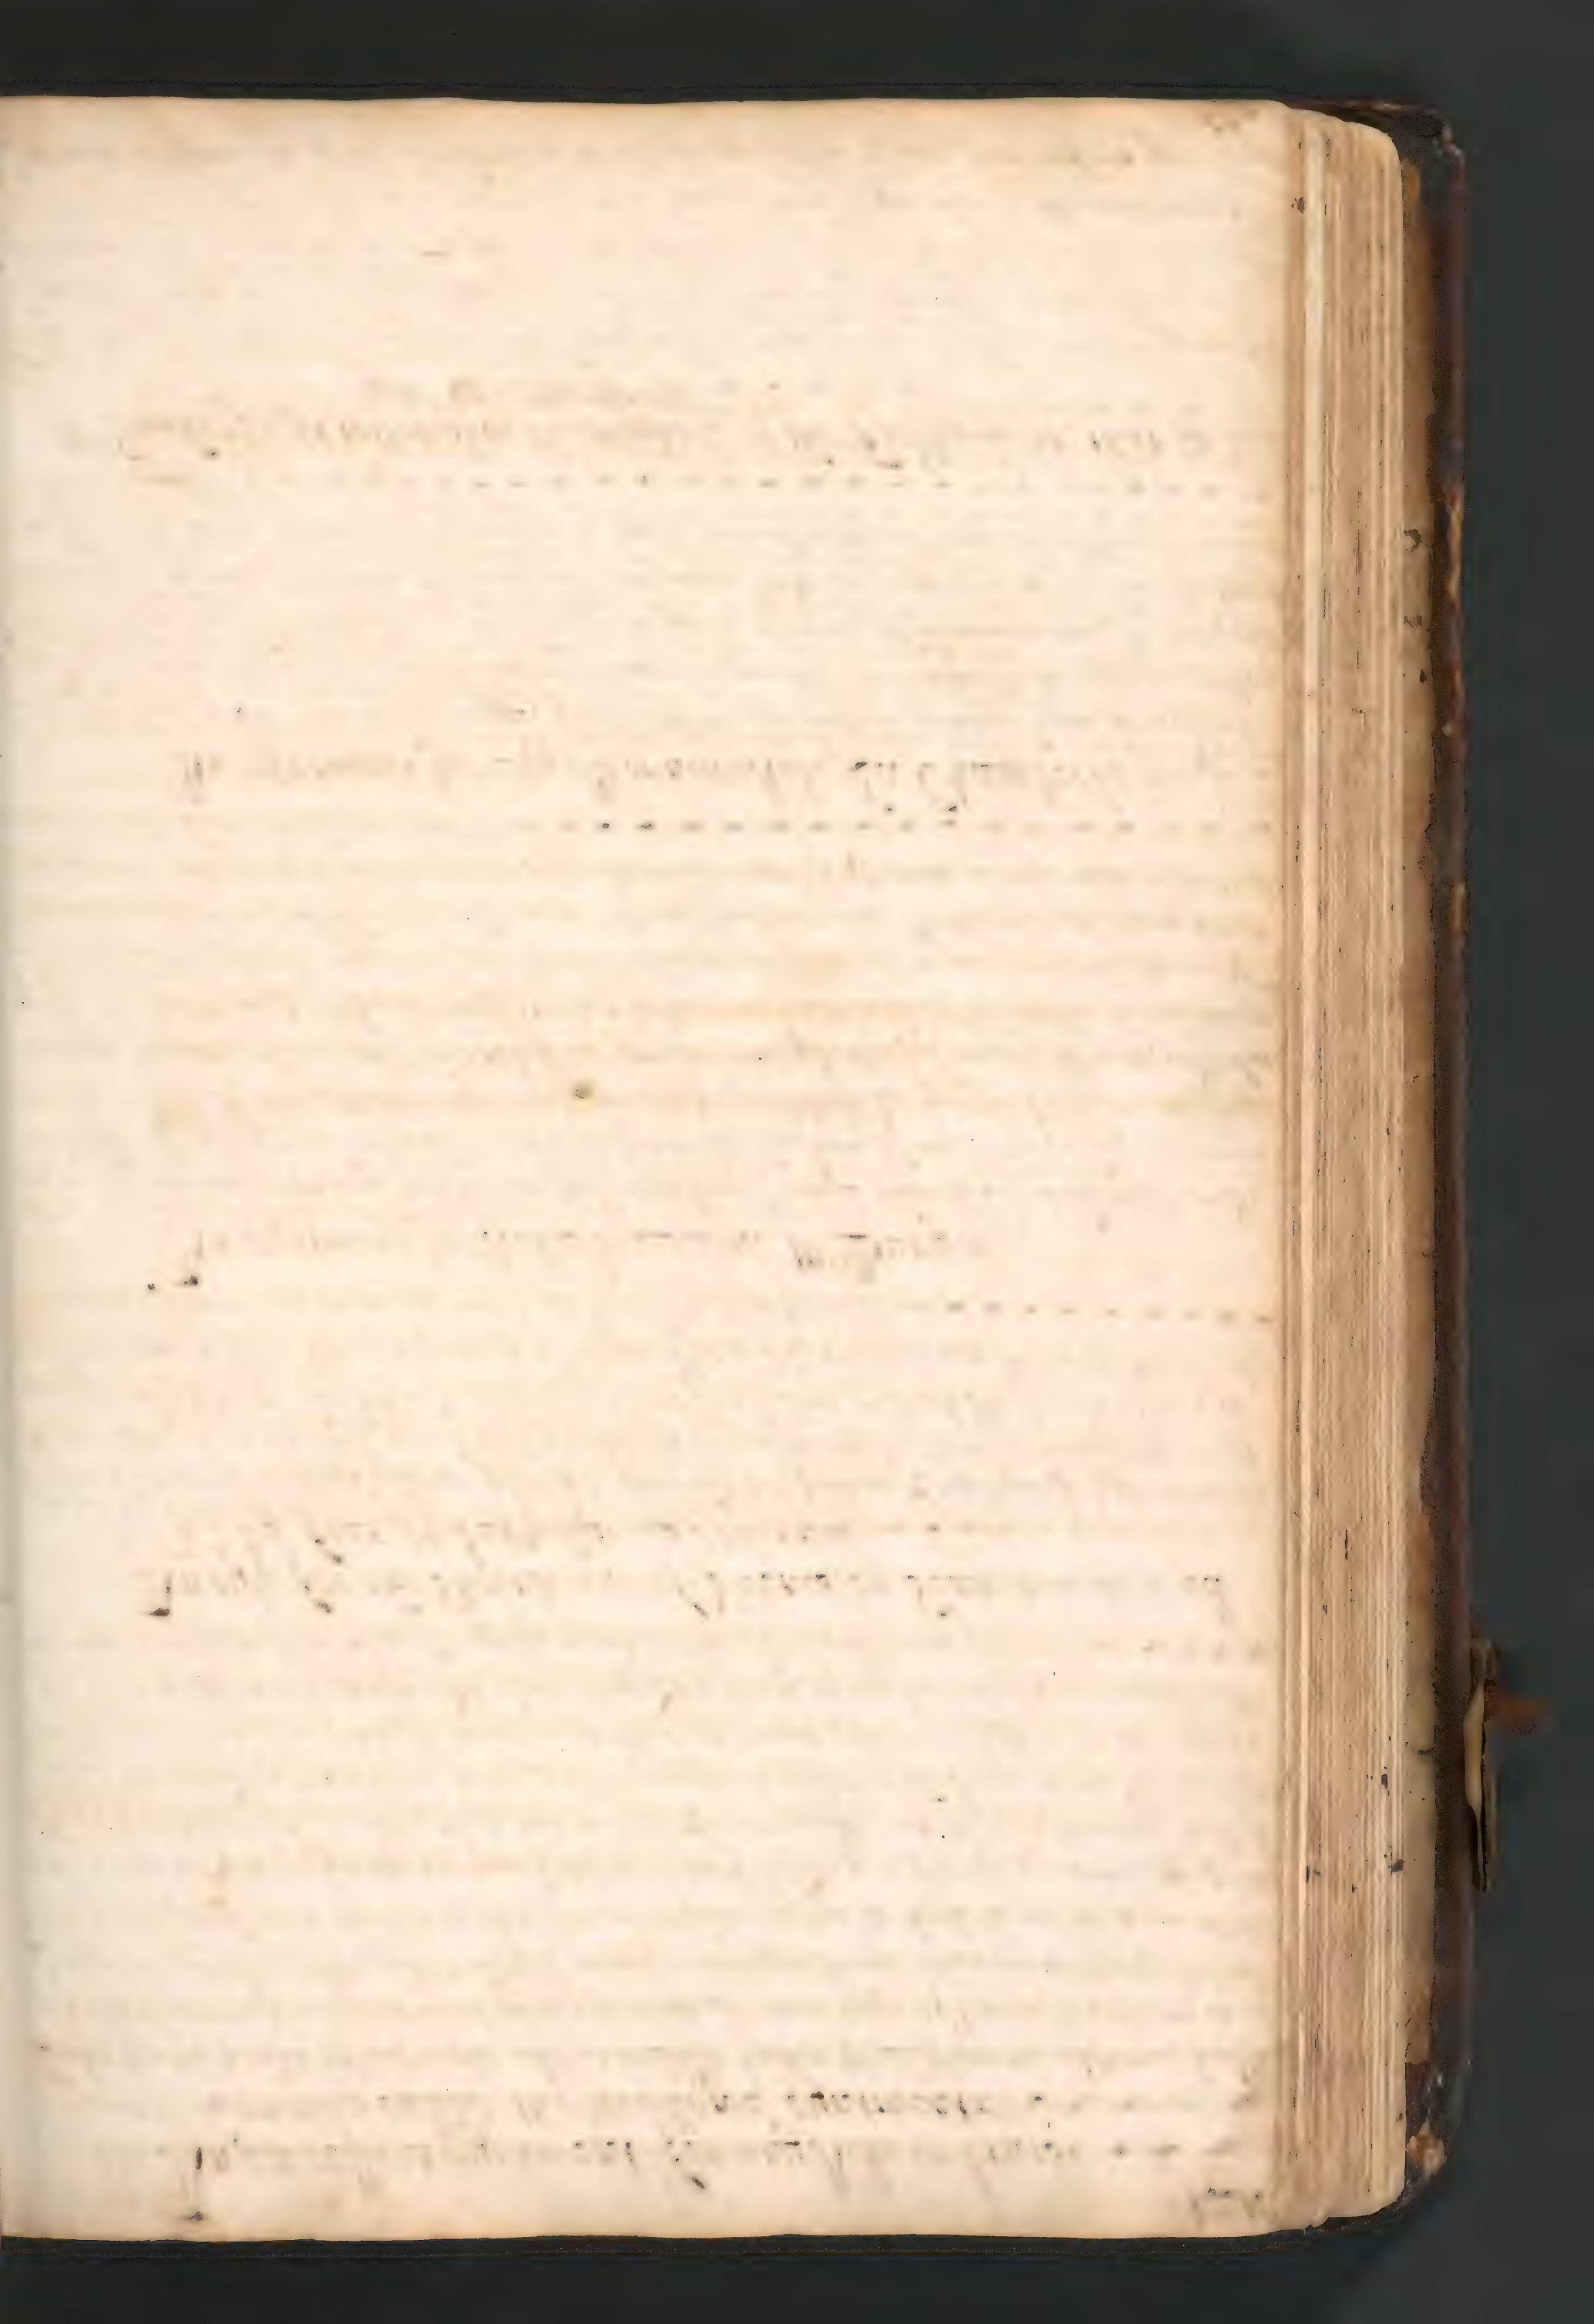

inwardly, and outwardly, for the kings ewill, fluxisic burnings, or scaldings, chiches, greene wounds, and sore eyes

Take a pounde of venice turpentine, and wash it in plantain water first, then after wards in
damaske water, or either of them, then take three pintes of the best sallet oyle, and three quarters
of faire running water, and beate the oyle and water exceeding well togeather, then putt it into
a pykin, and sett it on the fire, till it be redy to boyle, then take it off the fire, and skumme, of from
the water, the oyle, yett leave rather, some of the oyle upon the water, then take of the water with it
then take a little skillett, and putt there in y oyle, turpentine and halfe a pound of bees wax butlett
y wax be first moulten, and boyle it well togeather, still stirring it untill it boyle up againe
then take three ounces of sanders, and putt it into it, stirring it well togeather, after you have
taken it off the fire, then straine it into the pykin, that it was washed in, still stirring it
till it be colde, and when the ointment is cold, putt it into a gally pott, but if you use any
of it for sore eyes, putt no sanders, into it at all.

This aforesaid, pious ointment, or balsam, is good, in all

perfection to cure these under written infirmities

First, the said ointment, is good to cure, any wound, inward, or outward, be squinted in
warne, if inward, if outward being applyed, with fine linte of linnen, anoynting alsoe
those partes, there abouts, it not only taketh awaye the paine, but alsoe keepeth it from in
inflammation, and soe straine it forth, all broken bones, or any other thing, that else might
putrefie, or fester it, soe that the braines, or inwardes, as the hearte, gutts or liver be not
touched

An excellent ointment for any Ache or bruise ~ ~ ~
Comonly called the yeallowe ointment ~ ~ ~

Take foure pound of unsalted, and unwashed butter, fresh from the chourne, halke
a peck of broome flowers, as much of the upmost leaves, or toppes of bryars, that run a
longe the grunde, and a good handfull of rosemary toppes, stampe these in a mortar, and boyle
them very well, with the butter, then straine it, and after wards boyle there with, a quarter
of an ounce of mace, finely beaten, and after it hath boyled, putt thereto, a quarter of a pinte
of a queuite, compoista, then melt two ounces of untought waxe there in stirring it still
till it be melted, and till such time as nothing apeare, either of the Juice of the hearts alone
or butter alone, butt that all seeme one perfect ointment, after which, straine it into an
earthen pott, it will keepe good, close stopp'd a yere, if any have any paine at the sho
make annoynte, there with, and applye warme clothes, and it will bringe greate ease ~ ~ ~

mints of romana Visa, white mint, penny leaves, basie leaves, baye leaves, Will of each
one handfull, bruse them in a mortar, then putt them in a faire glass vessell, and putt there
to a pottle or thre quartes of the best cady oyle olive, sett the vessell in the sun, for a
month, then putt it into a hott glass, and sett it on a hott glass, and sett it sothly, and
stir it still, then putt thereto a quart of the best whit wine, and soe sett it sothly
till the wine be washe, after which take it from the fire, and sett it to coole, then Straine it
through a linnen cloth, and putt it into glasses, and use it as you neede, black Snayles, allsoe
gathered in may, and putt in a pottle, with baye salt, will become, an oyle, and it is speciall
good for horses leggs Strained, or brused, and maye be applyed, for that purpose to any other one
An oyle, called the red, oyle speciall good to heale a small

Cut, or grate Wounde, and is available, to many other purposes
it must be applyed warme

Take a pint of a quart of Sallet oyle, or as much, as you thinke good, to make, for it
will continue good 6 or 7 yeares, then take to every pint of oyle, two ounces of Alcanet rootes
which is to be had, at all times at the Apothecarys for 3 or 4 the ounce, three good handgulls
of dragon or Serpents tongue, two handgulls of ualerion, and an handfull of an hearbe, called, time
in idleness, chop all the hearbes, as small, as hearbes for the pott, and ponde the rootes as
small as other, spices, that some putt all to gather into the oyle, and boyle it till you, thinke
the hearbes sufficiently boyled, then Straine the same through a fine cloth, and putt the oyle soe
Strained into a glass, and sett it in a place, where the sun cometh, as longe as you will, and to
to make it more perfect, and medecineable, upon midsummer eve, gather, three or foure hand
gulls of St Johns wort, the blossoms of it, and with an ounce of the Alcanet rootes pounded, boyle
them in a pint of oyle as before, then Straine it, and putt it to the other oyle, and sett it all to
gather in the sun, but if any or all the said hearbes cannot be gotten, the oyle, and rootes
only used, and boyled to gather, as before, will heale, sufficiently.

The making of oyle of Roses

Take roses, cut of the nities, Thyme, and putt them into a glass, of oyle of olive, soe
that only halfe the glass, be filled with the brused rose leaves, sett it in the sun for the space
of 7 dayes, and then seeke them in a double vessell, three hours, and then Straine them, and putt
to the oyle rose leaves, cut and brused, as before, and sett them, stand in the sun 40 dayes, well
covered, and in this maner you maye make oyle of camomill, Will, worme wood, and there,

An oylment good for the dropsie

Take Lavender cotton, holy oake, beany, thyme, Jssope, Sage, Lavender, Sprike, rue, and
as will cover them, then seeke it a pretty while, and sett them stand from the fire, 12
hours, after which, seeke them againe, untill the butter be greene, then Straine it and
keepe it for use

[Faint handwritten text at the bottom of the page]

1871

1. The first part of the document is a list of names and titles, including "The Hon. Mr. Justice" and "The Hon. Mr. Justice".

Bottom, and if you can dissolue, not water in the Spone, it is boyled enough, then
take it off the fire, and cast it immediately into a bag of strange new canvas, and straine it
forcably, be horene howe it comes, putt it up into a vessell of tin or glass, for no other kind of
vessell will containe it soe well, and keepe it for y^e use, this oyle or ointment may be a
plied, and will be available, to such places of a man or woman, as are bruised, with gouts
and palsies, in summer anoynte in the warme sun, and in winter by the fire, and after the
anoynting daye on the place, black well, that neuer was washed, made hott against the fire
this ointment is good against all manner of maldies, that be in the sinews, by occasion
of any cold, and is medivable, for all bruises of bones, and Joyntes, it must be made up in the
month of June, for all the yeare after, and with good keeping, continue good three yeares -

An ointment of the hearte Nicotiana, good for any cutt or wound, and for any Ach in the bones, alsoe where the skin is

take a waye it will heale ~ ~ ~ ~ ~

Take in the month of August, as many of the leaues of the hearte, nicotiana, as shall
weigh, six ounces, stampe them in a cleane stone mortar, then take the like quantity of good
sheeps suett, the skins being cleane taken awaye, mince itt small, and stampe itt in the mortar
alone, after which then stampe them well together, then take sponges of the best old sallet
oyle, and mingle all these, very well together, and keepe itt in an earthen pott, six dayes, and
stir itt well together, twice a daye, after boyle itt on a soft fire, till itt dooke greene, then
straine itt through a thicke canvas, and keepe itt in gally potts ~ ~ ~ ~ ~

An ointment for all kind of Aches, and bruises ~ ~ ~ ~ ~

Take itt of sage leaues, as much of rene, half a pound of worm wood, and as much
of bayleaves, all this purely picked, and gathered, in the heate of the daye, that they maye
not neede washing, cutt them small, and beate them in a mortar, then take three pound of
sheeps suett, new from the sheepe, and when itt is cold, mince itt small, and putt itt into the mor
= ter, to the heartes, beate them together, untill such time as the suett maye not be dis
searved, but that the heartes, and itt be all one in colour, then take itt out, and putt itt into a
cleane bason, add thereto a pottle, of sweet oyle of olive, and worke the oyle with y^e hands, in
to the heartes, untill itt be all of a like softnes, then putt itt into an earthen pott, and cover
itt close, and soe lett itt stand 8 dayes, then seeth itt in a faire pott of brass, with a soft fire
you shall perceave when itt is sodden enough, by this, take a spoonfull or two there of, and putt
into a new cloth, and wringe the juice into a Jarret, and if the liquor dooke browne, itt is not
sufficiently sodden, but when itt is enough itt will be a cleare ointment, and when itt is ~
sodden, putt itt into an earthen pott, for such will keepe itt best, and when you use this oint
ment, after the place greued, is well chafed with the ointment, daye a warme cloth on the
same, and soe continue to doe, and change not the cloth, that you first laye on, for any other, ~

A weary good ointment for any Ache, or bruise, or for any noyse in the head, and to drawe out a thorne ~ ~ ~ ~ ~

Take a little rosin, additt redde beares suet, and a little Camphire, put this to a little white
wine, and lett them boyle on a soft fire, a while, after itt is all mowen, then straine itt into white
wine, and beate itt till itt come to an ointment, which you may keepe in gally potts for y^e use
and when you dress any bruise or Ache, chafe itt in well before the fire ~ ~ ~ ~ ~

[Faint, illegible handwriting throughout the page, likely bleed-through from the reverse side.]

[Faint handwriting at the bottom of the page, possibly a signature or date.]

A speciall ointment good for any Setter, ringwormes or other sore that blisteth or Watereth, &c.

Take of the hearte called feltergrasse, other wise Scabwort, and of rusty bacon, of each a like quantity, gather the feltergrasse drye, and wash it not, but pick the earth and dust cleane from it, shred it and the bacon small together, and frye them in a frying pan, till it be somewhat drye, then wringe it through some thin cloth, into some earthen or other fit vessel, and as it cooleth, put to the same of the best hart, you can gett, by a little and a little stirring and mixing it well together, soe much as will bringe it to an ointment's thicknes; which you maye keepe for y^e use, and there withall anointe the place greued, as oft as you see occasion, and when the skin groweth harde or roughly, wash it with the liquor, or oyle of tryed rusty bacon, and plantain water, and it will supple, moisten, and take awaye such a Surge.

A good ointment for Aches in the bones

Take Aqua uite, and Sallet oyle that is old, a little parmacety, and the youngest of topps of rosemary, which must be chopped very small, boyle these foure together, and when they are sufficiently boyled, lett it run being hot, through a strainer, and keepe it for y^e use, in an earthen pott, and when you feele any paine, lett the place be well chaged, with the ointment before the fire, and keepe it warme.

An other ointment for an Ache in the bones

Take the oyle of bulls feet well clarified, and soe many sponges of aqua uite, as you have of the oyle, then take an handfull of camomill, faine washed, and dryed, stampe or choppe it very small, and put it into the oyle, and Aqua uite, as above the gale of the bull, with the skin and all, making only an hole in the skin, that the gale maye issue out, and soe lett it seeth together, untill you cannot discearne the Aqua uite, nor the gale, then straine it, and put it in a pott or box, and keepe it for y^e use.

An ointment for the Spleene

Take greene Ashe, and burne it to Ashes, and make stronge lye, and when it is cleare take a gallon of the water, and put to it one of gillies grease, and boyle it together, till one quarter of it be wasted, then powre it into a faire platter, and when it is coole, tak of the gillies grease from the lye, and put to it a good handfull of mellist bruised, and boyle it a while or two when straine it through a thin peece of canvas, and strit it untill it be cold, and there with a noynte y^e lye, as you see cause, if you cannot gett mellist, the lye and the gillies grease will searue

A very good ointment called, oyle of Exeter

Take in the month of may, 1 lb of the flowers of consillides, and steepe them in oyle of olive, as much in quantity as maye easily be layd in, then take callamint, hearte of hysage turnemint, soft wood, worme wood, pennyroyall, lavender, pellyory of spaine, perryory, rosemary, camomill, heryke, leaves of danny, flowers of lillys, of eyther an handfull, gathered in the month of June, grinde them in a mortar, as it were for Jance, then take the flowers above saide, and wring them out of the oyle, with cleane hands, put them in a mortar, with the other heartes, and grinde them to geather, that soe put them into soe much white wine as they maye easilie be steeped in, and lett it lye there 24 houers in a vessel, close stopped in then take the heartes with the wine, and the oyle of olive, that the flowers was steeped in and lett boyle on a soft fire, together, till the wine and the water of the heartes, be runned awaye, which you maye thus know, take a spoonfull of the liquor that is in the pans

The Juice of Asies in the Summer time you must make it of the flowers, and leaves, in the winter of the rotes, the party greued must snuffe some of it, into the contrary nostrill, with a quill two or three times at a time, if you find ease not the first, the party is to use some after it.

You use it mingled with red rose water, because it should not be to taste for the eye.
 Greens Italian flowers, to be used with this water, good for impostumation.
 Greene wounds, old sores, it mitigates paines, Aches, applied like a seare cloth.
 it takes away pimples in the face, it cures fellons, and those that are galled by
 riding, it cures cornes if you pare them after the full of the moone, as neare as
 you can see that they bleed not, then laye on this, and lett it drye on four dayes
 then take it off, and take of the corne, any hardnes, that ariseth, 5 or 6. of these
 Glaisters, will bring the corne out by the roote, and take awaye all paine
 if you cutt till you chance to geth blood, you must change the plaisters every 12 hou
 take two ounces of oyle of olive, four ounces of yellow wax, of litrige of gold and silver
 of each of these four ounces agree, of muth four drams, of Venice turpentine four ounces
 first put into a pot next, that you meane to boyle it in, two partes of three of the oyle, with all
 the wax sliced, when the wax is melted, put in the mettles, one after another, allwayes stirring
 of them all the while, on a moderate fire, the pot next standing on a trawell, when it is boyled to
 a brownish color, then put in the muth, and the other three partes of the oyle, and lett them
 boyle together, still stirring them, till it come to a browne color, then take it off the fire, and
 put in the Venice turpentine, stirring it well to gether, then pour it oute suddenly into a
 bucket of faire water, as soone as ever you can hit it kneade it a little, and mold it on a
 board, and make it upp in roles, for use, and keepe it in a bladder.

A Salve to heale Burning or greene Wounds
 Take of St Johns wortte, of selfe heale, in the head hall tis called, Sopworth of gill run
 by ground, of mallones, and of elderleaves, of each of these a good handfull, and mince them
 small, then put them with a pint of salted oyle, into a Skillett, and lett them boyle together
 untill it looke very greene, when it is almost boyled putt into it one Spoonfull of Turpentine
 and two ounces of Bees wax, when that is dissolved, straine it into a pot you meane to keepe it
 in.

For the Plague, Small pox, measels, Swifths, or any hott Disease
 Take three pintes of Malmsiey, or the best sack you can gett, boyle in it of Sage, and
 rue, each a handfull, till a pinte be consumed, straine it lett it on the fire againe, putt
 there to, a quarter of an ounce of ginger, as much of long pepper, and halfe an ounce of
 nutmegs, beaten well to gether, then lett it boyle a little, then putt to it of the Stridate
 an ounce, of treacle two drams, hott Angellica water which is best, a quarter of a pinte,
 take this allwayes warme, morning, and evening as Spoonfull or two att a time, if you be
 diseased sweate after it, if not once a daye is sufficient, if the party be very weake boyle
 in this three drams of Leake gold, boyle the drink if possible, on a charcole fire, as for the
 the plague it tends it forth, for the Small pox, and measels, it strikes it from the heart, it
 will keepe above a yeare, yonge, or old maye take it, without harme, a Spoonfull att a time, is ned

The Cordiall
 Take anniseeds, carminage seeds, fennell seeds, baye berrie, Juniper berrie of each 4.
 ounces, ellicompane, Angellie rootes, exstallachange, of each 6 ounces, boyle all these in
 one quart of treacle, after the rootes and seeds, are powdered lett it boyle againe, for
 the space of halfe an houre, then take it off the fire, putt in halfe a pound of browne su
 ger candy, dissolved in halfe a pinte of the best brandy, burnt, soe putt it over the fire
 for the space of a quarter of an houre, keeping it continually stirring, keepe it close
 Stop, when you have taken it off, This will make two quartes, it will stand you in 3. 6

Gaskins Powder, good against Agues, Fox, or Measles

Take of Pearle, redd correll, white amber, oculis caniser, harts horne, of each one ounce being ready beaten, and seared, and the weight of all these, of the blackest, clearest, of king crabs being beaten, and seared, make all these into a past with the gelly of harts horne, then make it in little cakes, or small bauls, lett them drye and drye, the dose is either, 8. 10. or 12 graines, according to the age of the party, they must sweate, after the taking of it gently.

For the Brith in a Treaver

Take halfe a pint of redd rose water, and halfe a pint of Speere mint water, use all night one dram of rose water, in the water, on embers, halfe a pound of damaske prunes, boyle them very tender, then take them upp, and stene them, and beate them to pommis, halfe a pound of warrants, wash them and drye them in a cloth, and pound in a mortar, halfe a pound of figgs, sliced, one pint of cleare wine, put all this together, in the aforesaid water, boyle itt in a newe supkin, and lett itt boyle the space of halfe an houre, then take itt bak, and lett itt stand, an houre, and halfe simmering, then straine itt, and putt to itt, two ounces of Syrrupe of damaske roses, and lett the patient take three Spoonfulls morning.

To heale a wound in foure dayes

Take SENTRY, and Stamp itt, when itt is greene, and laye itt to the wound, and shall be cured.

To make of Greens powder, and water, excellent to wash greene wounds, and sores, and to keepe them from festring, and excellent for any sore eyes, that proceed from any hot rheume, but for sores that are not good

Take one ounce of camphier, finely beaten, seared, and shake itt lightly, into a little black earthen pott, then take foure ounces of the whitest copiers, finely beaten, and seared, likewise, and shake itt in lightly as before, a topp of the camphier, and lett itt in a deepe chagging dish, or again filled upp of good warme embers, but take care itt be not to hott, and lett the pott in the middle, and lett the embers close to itt, almost to the topp of the pott, and lett itt stand in these pretty hott embers, untill itt be dissolved, into a kind of water, and after itt be dissolved, putt a paper 4 or 5 times duke, on itt, and a Janner on that, with the bottome of the Janner into the pott, and a pound weight in itt, to keepe some that not breath come out, and doe lett itt stand till itt growe to a harde stone, but you must take heede itt doe not smoke, for that doth all the camphier, there fore the embers must be of a temperat heat not soe hott as to make itt smoke, nor soe cold as not to dissolve itt first, and harden itt after, but itt be of a good warme temper, at the beginning, itt will last neare all the daye, lettting the pan or chagging dish, stand in the chimney corner, when itt is through hardened, and turned to a stone, standing in the embers all that daye and the night, and the next daye take itt out, break the pott with a pessel for itt will be soe harde, that you cannot gett itt out, when you have itt out, beate itt in a brass mortar still stirring with a Spoon, as you beate itt, that itt doe not stick together, when itt is as fine as you can make itt, seare itt, then take foure ounces of bolalmoniac, finely beaten, and seared, and mingle papers, close, and keepe all together, in a tin box, close wrapped upp in paper.

To make the Water

Take a quart of faire water, and lett itt on the fire, when itt is ready to boyle, take itt off, and pover itt into a cleane bason, presently putt in one of the papers of the powder, and stir itt now and then till itt be cold, then putt itt in a glass, and stop itt close, with a cork, for soe itt must be kept, now and then shaking of the glass, because the powder will sink to the bottome, but when you use itt lett itt settle and use itt only when itt is cleare, undest itt be when there is pride or dead flesh in a wound, or to stand, a wound bleeding, of a wound, then take some of the red powder, and laye on till itt be stayed or else the cleare, and for sores or wounds itt must be warmed, if they be deepe, stirred in, but for eyes used cold, and allwayes the cleare of the water, when you make itt a quarte for eyes you should then putt one of these papers of powder into an Ale quarte, of See thing water, or Ale when you

So make the yllow Salve, and Greene

Take a pound of butter, unwaist, and unsalted, put it in a pot next, and sett it on the fire, till it be melted, then take three ounces of frankincense, as much of wax, and 5 ounces of rosin, a good peece of beares. fitt, put these into the butter, when melted, put in three pennyworth of oyle of gease, and as it riseth take it off, and stir it for geare of running over, when you thinke it is boyled enough, take it off, and straine as much as you please to have got yollow salve, then putt in two pennyworth of verdigrease, poundd small, lett it boyle a while or two, take it off, and straine it into an earthen pannen, lett it stand till the next daye be gone you coue it, if you will make noe yollow salve but all greene, then putt in a halfe pinte more then you doe, when you make both greene and yollow salve, of verdigrease, to make it stronge of the verdigrease, when it hath risen uppe 10. times it is enough.

So make a Salve to breake any swelling that another will not breake, but trye another, first, when the swelling is drawne to a head, that you see it will breake, then put on this morning, and evening, till it breakes.

Take halfe a pinte of hene milke, of white filly rootes, wash them very cleane, and drye them very well with a cloth, then take as much of the rootes, as you can well hold in y^r hand, put milke and the filly rootes into a pot next, for boyle them together till be almost as thicke as a pull, his, then take it off the fire, and putt into the pot next a spoonefull of honey, a yecok of an egg, and a spoonefull of honey, and a spoonefull of flower, then sett it to the fire, stir it for geare of burning, for doe all the while his boiling, before stir it now and then, for geare of burning too good as soone as it boyleth up take it off, and stir it well to gether, for spread it with a knife on a cloth, and laye it to the swelling as hot as the party can endure it, till the swelling be broken.

A rare medicine against Setters, and Ring wormes
Take blacke Soape, and almost as much ginger, in powder, and mix them well together, then annoynte the neck any tetter or ring worme, every daye the space of three or foure dayes and it will heale it: Probatum est.

So take awaye rednes in the face, an excellent Pomatum
Take the caule of a younge Lamb, and beate it in a stone mortar, but not water it, put it in a cleader pot, that hath a close cover to it, and power, on it as much distilled winegar, as will cover it over, then stop it and bind it fast, for sett it in a hott dung hill 14 dayes then take it forth, and put awaye the winegar, and the other, in a gally pot, in a skillett of water, and for keepe it in a cake, when you use it melt it againe, in a gally pot as before, for beate it uppe with y^r hand till it be coole.

For the face
Take an ounce of virgin wax, as much of parmasety, as much of oyle of beane, Scrape y^e wax or shave it to be as thin as the parmasety, add to it one ounce of oyle of tartar, when the wax parmasety and beane are melted into one body, and halfe a dram of the flower of beniamen, beate all this up to a pomate, it is good for heates, rednes of the face, and to make the face faire and younge.

For the Scarlet Treaver
Take Spring water, and Sugar, dye it a good yellow with Saffron, and take it by a spoonfull at a time, as longe as the bright lasteth, and keeping in a warme bedd for three dayes, for if they take cold, they will strike in againe, and make them ill, though they thinke them selves safe when afeard.

hath boyled a little space, take it off the fire, and lett it run through a thin cloth, and then
dippe y^e cloth into it, and strike them smoth and when they be cold steeke them, to make them more strong
A Water and Salve to heale a Cut

Take three handfulls of Sallemine, as much of Sage, as much of hony suckle leaves with flowers
and all, a quart of hony, hit pound and halfe of roth flome, and one ounce of graines, and seeth
all this to gether in running water from a gallon to a pottle, and then lett all run through a
strainer, into a vessel, and keepe it for y^e use, and for the salve take a quantity of roze in and
a greave quantity of cheeres suit claryed, seeth them both to gether, and sum it well, then
take it from the fire, and sett it by until the heate be abated, and then putt it into a glass of
water and temper it therein, it shalbe not much what salve be layd to the wound, if you neede
it with the afore said water, for the salve both keepe it supple

An agreed good medicine for a Fishula

Cutt a peece of same bras, or overwart, that may be gitt to make a tent, according to the depth or
length and widenes of the sore, then melt a little roze in proportionable, and therein dyppe the same
and make it up in a tent, then take of the young sprygs of y^est growing, after a oake hath bene
felled, and make them as it were into charcoale, which you maye doe by wyppynge it in a paper, and
then layng it in hott embers, beate these coales into fyne powder, seate it and mix, and temper it
with a convenient quantity of hoggs grease, and dyppe the tents slightly through it, and soe applye
it to the sore, as speedily as you maye, be cause otherwise the heate of the body, will make the
tent liquid, and less stiff, and with all once in 7 or 8 dayes you must use a course in this manner
take a pretty quantity of redd mercury, and being in powder, putt to it soe much good aquavite as will
moisten it, well, but not soe much, as the aquavite doe greate, or drive over it, then sett the aqua
vite on fire, and lett it burne as long as it will, when the mercury, is soe burned, it will looke
with a darckish colour, and the force of it will be soome what qualified, then washt it in plantain water
Drye it make it into powder, seate it and drive there of on the tent, for the space of an Inch or
there abouts, according to discretion, and minister it speedily, as before, you maye cover the tent and
sore with a plaister, made of any good salve, for that it not be otherwise, a valuable, then to keepe
in the tent, this medicine, will assuredly heale, where such a tent maye be made, to fill all all the sore

A medicine for a scotch or Cut

Take the yelke of an egg, wheaten flower, and english hony, beate these to gether, then putt them
to the juce of wilde basie leaves, and rootes being washed, and againe well dryed, and applye it to the
sore renewing it every foure and twenty houres

Paracelsus his Plaister, called Implastrum Medicamentum Paracelsi, good for many Distresses, as followeth

Take of these foure gums, that is to saye, galbana, myrrour, of each one ounce, Ammaniacum, be
gium of each hve ounces, sett them be beate very small, and putt them into an earthen pott, seaded
or glassed, putting upon the same very good wine uenegar, and lett them soe remaine hve or six
houres, then boyle them in the same uenegar, on a gentle fire of coales, that the gums maye melt
and when they be thoroughly melted, pour the same out hot through a bagg, and wring or press well the
same that they maye be well cleaved, from the dreggs, which dreggs must be cast awaye, then the said
liquor soe strained out, must boyle in a pott, until the uenegar be all dreggs, evaporated, and
in the boylng you must continually stir it, without ceasing, least the gums be burned, keepe
this very cleane and close covered, that nothing fall into it, then take oyle of life hve poundes, new
wax halfe a pound, and sett them be putt in a earthen pott, well seaded or glassed, with a one as is
of sufficient bignes, sett the same over a fire of coales, and lett them melt softly, and by leasure, and
at length putt into it, Ammaniac, beate into very fyne powder around an halfe, stirring it continu
ally, with a stick, or Spadula, or Dutch like, until all thus be well and thoroughly mixed to gether
and the matter be of a hony coler, then take off the afore said gums that was first boyled
the quantity of a nut, and putt it into the same matter, and soe by little and little putt into it, with
a like quantity, of the said gums, till all the said gums be soe putt in, and be well mixed
and melted

For any Bruse.

Take consilide flowers, and leaves, and red nettle tops, as much as you think convenient, and straine them small, then mingle them with maye butter, and lett it stand for three or foure dayes, then sett it on the fire, and lett it boyle softly, after straine it through a cloth and keepe it for y^e use.

For the fallinge of the Mother

Take one good handfull of romegrass flowers, or seedes, as much of cyprusse nuts, and boyle them in three pintes of faire water, untill it be but aquarte, and being very warme wet a cloke of white wote in it and bath the place, two or three times, or more in a daye.

A Sovereigne Salve for any Sitch

Take rootwode, and red rose leaves, dried camomill flowers, and hartshorne, of each an handfull, boyle, these with halfe an ounce of cloves, brused in halfe a pinte of sack, and a quarter of apunte of salted oyle, and lett them boyle to the consuming of the wine.

For a Swellinge in the Leggs

Take a good quantity of white masse of an oake, boyle it till it be tender, then squeeze here to two Spoonfulls of fresh grease, and applye it to the place very warme.

For a Sheige or a Fellon

Take of ren a good handfull, and more, boyle it in as much water as will make it soft, or tender or then thicken it with oate meale, crums of bread, when it is boyled take it off the fire, and putt

Another medecine for the same

Aole houndstonge in a paper, and roste it in the embers, as it weare a roote, and applye to the fellon from what warme, renew this once in 12 or 24 houres, and it will either aswage or breake it after it is broken you maye dress it with any ordinary salve.

An approved good medecine to alter, and drive away an Ague

Take of reach Allom the quantity of a wallnut, as much of bay salt, beat them small and mingle them together then take of the inner green bark, the outside scraped away of a wallnut tree, for much as the Allome and salt together, soape it thin and small and mix all well together, and applye it to both the wrists, two houres before the fitt cometh.

A sufficient medecine for a Fellon

Take an egg, and putt out all the white, the yellon only remaining, in the shell, then take the young leaves of mallows, and mace them very small, and putt them to the egg with the crums of leavened bread, and make it thick, and laye on the fellon, and a plantain leafe upon it, and it will both ripen it, and drawe out the core, and when that is done take another egg and putt out the white and putt to the yelke a little honey and thicken it with fine flower, and applye it as a salve, and it will skin it, this hath bene approved, and it is good for it, and will in like manner cure and if it be applied to a white lorne or a boyle.

A Very good Searecloth, for all manner of heate, for any burning or scalding, or to aswage the heate aboute, any sore

Take of beares tuit, of maye butter, capons grease, of oyle of roses, honey, wax, Allom, and red rose water, of all these a pretty quantity, according to discretion, add to all these a quantity of the Juice of horelick, then sett them on the fire, and lett them boyle to gearther, a quarter of an houre or better, then straine it, through a cleane cloth, and after drye y^e clothes in it, and smooth them well with y^e hands against the fire, and when it is cold, soke them up, and keepe it well for y^e use, one Searecloth, will seare foure dayes, if you wipe it cleane, every dressing, and laye the other side to the sore, or place greued.

A Spectiall good Searecloth double to skin and Heale

Take halfe a pound of beare tuit, as much of maye butter, and a quarter of a pound of wax, when this are well moulten, putt to it halfe a pound of Lapis calaminaris, beaten and seared, when it

A Salve for the Gout, or any other Ache

Take three pintes of the best white wine, that can be gotten, and set it on the fire in a skillett, then take halfe a pound of rosin, finely beaten, and seared, two ounces of yallow wax, two ounces of beares suet, and put all into the wine on the fire, and when they be all melted, then put in one ounce of olibanum, finely seared, one ounce of masticke finely seared, two drams of camphere. two ounces of Venice turpentine, and set all these boyle some three or foure houres stirring with a stick, then take it off the fire, and stir it some fittle while, then set it stand till it be colde, and all the salve will gather to the bottome, then take the purest allett oyle you can gett, and rubb all y^e handes over, and take some of the salve, and beate it upp be hewe y^e handes, till you have beaten out all the wine, then set there be some cleane papers rubbed over with oyle, and soe worke y^e salve into soles, and after that sorte use all the rest, it must be spreade upon hum white leather and when it is spread, you must prick it full of holes with a bridle, and soe applye it to the place where any ache is, the salve must be kept allwayes in oyled papers, and soe you maye keepe it along time.

Anagrued good Water for any new or old Sore

Take a quart of strong Ale, or for want there off take beere, and set it on the fire, and scum it and put in as much Allome, as a crab, and three or foure spoonefulls of honey, and set it boyle to gather a good while, then scum it and put in a quart of a pound of madder and breake the clott, and stir it well still, till it be boyled to a dryng, soe straine it, and putt it into a stone pott, or bottle, and when it is colde, stopp it close, warme a little here of in a Jarner, as you use it.

The making of Treacle

Take an ounce of Frankensence, two ounces of beares suet, foure ounces of wax, 8 ounces of rosin, melt y^e suet wax, and rosin, to gather upon the fire, and when it is well melted beate y^e Frankensence, and putt to it, and set all melt to gather, then pourer it out when the heate is adittle past, putt it into a boile of faire water, keeping the scum back with a winge, and pourer it softly, that if there be any dross, in the bottome, it maye staye behind, then worth it well in the water one houre at the least, and soe make it upp in soles, and for any sore spreade it on a cloth, and if there be occasion to rent a sore, make tents of the treacle, soe spread dipping them in the water afore written, and laye a playster of treacle, over the tent, and if it be a deepe sore, the water afore written, and laye a playster of treacle, over the tent, and if it be a deepe sore, wash it with the same water, and dip a lint and putt it into the sore, and laye a playster of the treacle upon it, prickd full of holes, every other daye will be sufficient to dress it.

A medicine for the ditch

Take butter unsalted out of the churche, and a good handfull of sage leaves, cut very small, frye this to gather, then straine it into a pott, and when it is very colde, putt there to brimstone, beaten small, and temper them well to gather, and there with all annoynte the place.

Another medicine for a ditch

Take a pint of white wine, and three spoonefulls of the powder of bayberies, one spoonefull of the powder of ginger, set this boyle in a earthen pipkin for a quarter of an houre, with a stoppe, then putt in two spoonefulls of brimstone finely beaten, and a little peece of sweet butter, then set it boyle againe a little softly, and soe take it off, and annoynte with it warme.

For any Swelling

Take a good many of mallons, and boyle them in faire water, when they are tender, wring the water out of them, and putt there to a quantity of creame if it be a pinte, add the yolke of three eggs, if halfe a pinte two yolkes will serve, then putt there to sum crums of white breade and stir all well to gather, and applye it like a plaste to the place swollen.

A medicine for an old Sore

Take of plantin, woodbine leaves, and ground say, of each one handfull, putt them picked cleane into a pottle of white wine, and set it teeth till halfe be consumed, then putt in a little white pepper, and warme it and wash the sore.

Handwritten text at the top of the page, possibly a title or header.

To cleanse and heale all manner of greene Wounds

Take venice Turpentine, wash it well with redd rose water, and when the water is cleane taken away, put to it the yelke of an egg, and a very little Saffron, and the weight of hogman of redd mercury precipitate. Spread this on a plaster, then take well rosum, and oyle of roses, and dyppe it in that, and applye it to the wound, and after daye y other playster on that and soe dress it uppe

A medicine for Guns hott

First if you can by any means gett oute the shot, but whether you can or not dress it in this manner, take a pinte of Venice Turpentine, as much of oyle of dynde, a quarter of an ounce of verdigrease, beaten into fine powder, sett this byle to gather one new line, then straine them and putt it uppe close, use it thus, warme it and dyppe y lint in it and soe applye it to the wounde and besides powder some of it warme into the wounde

An approved medicine for the Syatica

Take two good handfulls of Spanish horriganum, and as much of Damaske roseleaves dryed and three or foure ounces of white tartar, comonly caled rime stone, putt the roseleaves with the horriganum into a greete penter platter, mingle them well to gather, wetting it with stronge malmesey, then throwe the tartar, being first beaten small in a mortar, and made into fine powder upon it, and still with y hand, mingle and stir it all to gather, soe as the powder of the tartar maye hold upon the horriganum, and rose leaves, for otherwise being heavy it will sink downe to the bottom of the platter, and not stick on the stuff, thus thus being well incorporated, togeather you must have two linen bags, of the length of a span, and not soe broad, then bewide the stuff into two partes, and putte either parte into the severall bags, which done you must close and quilt the bags soe as the stuff maye not runn oute, nor to gather, but remayne like a quilt well stiched, then you must have a new earthen pott, with a cover well leaded or glazed, conteyning about three pottles, putt into this pott a gallon of strong malmesey, not sweet and Artificiall, but pure

and right, or for want of such as much strong sack, add thereto a pinte of good aquavite, then covering it close, sett it on a fire of coles, soe that in any case it have not flame, and when youe pott doe begin to seeh, putt y two quilts in to the pott, and sett it seeth to gather, till a quarter of it be consumed, and applye it as followeth, sett the patient keepe before a fire, and with y warm hand stroke the patient, from the upper parte of the huckle bone downeward, rubbing it in the same manner, still downeward, a good space, when it is soe well rubbed drye, then take of the quilt in the pott, as warme as the patient maye suffer it, and with the same rubb it still downe wardes a good while before the fire, that done take forth one of the quilted bags, and wringe the same betwixt two trenchers, as drye as you can, and laye it plaine on the huckle bone as warme as the patient can suffer it, and the halfe a sheet a boare the patient, soe as the bag maye remayne where it was layd, and when that bag becometh to be cold, take it awaye, and laye on the other in the same manner, removing it alsoe when it becometh to be cold, then sett the patient rest him an houre in the bedd warme, and well covered, continue this the space of seven dayes, twice every daye mornings and evenings, it is good to make a good quantity of of the stuff, at the first, for that if you should make more to the bags it will not be soe good as the first, and allwayes in warming of the same take heed that not flame of the fire touch

but upon hott embers and well covered

A speciall approved Water for a Fistula

Gray

First note what matter issueth out, if the matter be white, it is in the flesh, if it be like dy it is in the bone, if red it is in the veine, the party that taketh it in hand must be sure to try it to the bottom, and to mundaye it with needline, and plantaine water mingled togeather, with a little honey, the take a quart of strong Ale, putt thereto a peny worth of Allome, a roke of the garden blue flower belue, washed pick and sliced, of sage, and woodbine leaves a like quantity, as you maye gesse with y hand, and add little selgeheale, putt all to the Ale and lett it seeth softly, upon ashes or embers, halfe an houre, then putt it into a beare pott close stopp'd, when you will use it stir it well and putt soe much as you need into a Jarre, sett it on hott coles, and ever seething, take a linen cloth wash and sooth the sore, that soe it maye heale, putt in a rent, and cover the sore with the same hott linen cloth, dyped in the water and as it healeth shorten the rent

A Medecine good to eate oute Dead flesh out of any wound

Take of white Allome, and laye it on a hott fire shouell, and sett it on the coales, and soe sett it boye soe longe as it doth rise upon bubbles, when it is boyled enough it will stand still upon a heate and soke white then when it is cold take it off the fire shouell, and make it in very small powd.

Ger and soe dress the sore there with.

A Salve to heale any old Sore, and is good for the Spilene

Take a quart of Stronge Strong Ale and boyle it untill it doe come to a thicke Salve, then applye it to the sore, as you would doe other Salve, and for the Syatica put there to great pepper, and spreade it upon leather, and laye it to the place greued, and sett it drye untill it doe fall off.

A Medecine, to bring agreene wound that gapeth to geather, and to cause it make

Take a peece of fresh beefe, of an inch thicke, and boyle it upon a gridiron, and turne it untill it be through hott, then slit it in the midst, some what more then halfe then halfe through, and soe laye it a brade with the inside upon the wounde, and sett it drye 24 houres, and it will bring the wound to geather, and cause matter, then dress it with Salve, as you shall see occasion.

A Water or Drinke to Alter or Drive away a Fleuer or Aque

Take three or foure of the rootes of burres, wash them cleane, and slit them, and cast them into three pintes of good beere, putting into them one handfull of geaherby, and lett them boyle to geather with a quart of a handfull of camomyl, as much of mouseeare, and as much of bugg borne, other heates dry, growing flat to the grounde like a start, wash all the heates well, and lett them soe boyle to geather, untill the one halfe there of be consumed, and then put into it one Spoonfull of greese, pepper, and lett it boyle a litle after, then save it in a pot, covering it close, and keepe it for use, and one hower before the gut cometh, take one large draught there of, as hott as you can drinke it, and cover yf the very newe, and drinke upon it, use this three seaueral times, and it will with the heale of god drive away yf Aque from you.

A Medecine for the Syatica

Put to a pound of wax, the Juice of Martorin, red Sage of each six Spoonfulls, of the Juice of onions two Spoonfulls, of Frankensense, nutmegs, cloves, mace, and Anniseeds of each a penyworth and applye it upon leather.

A Medecine for a Straine or Bruise

Take of the softest new cowe bounge, putt thereto new penyworth of fresh butter, halfe a pinte of milke, goure ounces of oyle of roses, or Sallet oyle, sett these over a soft fire a good while and stir them well, there will be about the sides an oyle where with, first annoynte the place greued, then applye a plaster of the other very hott.

A Medecine for a Burning or Scalding

Take a good quantity of greene drye, stampe it well then sett it boyle in a sufficient quantity of beeres, sett over a soft fire, untill it doke black, then straine it and keepe it in a cake as long as you will, and when you will use it, melt a litle in a Jarret, and with a feather annoynte it.

A Medecine for a Wound in the Heade

Take a quantity of Aquavite, and putt into it Sugar, and there withall, throngly wash the wound and stopp it up with Linthe dypped therein, dress it thus once in twenty foure houres.

.....
.....

.....
.....

.....
.....

.....
.....

.....
.....

Continually, then put thereto some many of the cumms of a leavened breade, as will make it
of a sufficient thickness, for a plaster, then spreade it som what thick upon a cloth, and doe
laye it upon the place, not hotter then you can well suffer it and doe sett it by 24 hours
dress it thus as often as you shall see cause, and when it doth looke very red, and is soft with
all in some one place, then take a shell snail and stamp it, and spreade it thick upon a cloth
and laye it where the soft place is, then cover it over with y^e plaster as before, and in 24 hours
it will breake it, then rent it and dress it with salve untill it be well.

A medicine for a Fellon.

Take halfe a handfull of ground sill, halfe a handfull of bayesalt, and a spoonfull of soft stam
pe, all this togeather very small, put thereto the yeste of a new layde egg, and the like quan
tity of barrellled soap, stir all this well togeather, and temper it with soe much cleave as
will cleave to make it like a soft salve, then dress the fellon therewith one adage, and it
will ripen breake and heale it.

Another Speciall good Medicine for the Same.

Take of rez in the quantity of a greate hassell nutt, putt it into a oyster shell, and sett it upon
the embers untill it doe boyle, then take a new layde egg, and put the white cleane oute of it, and stir
the yeste well togeather in the shell, then pover it into y^e rezin, as it doth boyle by a little
at a time, and as you doe putt it in, stir with a knife untill it doe cluttre aboute y^e knife, then
laye it with speede upon a cloth, and soe clapp it on the fellon, as it cometh boylung from
the fire, for unless it be layde on soe hott it will not cleave to it, and then you must dress it a
gaine, for it will not be good, unless it doe cleave, sett it by 24 hours, and then dress it a
gaine, twice dressing will breake it, and then dress it with some good drawing salve till it be
whole.

A Water good to wash any Festered Sore or Cankar.

Take of woodbine leaves, of houselick, and of sage, of each of these, three great handfulls
and boyle them all togeather in running water, untill the water be very strong of the herbs,
and doe looke, very yellow, then straine it and boyle it againe, and when it is cleane scum
med, putt to every quart of water, a pound of rock Allome, and of white coppersse three ounces,
and doe lett it boyle untill the Allome and coppersse be moulde, then scum it cleane, and to e
very quart of the water, putt a pint of honey, and lett it boyle on a very soft fire, the space
of an hour, and as it doth boyle scum it cleane, then take it off the fire, and when it is coole
putt it into a vessell, that hath a tapp, and when you have occasion, house it, draine it out in
a jarret, and warme it before you doe wash the sore therewith, and when you have washed
it, then dress it with Linke and Salve as you see occasion.

Another Water for the Same Purpose.

Take of egremony, of Plantain, and of hyar-leaves, of ren, and of hong suckle leaves, of each of
these, three good handfulls, boyle all these togeather in running water, untill the water be very
strong of the herbs, and doe looke very yellow, then straine it and putt to every quart
of water a pint of honey, a quarter of a pound of rock Allome, and three ounces of greene
coppersse, then boyle the water untill, one halfe pint, be consumed, upon a very soft fire, and
scum it cleane, when it is coole, putt it into a close vessell, that hath a tapp, and doe draine it
oute into a jarret as you have occasion, to use it, warming it, and then wash the sore therewith
with a linnen cloth, but if it be for a very old sore, then boyle y^e herbes, in the water of a
tansit instead of the running water.

A Water for a Sore that Bleedeth.

Take a quart of running water, and when it doth boyle putt thereto, two ounces of rock Allome, as
much of white coppersse, and four ounces of the powder of bolearmoniac, being finely beaten
and lett it boyle untill these things, be cleane dissolved, then scum it cleane and putt thereto
halfe a pint of honey, and doe lett it boyle with a soft fire, untill halfe a pint be consumed, and
as it boyleth scum it cleane, then take it off the fire, and when it is coole putt it up in a vessell
with a tapp, and use it as the other waters, this water, being thus kept, and used will continue good
all the yeare.

A Salve to cure, every old sore, and to take out broken bones
Take three handfulls of sage, the like quantity of rue, choppe them small, then take three
small slices of yelow rustie bacon, the slices, soe long, as a mans hand, spread the bacon
very small by it selfe, and dried, the heartes gillbe by themselves, then putt them to
gearther, and stampe them till it come to a very fine Salve, then putt to it the yecokes of
four new layd eggs, and aboute four Spoonfulls of wheate flower, and soe much honey
as maye make it some what thicke, and stir it well to gearther, and putt it up in unglased
to keepe for y^e use, and when you will use it, take soe much linte drowne, and not straped
and make there of plasters, to cover the sore, and spreade it and applye it as before, untill
ting it once in 24 hores, the best time to make this is in the month of maye for all the
yeare . . .

A Drawing and healing Salve for any sore . . .
Take halfe a pound of wax, as much of shepes fallon, finely tryed, soe much of rosin, melt all
these to gearther, in a webell, and when they are moulten, putt into them, of hoggs grease or
clarified butter, with out salt, the quantity of a greete apple, then take it from the fire, and
putt there to two ounces of common turpentine, then straine it into a webell with cold water, and
make it into a cake, and soe keepe it for y^e use, if the sore be very old, putt into this Salve soe much
pith as a great wall wud . . .

Elder Balsam

Take 3 Gallons of Elder Berry Juice (Prepared as for Jelly)
Boyle it to a quart in this manner. Stir a quart on the fire till
when half a pint is boyle away put to it a quart of a yild more
it to kill the whole & destroye to a quart.

Syrup of Strawberrie

Leart 2 lb. of fine Sugar a lay of Sugar a lay of straw-
berrie into an earthen pot, it shall be in the Sugar must
be at on the top & Bottom. Let it stand 24 hours, then stir
it twice a day for 5 or 6 days together. Then run it through
a fine Sifted of Tawn, but do not squeeze it. Let it liquor
stand 2 days. Then take off y steam, & put y Syrup into glass bottles
not to be close stopp'd.

Syrup of Currans

Take a large quantity of Currans, & dry them from the stalks, & to the
back of a spoon or dale make in. Then let the clear run through
a sieve, put it into a stone Jug, cover it w paper; let it in a Cleare for
2 days, and it will be thick en y for like a Jelly; Take y off & let y rest
Such here a Jelly: Boyle to every quart of this clear Juice put a pound
of Double Refine Sugar, but for ordinary use single will serve when
this mede let it boyl a quart or of an hour, turn it & when it is
to bottel it.

next day Lett it Just boyle to skimm it, and doe putt it upp when it is cold, you maye
 keepe the flowers for sallets, if you putt in som white wine vinegar to them, while they are
 warme, but then you must not straine them to hard, you must cover the pucker close when you
 putt them to steeve, in the Kettle of water, this is a good waye to make Sympne of roses.

Take blewre single Violets, pick them right the feedes cleane out, pound them small in a stone
 mortar, take half pound of good Rasse sugar beaten fine, putt doe much water to it as will
 wet it, then boyle it to a thick Sympne, then putt in more violets, straine all well together
 till it is well mingled, it must not boyle, then straine it through a strainer, this is for y^e best
 Sympne, you maye putt in some water and some more sugar to y^e strained Violets, and boyle
 that and it will be good Sympne, enough to spend suddently and for glister, there must be a
 pound of pickt Violets, to two pound of sugar.

To make Sympne of Violets

Take a pound of sugar, and three quarters of a pinte of water, and boyle it to a Sympne as thick
 as you would have it, then take as many Violets, as you thinke will coker it well, then bruse
 the Violets and putt to the Sympne, as forme as it comes from the fire, then straine it but doe not
 boyle the Violets at all.

Sympne of Damask Roses

Take a pottle of Damask roses water, and sett it over the fire in a cleane earthen pipkin
 and putt the pipkin into a pott of water, putt into the rose water a bushell of Damask roses, cleane
 pickt and steared, but not the whites cut off, putt in a little peece of fine sugar, lett them stand
 till there coultor be gon in boyling on a soft fire, as forme as the coultor is gon take them out
 and putt in fresh, doe straining them still, till the liquor growe higher or coultored, then the roses
 still taking them forth, and straining them with y^e hands, or with a press, when the liquor hath
 the full coultor of the roses, straine it cleane from them, then take to every pinte of liquor a
 pound of sugar, and boyle it to a good thight, it will keepe hot or three yeare.

Sympne of Jellie of Quinces

Take, six pound of sugar, and dissolve it in four pintes of pure water,
 take of the Jem, and clarify it with whites of eggs, and then take: 8: pound
 of good ripe quinces, pare off, there utter skin, and take out there coares, and
 feedes, and divide every one into: 4: partes, and putt them in to the water, and
 sugar, and boyle them till they be very tender, then putt them and the Sympne
 together, into a strainer, made of bolster cloth, and lett the Sympne or liquor
 run through it, and After wards boyle it to the height of a gelly, adding in
 the end of the boyling, 4: ounces of excellent strong white wineegar, and
 doe take it from the fire, and putt it into glasses, or gally potts, and keepe it
 for y^e use: Do ut if you have it with spices, to warme the stomacke, then when
 you take it from the fire, whilst it is yett hott, putt into it these spices, being
 grossely cutt: Viz: ginger: 1: 3: white pepper, cynamon, and nutmegs, of each a
 quarter of an ounce, and doe box it upp, for y^e use. - Do it more.

them, very small, then take rose water and sugar, and boyle it to a very thick Symppe put in then
the same, more it out upon a plate, and lett it stand till it be cold, and then cut it in forme of a
= ges or in what fashion you will, in this manner you maye doe Gilliflowers, or Sage, you must take to
every pound of redde rose leaves, three pound of very good sugar

A Symppe good for any great cold: La Steffeld

Take of redde isilled water of rose hounde, one pinte, and add thereto to make a Symppe three quart
ters of a pound of fine white sugar, candy, beaten very small, mix these well together, and lett them
upon a quick charcoal fire, then take some good english liquorish, of the best tasted, cleane scragged
and sliced and put in, and lett it boyle in the said Symppe, the quantity of one Spoonfull, and when it
seemes as it beare halfe halfe boyled, take three graines of Ambergreese, reasonably well brused
and put into the same Symppe, and lett them boyle together, but lett any stum that ariseth be taken
off before, you must have aware, that it boyle not with hommed height, and when it is come to a little
thickness, being cold it is sufficiently boyled, else it will be all candy and not Symppe, whill it is both
it must be strained, through a fine cleane cloth, before it be put up in any glass

Ox meale good for tough Spleme and for the Wormes

Take a pinte of honey and clarifie it with the whites of eggs, put there to of Winegar, and of faire
water of each halfe a pinte, make it like a Symppe

Well Rosemarum

Take a pinte of honey, and clarifie it as before, add thereto a pinte of the Juice of redde roses
and boyle it on a soft fire

The use of the herbe Heliborus niger

The right Heliborus niger which is to be used for the conservation of mans body, from all cor
ruptions, must be gathered, in may or June, and layd to drye in some chamber or garret out of stum
and in an east ayre, that is before sundown, that stand open to the east, this herbe being thus
thoroughly dried, thus, must be brought into powder, and then mingled with as much powder of fine
sugar as the weight of the powder is, and soe keepe it in a pott or glass as con
searves or kept, of this composition every one daye, in the morning fasting, must be taken halfe a
dramm, from the Age of 50 to the Age of 80: unto the end of life, once in six daye a whole dramm, ro
bustum

To make Symppe of mulberries

Take mulberries and put them in a pott close covered, and put up pott in a Kettle of boyling water
soe lett the mulberries steape till all the goodnes be come out, then poure the Juice into a glass, and name
it, and over against, the sugar, allow for the weight of the glass, and soe boyle it up, and stum it very
cleane, till it be a thick Symppe, and then poure it into a white dish, and when it is cold bottle it for
use, take some of this with planting water, plainly stilled, is very good for a sore Throat, and
when you make the Symppe of mulberries, instead of putting the Symppe to the mulberries, you maye
boyle the sugar to a candy height, first before the liquor of mulberries goe and then neuer lett it
boyle, but stir it, and soe poure forth the Symppe, it will keepe better then Aforesaide

Symppe for an impostume

Boyle two handfulls of Daibes bit rootes and all, in one quart of white wine to a pinte, boyle this
liquor to a Symppe, with a pound of large sugar, one nutmeg cut in quarters, a penny worth of cana
mon in pieces, put into it taken off the fire two Spoonfulls of the best aqua vite, take three
mornings two Spoonfulls fasting, fast two howres after

To make Symppe of Cloue Lilly Flowers

Take the best cleane gilly flowers, cut the whites from them, and in a pound of those a pound
and halfe of sugar, put them in an earthen pott, layng adaine of flowers, and adaine of
sugar, till all is in, then put in a quarter of a pinte of buglas water, or you maye put in as
much sack indred, put the pott in a Kettle of water, lett the water boyle till the strength
of the flowers is well out which will be in four howres, then straine them very hard, and
next

170

Quarter of a handfull of borrag, make a handfull of buglas, a good quantity of eliom
pane, and lett this feell fill wth water come to a pint, then take it off and putt in the quantity
of two sticks of liquorice, scraped and sliced, while the water is hot, and lett it stand all night
close stoped, in the morning drinke seven Spoonfulls, and as much when you goe to bed, and
continue it daye by daye, and night in such manner till you finde ease

The making of Conserve of red roses

Take to one pound of red roseleaves, either buds, or halfe blowne, the whites first well washed
off, and all the seedes finely cleaved out of them, three pound of good Sugar, and make y^e Sy-
roupe in this sorte, take to y^e Sugar faire water only, and make it boyle, but you must make
it at the first very thinn, putting in more water then is usual for preserving other fruites
when the Sugar is roughly moulten, and boyle it upp, on a fire, then beate h^o whites of eggs to-
gether, and p^oure them into y^e penne, and stir it all about, then lett it boyle a pretty while,
till the eggs have gathered to a thick scum, on the top, then take it off the fire and straine
y^e Syroupe, after which lett it boyle till it come to a Syroupe, for which as it will hang like a haire
when it drippeth from y^e Sporne, then lett it coole, and putt y^e rose leaves by some and some into
a stone mortar, and beate them a little, as it weare to make them tender, but in any wise beate
them not to mutch, and still as you have beaten them putt them into y^e Syroupe, it being something
cold, that done putt the p^oure againe to boyle, and when you see the water cometh off the roses
is consumed, and y^e Syroupe, both begun againe, to be something thicke, then fill y^e pott and lett them
be through cold before you close them upp, and when you sett y^e Syroupe and roses to the fire, allwayes stir it

A Syroupe good for a Consumption

Take a quart of the Juice of burrage, and clarifie it wth the white of an egg, then putt to
it a pound and halfe of Sugar, and the weight of two French crownes of basill seede and seeth
it to a thicke Syroupe, and being all most cold, stopp it very close, and keepe it for y^e use, this may
be taken in any hot burning feaver, or at any other time as you finde occasion

A Syroupe very nutritive, and especially Preservative

Take 20 Dates that be sound and good, take out the stones and the white rinds, and cut awaye
the little hard steme, that be at the ends of the Dates, then wash them in Ale, and cut them in little
small peeces, beate them in a mortar, till they be incorporated to gether, like gum wax, and putt
them into a pottle of very good muscadell, break them aunder with a sticke of wood, and still
stir the wine and them to gether, then take of the roses of Alexander, and p^oerley of each
the quantity of two Dates, very cleane washed, cut in small peeces, and bruised in a mortar, as
a Spoonfull of conserve of roses, make a pound of white Sugar candy, a quarter of a pound of
white Sugar, of a common beaten into powder, two Spoonfulls, of gallingall, for beate one Spoonfull
two nutmegs cut in thinn slices, and adden large mace, putt all these into the muscadell, and stir
them well, and lett them stand close covered one houre, then boyle them in a pottle, with a soft fire
very fearefully, and stir it well in boyling, and clarifie it, in taking of the scum, and when agawth
parte is consumed in boyling, take it from the fire, and being but a load warme, putt it to a Sporne
full of the powder of ginger, finely seared, and two or three Spoonfulls of rose water, stir them well
and lett it be strained, and keepe it in a glass close covered, and if you would have it like a conserve
putt to all the afore written, make a pound of Almonds, blanchd and beaten small, in a mortar, two Spoon-
fulls of white cleane picked, and well rubbed, and five or six preserved quinces bruised, boyle this
with all the rest, till they be of that thickness you like off, and stir them well in boyling, straine it
and keepe it in close boxes, or a gally pott close covered, and when you will use it, take the quantity
of two nutmegs of the conserve, or a Spoonfull of the Syroupe at a time in the morning sitting in
y^e bedd make an houre before you arise, you maye also take here off, when you goe to bed, at night
but less in quantity, and you maye use a Spoonfull of the Syroupe, in a little thinn brack, made with
mutton, or rabbit or chicken

The making of Rose Sugar

Take rosebuds, and cleave of all the whites of them, then take faire water and make it boyle, laye
y^e rose leaves in a cullender, and p^oure the water uppon them, then drye them in a cloth, and straine
them

A Sympre of marthe Mallones

Take two gallons of running water, and put into it a handfull of plantain, and as much of pellitory of the wall, and as much of white Saxifrage, of the rootes of Asparagus, take two ounces of greenell rootes, perseyley rootes, and knee holme rootes, the pulles being taken out of each one ounce, of Agaymum of both kindees one ounce, of the lordiall flowers, viz. bugage, buglas and violet flowers one handfull, and two ounces of liquors, and one ounce of Anisseedes, boyle all these, till they be halfe consumed a waye, then ponne it out into a faire bason thorough a strainer, and wringe oute the strength of the rootes, and soe lett it stand till it be settled and an houre or two after, then take the clearest of it, and to every pinte of the liquor, take a pound of sugar, and boyle it to a Sympre, there must be first put in alloe, which pease, brui sed, two ounces, of the four great cold seedes, of the four lesser cold seedes, one ounce, and this you maye keepe a whole yeare, and use of it at your pleasure, the four great seedes are this, Coniumbers, millions, pumpions, and gourd, the four lesser cold seedes, are Lettice, wortlayne, endeeu, and Juicory.

The Conserue of Sympre of Alcaangy Berries

Take of eringus rootes, faire scraped, the pulle being taken out, aboute one pound and halfe and two ounces of asparagus rootes, and a pinte of Saxifrage water, and put them into a faire earthen pott, and stop them close with past, and putt them into a pott of water, and lett it boyle 12 houres, then ponne all out into a cullender, and stamp it as small as you can and rubb it through a strainer, with a quarter of a pound of Alcaangy berries, soe seeth it up with sugar to a conserue.

A Sympre or Conserue good for the Stone

Take Secheley rootes, pulled and picked, and laye them in water, two or three houres, boyle them in Saxifrage water, till they be very tender, then straine it, and take the pulpe, to the quantity of fifty of halfe a pound, with mydd, egplantine berries, cut them and pick out all the stones and hautes and seeth them in Saxifrage water, and straine it and take the pulpe to the quantity of a quarter of a pound, take winter cherries otherwise called alcaangy straine it and take a quarter of a pound of the pulpe, take of room cistrons two ounces, being boyled, to take awaye the bitterness, mince it small, and beate it in a mortar, and soe mixe all these afore said things to geather, and boyle them on a chaffing dish of coales, with a pound of sugar, till it be as thick as a conserue, or as thinn as marmalatt, soe putt it in boxes, and use them fasting twice or thrice a weeke as you finde y^e greige, this is to me made only about All hallon tide.

A Sympre to restore Nature

Take the Juice of Lemmons, borrage water, or the Juice of borrage, three or four Leases of fine gold, or more, according to the quantity of the receipt, cutt very small, putt there in one nutmeggs greese, and sugar candy then lett it boyle in a small silver or earthen vessel, till it growe thick to a Sympre, stir it with a liquorish stick, scrape in six graines of the best Amber greese butt lett not the Amber greese boyle, add to the same Sympre four or five graines of hartts hornes take of this every morning one Spoonfull, and as much at night, and fast some reasonable time after, and it will be very effectull in operation.

A Sympre or water, to brake any Cold, and restore the Lignes, it will be seides, strangely cleare the blood, and keepe the Lignes in good temper.

Take running water and putt there in, all most a handfull of greenell barley, and lett it seeth till the water be red, then change y^e water, and lett it seeth againe, till it be ready to brake, then cast it out, and lett it seeth the third time, till it haue broken, and one quarter of an houre after, then take the water cleane from the barley, being in quantity a quart, when you haue soe parted them asunder, lett the water on the fire againe, putting to it halfe a handfull of en deeu, well washed, a quarter of a handfull of Juicory, halfe a handfull of violet Leases a quarter.

A Syrupe of Damaske Roses, good to purge Cholour

Take one gallon of faire running water, in a pykin with a cover, and put thereto, for much Damaske roses, clipped from the white, as you can thrust into the pot, when the water be heate take it from the fire, and for overing the pot, close it, and stand till the next daye, then wring out the roses, and againe sett the water upon the fire, till it be scalding hott, and putt againe to it doe many like roses, as will drinke up the water, use this in this sorte every daye, untill the water cometh to one pinte, and an halfe, then straine the water into a cleane pykin, and boyle it, putting thereto one pound and halfe of sugar, scumme it and boyle it to a thicke Syrupe then put it into a glass, and keepe it for use, take for a child one spoonefull, for an elder body two or three spoonefulls

A Syrupe of Horehound, good for the Consumption of the Lungs

Take three handfulls of horehound, and a good quantity of mayden haire, and a good roote of one yeares growth, three penceley rootes, and a handfull of pennyroyall, boyle all these in a pottle of running water, but lett it water seeke before you putt in y^e heartes, and then seeke them with a soft glass, untill it be consumed to a pinte and a halfe, then straine it and lett it coole, and of the clearest of it, a pinte being taken, putt thereto, a pound of sugar, then lett it boyle and cleare it of the white of an egg well beaten, with redde rose water, and doe scumme it cleane, and lett it boyle to a Syrupe, right, then putt in two spoonefulls of the Lungs of a fox, being dryed, you must take a little at once of it with aliquantis thicke as you shall need

A Syrupe Cordiall, good for such, as have taken Thought

Take halfe a pinte of the Juice of burage, as much of the Juice of buglas, the like quantity of the Juice of balm, putt all these Juices together, and seeke them in a Stridell, and the greene will rise up, thicke like a pester-curd, then cleare it with the whites of two eggs, well beaten and scumme it cleane, then putt it into a cleane bason, and lett it on a chafing dish of coales putt thereto halfe a pinte of redde rose water, with the weight of foure pence of dryed white flowers, and the like quantity of dryed roemary flowers, with as much of conswilde flowers, being dryed as much alsoe of primrose flowers, and like wise of the clove gilly flowers, well dryed, with the the blades of Jaffron, thus lett it boyle on the coales, untill it be consumed to a good pinte, then straine it through a peece of white cotten, and putt thereto in a pound of white sugar, and scumme it with the white of an egg, beaten with redde rose water, and boyle it to a Syrupe, right, when it is all most boyled, take a graine of muske well mixed with two spoonefulls of rose water, and putt it therin, you must take a spoonefull therof at once

A Syrupe good for the stomake, and to digest a Surfit

Take a quart of clearest wine putt it into a bason, and putt thereto in doe many of the leaves of redde poppy that groweth among wheate, as maye well be steeped therein, then sett it on a chafing dish of coales, and laye two white flat sticks, over the bason, and take a peece of white cotten of a Span long, being an inch brade at the one end, and small at the other, hang this on the side of the bason, for that the broader end, maye hang in the liquor, and the other into a glass, then whelme an other bason on high, upon the sticks, over y^e liquor, and doe lett it distill into y^e glass, by the cloth, untill all the liquor be dryed up, then take the liquor, that is soe distilled, into the glass, and to every pinte therof putt a pound of sugar, and doe boyle it Syrupe right, and when it is soe putt it into a glass for use

A Syrupe to open the Spleen to Comfort the Heart, and to exspect mallowancholly

Take a quart of honey, and putt it into a wide mouth glass, add thereto for many of the flowers of rosemary, as you can moisten therein, by stirring them well together, then sett it in the sun 2 or 3 dayes, and as the honey waseth thin with the heate, of the sun, doe stryke it with the glasse, thus doe for long as there, anye such any moisture to cover y^e flowers, and when y^e honey, being thoroughly melted in the sun in this sorte, will continue no more flowers, then being very well stirred together, sett it in the sun to distill together, the space of foure months, and it will be like a conserve, you must turne y^e glass oftentimes, that all sides maye take the sunne alike, and when you have done keepe it for y^e use, and when it is a quart of a year old, then take thereto here off every morning the quantity of a small nutt, and you shall finde the operation, very effectuell

Take of white poppy seeds, cutt off the ripest, pour oures, bruse it a litle, and put it into a pottle of raine water, for letting it stand 24 houres, then seeth it, till more then the one halfe be consumed, straine it into a cleane vessel, letting it settle, and to every pinte of the clearest of it, put one pound of sugar then boyle it to a sturp, and sturp it cleane and then put it into a glass, and take but one spoonfull at a time ~ ~ ~ ~ ~

A Sympre to wrouke one to sleepe ~ ~ ~ ~ ~

Take of the Juice of oranges, six Spoonfulls, the like quantity of the Juice of Lemmons, as much of the Juice of pomgranets, if you can gett it, put to it as much redde water as all these Juices doe amount to, and likewise, for much faire water, as will equal the aforesaide Juices, and rose water, then measure all to gether, and to every halfe pinte, put a pound of sugar, finely beaten and doe putt all to gether, and boyle it till it come to a Sympre, then putt it into a glass and keepe it for use, and when you will use it, take some borrowage water, or rose water, or faire running water boyled, mingle it with the Sympre, as you will take, for as you maye drinke it ~ ~ ~ ~ ~

A Sympre to coole the stomake, and to Allaye Chollic ~ ~ ~ ~ ~

Take one fennell roote of one yeares grow, and pour pearly rootes of a good bignes, if they be small rootes, take for many as maye equal y^e fennell roote, and doe much of Juicy rootes, and and two great rootes of docks, the yellowest are the best, take the yiths out of them all, and seeth them in a pottle or gallon of water, add thereto one handfull of white leaves, and of young mallons and endive, of each as much as will fill all these seeth, till three parts of the water be consumed, then straine it into a cleane vessel, letting it settle, then take all the clearest of the water, and to every two pintes there of, put one pinte of the best wine vinegar, that you can gett, and one pinte and halfe of honey, then seeth it and sturp it, until it come to a Sympre, putt it into a glass and use it at y^e pleasure, when you will take it, putt to the much Sympre as you doe meane to take, for the Sympre take for every pinte of honey, one pound of sugar ~ ~ ~ ~ ~

In the stomake ~ ~ ~ ~ ~ So make a Sympre of Veniger, good for to coole in a hott feaver or any other hott sickness, and to breake Chollic, and grosse steame

Take a pound of Sympre cleane scraped and brused with a hammer, then with greete pumms or such like things, pluck it asunder like stringes, or throwes into a deepe bason, then putt to it one wine pinte of stop water, for much of redde rose water, the like of hore hound water, the like of pennyroyall water, doe sett them lye in pumms to gether, twenty foure houres, often putting downe the liquor, into the water, and boyle it, upon a chafing dish, of coales, till the water be very strong of the liquor, and consumed almost to one halfe, then straine it into a cleane skillett, and there in boyle it, putting thereto of white sugar candy one pound, and a halfe, or want of sugar candy you maye use barbery sugar, and use at y^e pleasure ~ ~ ~ ~ ~

So make a Sympre, good for the Linges, and Shortnes of Breath ~ ~ ~ ~ ~

Take of Scabious, three good handfulls and halfe, for much of goale goote, the like quantity of Sympre, the like of pennyroyall, boyle all these to gether in a gallon, and halfe of shallice with as oft fire, till the one halfe be consumed, putt into it before you seeth it, two good sticks of liquor, scraped and brused, and three Spoonfulls of aniseeds, likewise brused, then straine it into an earthen pott, for letting it stand all night, take the next daye the clearest of it and to every pinte and halfe, putt one pound of fine sugar, then boyle it againe and sturp it, letting it boyle until it come to a Sympre, thick, that it maye stand upon y^e palle when it is cold, then lett the sick partie take a liquor stick, and pour it at the end, and drinke it in the offoresaide Sympre, and doe suck it as often as he or shee shall please, the oftner the better ~ ~ ~ ~ ~

A Sympre for the Cough of the Linges ~ ~ ~ ~ ~

Take of Scabious, three good handfulls and halfe, for much of goale goote, the like quantity of Sympre, the like of pennyroyall, boyle all these to gether in a gallon, and halfe of shallice with as oft fire, till the one halfe be consumed, putt into it before you seeth it, two good sticks of liquor, scraped and brused, and three Spoonfulls of aniseeds, likewise brused, then straine it into an earthen pott, for letting it stand all night, take the next daye the clearest of it and to every pinte and halfe, putt one pound of fine sugar, then boyle it againe and sturp it, letting it boyle until it come to a Sympre, thick, that it maye stand upon y^e palle when it is cold, then lett the sick partie take a liquor stick, and pour it at the end, and drinke it in the offoresaide Sympre, and doe suck it as often as he or shee shall please, the oftner the better ~ ~ ~ ~ ~

Handwritten text in a cursive script, likely a historical document or manuscript. The text is written on aged, yellowed paper and is mostly illegible due to fading and blurring. The script appears to be from the 17th or 18th century. The text is organized into several paragraphs, with some lines starting with capital letters. The right edge of the page shows the binding of the book.

Take of primrose flowers with the yonge buds and leaves of consilids flowers, and buds of rosemary flowers and buds, and the flowers, and buds of harts ease, otherwise called wall gillyflowers, of each of these, the like quantity, then take as much of balme as of all the other mingle all this to geather, and when they are somewhat dryed still them, and use the water as you would doe other distilled waters, then keepe it for use, and take thereof, when you are felle either lightness in y^e head, or coldness, or any other paine which cometh of cold in y^e head, and as you doe take it hold some of it in y^e mouth, that the sent maye asende into y^e head and you shall find ease

A Water for the Palsiey it is good to quicken memory and to cleare the sight

Of white coppers and reach Alom of each alike quantity, and pound them small, putt them into a new earthen, churk, sett it on the fire, boyle it till it be hard, stirring it continually

The Fistula Water

So a bushell of berries ripe and cleane picked from stalkes, ad leuon 34 of sp^{er} putt in an earthen pot, breake well the berries, sett warme by the fire, worke it 10 dayes, close covered distill in a limbeck, lett them boyle a while before the limbeck sett on

Elder Water

Take a peck of black berries ripe, putt them in a tubb, and bruse them to mass, putt there to a quarter of a pound of unsalted lyme, a quarter of a pound of Alome powdered small, putt all this and wash it well to geather, and couer it, and lett it stand two dayes, and then still it in a cold still, this water, blood warme, washing the wound, drie a daye with a cloth, and lett the cloth lye upon it, hath cured an oulde wound of 7 years being

An excellent Water for an oulde sore

Take to every quart of good brandy as many poppys as you can well steepe, after they haue stood a weeke, straine them out, and putt to each quart of brandy three dozen of reasons of the Sunn stoned, three piggs sliced, two dates quartered, and the whites of them taken out cloves, mace, cyma men, of each a quarter of an ounce, two rais of ginger scraped and sliced angellico seedes, and cardus two drams of each, three spome galls of anmisseeds pickt and rubbed one quarter of a pound of fine sugar, steape all these for the space of 10 dayes, shaking it twice every daye, then straine it through a selly bag, and putt it up into bottles, then putt to it one ounce of Annisseeds comfitts, one ounce of Amber comfitts, one ounce of manna, chrisy

Acordiall, very comfortable for the Stomack, gripes and surffitts

Take three pintes of new milk, one pinte of red wine, the yolkes of 24 egges, beate them all to geather, then lye in halfe apound of dates, very thinn, and the white of 30 egges pick out the crum of a halfe penny longe, sliced thinn, a handfull of rosemary flowers, a handfull of dryed July flowers, 20 old pippens, pared, and sliced, thinn, and steape them all to geather over night, and still them in a cold still next morning, take three spome galls in the morning bloodname inethen it with a spome full of gilly flowers, turne, and soe take at three a clock in the after none, and putt as spome full of it into all bottles, and every draught of drink you drink, if the party be lowe then putt in 20 shell snails it will doe well

A Water for Consumption of the flesh, most excellent

One dram, of the flowers of consilids, of burrige, of red sage, of buglas, of many galls, of elder not drams, of the flowers of rosemary, of cleue July flower four drams, of shue of Sealand one pinte, of the best sack three pintes, of strong Angellico water one pinte, of red rose water, half a pinte, bruse the spices, and putt all these ingredients, askeape with sack, over night to this quantity putt halfe a pound of white sugar candy finely beaten, putt it into the bottles and lett the water drop to it, you maye haue of this three pintes of strong water

To make a Water to keepe the Face Smooth

Take two pennyworth of barley, and put some faire water to it, boyle it in that water a little. Then put that water from it, put in some more faire water, to the barley, and boyle that, doe continue changing the water, and boyling them till the water looke cleare, then take the barley, but worth of bitter Almonds, scrape them and cut them in little peeces, then take the barley, but let the water, come cleare from it, then put the barley and the Almonds in a quart of white wine doe wash y^e face with it a morning.

To make the Surgitt Water of Cadneed

Take a quart of Anniseeds water, and fill it full of cadneed, lett it stand steeping three or foure dayes, then pour it out, as cleare from the cadneed as you can, putt it into a bottle glass, and putt in a quarter of an ounce of cloves, and a quarter of an ounce of nutmeg, and some what more of cinnamon, and halfe a pound of sugar, and lett it stand, and keepe it for use.

A Water to wash the face, and lett it drye in

Take a peck of house shales, shells, and all, stonne, stonne brann, or genall on them one night, to cleane them, wipe every shale and breake the shell, and take them out, pound them, and putt to them, a gallon of beane flower, and a gallon of soft limons scale rotes, brused, still them in a still with a gentle fire, as long as it will droppe, then the water a month or six weekes.

To make the Cordiall Aquamirabilis

Take of cubits, gallingall, mellilot flowers, cloves, and mace, nutmegs, one dram, of cardamoms feede picked cleane two drams, of each flower of lavender of mother time, of white arthangel, one dram, of the flowers of cowslips of burrage, of red sage, of buglas of mary gold of ever hwdrams of the flower of rosmary, of clove gilly flowers Adrams, of the Juice of fallen wine one pint, of the beest sack three pint, of strong Angellio water one pint, of red rose water, halfe a pint, bruse the shies, flowers, steep them in the sack, and Juice one night, the next morning, distill it in a cold still, lett it drop into a bottle, hanging in the bottome white sugar candy, gently beaten, after the rate of a pound to three quartes.

Plague Water

Take egremony, rue, worme wood, Sallendine, Angellico, Scabious, tormentill, Sage, myrrourte, gum perrill, dragon, balme, the herseyen, wood sorrell, cury, burnett, speermint, cordum, cardus bene actus, mary gold flowers, cowslip flowers, pearly flowers, of each halfe a pound, rosmary apound, anniseeds, sweet fennell seeds, coriander seeds, and cardimom, feedes of each two ounces a roote of elicompane, scraped and sliced small, putt these together, and shred them small then steape them in a gallon, and a quart of sack, and as much white wine, three dayes and three nights, in a earthen pott, glassed, and well stopp'd, and after distill them, heare to you maye add, me thridate, foure ounces, of venice treacle, one pound, to infuse with the rest, and then distill it, the first runn keepe by it selfe, for it will be stronger then the rest, this is excellent against the plague, pestilent greauers, Ague, ill stomach, and to keepe any sickness from the heart, you maye still it in a close still, close stopp'd, in the stilling laye next clothes sometimes about the top of the still, and you maye keepe aboute a quart, by it selfe of this pure portion, which will be exceeding hott, and for the rest you maye mingle together, doe not still any more when you find it growe coler, quie & spoonfulls of this water att a time, or thereabouts and when you think it decayes, you maye quicken it with a little of the strongest sort, you must still it gently till it is neare the end, of stilling, then still it off faster.

Plurisie Water

Take brandy, and horse tongue, and make it into a mortar, then stamp properly flowers, into it as much as you can conveniently, and still it in a cold still as you doe roses, reucale not this.

To make a Cordiall Aquamirabilis, my Lady Storons waye

Take of cubits, gallingall, mellilot flowers, cloves, mace, and nutmegs, of each one dram, of cardamoms feedes, picked cleane two drams, of lavender of lavender of mother time, of white arthangel, one

of the Sun stand one pound, brise the seeds, slice y^e rootes, and putt them into two quartes of hants brandy, and lett them infuse, 8 dayes, close stopp'd, then straine y^e liquor off, and add to it one ounce of Venice treacle, the dose is two Spoonfulls att night, and two in the morning

GreenBane Water

Will adimick with nine Leese, or Ale, and good store of bane, draine it off as long as any fire not remains, when you have a stillfull of this water, putt it into a limbeck, the second time with store of bane, a gallon of the third draught, putt y^e rinde of seeds of r. cloves bruis'd 3. maice and nutmeggs 3. lett it drype into a rewer, filled with fresh bane leaves, not washed nor bruis'd when it hath stopp'd you may putt fresh, then lett it stand a weeke then cleare it, adding an ell of sugar, dissolved in a make rose water, warme, you may add Amber greise and muske, or orange or Lemmon pill, stopp it but not to close, for it maye breake y^e glass except with

Surgeit Water

Take three gallons of new Ale, and of gallingall rootes, and mellilott flowers, and cubids and carthmus, and graine, and long pepper, three drams of a sorte, halfe a pound of great figgs, and a pound of raisons of the Sun, of cloves, and maice, and ginger and nutmeggs, halfe an ounce of each of these spices, take a peck of poppy leaves and wype them very drye, and putt into the bruis'd all these things together, and lett it infuse one night, next morning when you draine y^e water, take a quantity of poppy leaves, and wype them very drye, and cut awaye the blackes, and lett y^e water drype to them, then sweeten it with fine sugar, a quarter of an ounce of dates, if you please putt Amber greise and muske, and Leage gold, Frisbatum est

So make Orange Water

Take two dozen of the sweetest oranges of right ciuill, A quartes of maldago sack, then wype the oranges, cut them in halfe, and squeeze the juce out very well, then cut them all to bits and stamp them in a mortar, then putt them in a still with the juce and sack, and lett them stand foure or five dayes, straining one adaye and tye a cloth close aboute it, then past the still, and to eury bottle putt in some white sugar candy

To still Balmie or Minte

Take a stillfull of balmie or minte, and stamp or cut them, and putt to the balmie more than a pint of brandy, putt to the minte not for minte, the first bottle lett by it seige, then still it off, and to the next stillfull of heartes, sprinke it with the last water, adding a little brandy, sweeten it with sugar, and mingle it all together

Cherry Water

Take foure pound of ripe cherries and stone them, take 6 pintes of clearet wine, halfe a handfull of tops of rosemary, six large nutmeggs, a handfull and halfe of balmie, six ounces of cinnamon putt all these into a large still, and lett them stand 24 houres, close stopp'd, distill the water, add to the water, being distilled, halfe a pound of the finest sugar, of muske and Amber greise, 20 graines

Treacle Water

Take of the rootes of Allicompane, gentian, cyperess, turmentill, Angellico of each one ounce, leaves of Lady hails, or cardus, hye ounces, many good flowers hie ounces, litten ryne one ounce, then take a pound of the best Venice treacle, and dissolve in three pintes of whit wine, three pintes of good sack, three pintes of redde rose water, and a quart of cardus water, then infuse all this together all night, in the morning straine it, and soe distill it, in a close stopp'd still, you must have a full pound of treacle besides the weight of the yoke, it will be stilling a daye, and most part of the night, the clear when once in must not get oute, till done, because the water will roast, you must still it to the last, or else you will not have all the strength of the heartes, and rootes, lett it run on fine sugar it will keepe the better, lett the rootes be scraped, and prepared at the Apothecaries - and they must be the full weight afterwards, still it gently att first, and keepe every bottle by it selfe, to wards the last you must still off fast, lest it growe somar, when you find it growe somar leave off, when cold, you maye mingle it to gether, and keepe it close stopp'd, quett for Juyfith or heartes and cold, 7 or 8 Spoonfulls, lett the party sweat after it, tis good for head ake, and to quicken labor, when any thing offends the stomack

or to French prunes to sharpen it, and soe much salt as maye conveniently season it
then slacke y^e pear, and lett it boyle or simmer softly, the space of seven houres, uncovering it -
one in halfe an houre, and stirring it well from the bottome, for feare of setting to, then lett
it runn through a strainer, and when it is cold it will be like a jelly, take awaye the salt
and use a reasonable quantitie like name, in the morning, and one oare before supper, it may
be taken oftner, as the patient's stomacke doth like, there of, it will keepe well 5 or 6 dayes, it
will not be a misse to add, the Fenell, peresley, and dorkewites, conteyned in the former broth
to this broth alsoe, and you shall finde it verye restorative in operation -

A Water, good to be taken, for the recovery of an extream Consumption.

Take a younge cock, or capon of halfe a yeare old, wing the necke off it, pluck it cleane, head
and all, cutt off the combe and bill, shrypp the hose, and cutt off the clewes, brayne it and wipe it
cleane, with a cloth in the bellye, quarter it and all to bruite all the bones, cleave the head -
and cast awaye the braine, laye it in soake for one night in a quart of sack, or in usadell -
which the patient can best like of it, in the morning putt it into a still, adding there unto
a quart of new milke a pound of good raysons, of the sunn, stoned, and make a pound of
warrant, being chopt together, then take three great handfulls of pimpernell, a great
handfull of buglas, as much of borraige, two good handfulls of violets, flowers and leaves
and a great handfull of egremony, chop all these to geather as small as heartes for borraige
and soe putt them into the still mixing them all together, then take two good ounces of
cynamon, being broken in small peeces, and a little bruised, and mingle it with the afore saide
herbes, and soe distill it with a moderate fire, stopping the glass that receives it verye -
close, of this water lett the patient take a Spoonfull, or two, when he is most faint, twice
or thrice a daye, and if the water seeme to strunge for the patient, alleaye it with pimpernell.
water, and a little Sugar, a Spoonfull or two of pimpernell water, alone, taken in any breth is verye
good, to recover any consumption -

A Jelly for the restoring of a Weak, boddy without Annoyance of the Stomacke, or inflammation of the Liver.

Take a well fleshed capon, or cocke not verye fat, lett it be faire steeled, and dressed, lett it
in foure quarters, take out all the entralls and alsoe the little hard kidneys, in the side of the
skinn, and the hinder partes, for making the jelly gillosome, then take a knuckle of leale, pick -
out all the blood, then laye the capon, and weale in water, a good space after which, taking
it out through out all the blood, and water, in a cloth, soe long, as either water or strings of blood
will appere, then putt all the meate cutt in peeces, into a faire earthen pott, with a pottle of good
white wine, and as much water or less as you shall thinke good, lett it on the fire, and lett it
boyle softly, till the meate be all to peeces, then lett the liquor runn through a cloth, not verye
thick, crush not out the meate, but only receive the liquor, into a faire bason, where in lett it
stand till it be cold, then scum off all the fat with a spoone, take the cleare from the cleare
in the bottome, and boyle it with Sugar, as much as will sweeten it, and two nutmeggs sliced, lett
it not boyle past halfe an houre, and then lett it runn through a faire jelly bag, washed wth
whit wine, with a rosemary branch, lett it runn, till it be cleare, and soe keepe it upon paylat
in some cold place, or cellar, and eate there of as you find occasion -

A Broth for a Consumption.

Take of hyena, steyed, two French crowne weight, steepe it in a pottle of water all night, upon hott
embers, in the morning, boyle a pucket, in the belly of which putt of conserved of red roses, three ounces
of scabious, and gold foote, of borraige, of violet flowers, of mayden haire of each halfe a handfull
of raysons, stoned, a figg or two minced, a mace or two, and a little Saffron, soe upp the upper part
and boyle the same, untill the flesh be loose from the bone, lett it stand untill it be cold, then
straine it and drinke every morning, adwaight of it in y^e bedd, and cover y^e feete with clothes -

It a chicken, whole, with all the appendages, except the small quiding, and then lett it boyle a gaine
and sum it cleane, putt into it halfe a dosen leaves of buglas, for much of borrag, and of thyme
halfe a dosen branches of samaras, and as much of hydrache, as you maye take upp, be meaneys
three fingers and giffe the great raisons of the sun, stoned, and a crust of manchett, and for lett
it boyle softly, till it come to the quantitie of a pinte, and season with a little salt, then take upp
the chicken, and the raisons with the hearbes, and stampe them in a mortar, and straine
it with the same broth, and doe putt it upp in a pott, and drinke it in the morning, and at
foore a clocke in the Afternoone, somewhat warme.

~~~~~ A very comfortable Gelly for those that are Weak.

Take two capons, kill them, truss them, and take all there gatt from them, wise the bones, wash
them, and lett them lye all night in water, the next morning putt them in a pott, very well stoned
with two gallons of faire water, and when it beginneth to boyle, lett it be very well stoned, and
all the gatt taken cleare off, lett it boyle very softly, a long time, untill you see it, begin to come
to a stiffe Gelly, and then straine it meate and all through a faire cloth, and lett it where it
maye be cooled, when it is cold, pare off all the gatt on both sides, then putt it into a faire pypkin
or pott, and lett it melt, then putt in as much sugar as will sweeten it, with a little salt, to
season it, take a Spoonfull or two of rose water, with as much winegar, and putt it in with the
sugar, take the whites of six eggs, and beate them very well, and a little before it boyle putt them in
then stir it a little, and when it boyles upp take it off, and putt it in a belly bagg with a dram
-ck of rosmary, in the end there off, and keepe there off for use.

~~~~~ To smore a Capon, leavy Restorative.

Take a good capon, halfe roasted, save all the gray of it, and breake it up as to serve, then
saye it in a pypkin, with the breast downward, and putt all the graye to it, then take a quarte
of clearest wine, and putt thereto, about two Spoonfulls of the weare uter wine of orange
- which is yellowest, with as fine as dust, putt this wine, with the powder of oranges upon a
chaffing dish of coales, and when it both seeth, putt into it for much sugar as maye make it
pleasant, and doe putt all into the capon, and cover the pypkin close, and lett it steem untill it
be very tender, when it is ready to take upp, putt in steyed oranges, with sugar, and upon stey
pott dish it up.

~~~~~ A Very Comfortable broth, for any Weaknes.

Take a good bigg chicken, three quartes of water, and lett it seeth on the fire, keeping it
well stummed, then take one handfull of endewe, halfe a handfull of Jucberry, halfe an handfull
of egremony, as much of mayden haire, one handfull of Scabius a quantity of Liverwort, of
fenell rootes three, of perwely rootes as many, of yellow dock rootes, two and those must be
well washed and steyed, and the pith taken out of them, then take one handfull of prunes
one handfull of raisons of the sun, as many of warrants, and a quantitie of whole mace, every
of these gitts, must be washed very cleane, and then putt with the rest into the pott, lett all
steem together, a good while, and then putt to them the bottom of a manchett, then lett all
seeth together, till the broth begin to change to a reddish colour, and be not in quantitie
past one quart, and for straine, the same and keepe it, untill you have putt in this broth for use
together, it must be taken take warme, once in the morning, and one howe before supper

~~~~~ Another Restorative Broth.

Take to a large legg of veale, chopt in godlett bones and all, two gallons of water, when it
hath boyled a while, and is cleane stummed, putt there to a good platter full of the hearbes
following, cleane washed, and picked, mayden haire, Scabius egremony, Liverwort, endewe
Jucberry, burrage, buglas, stramberie, cinquefoyle, leaves and spinage, after these hearbs
doe putt in have boyled a pretty while putt in halfe a pound of warrants, and some: 82

A Jelly.
For those that are weak. Sent. Bernard

Bring also. Sago, Marshmallows, & Ivory made into a Jelly
Take of this Mixture 2 ounces

The making of China Broth to rectifie the distemper of Parts
Correct malignity of humors, and to restore y^e selfe of substance and strength

Take of chyna wood, thyn pared, and sliced one ounce. Let it steep six or seven hours at least in
three pints of the best spring water, standing on hott embars, in an earthen pott close stopp'd
then putt unto it three or foure of the largest maces, of fennell rootes elect and prepared the-
weight of three shillings, of the best raysons of the sunn stoned, halfe a score, of the topps of mo-
ther thyme, of the leaues of good bettuny, of harts tongue, of fennel root, of mayden haire, of each
halfe a small handfull, of the flowers of marygold, of buglas, of borrag, each as much, and
one branch of rose mary, Lett all these heartes be bounde togeather, and when these haue boyd
ed, till a third parte of the liquor be wasted, then take out the heartes and rootes, and putt into
the liquor, one reasonable, bigg chicken, fleshy and well fedd, peradventure before, till all the skinn
be taken off, and haue boyd a halfe an houre, when the chicken is putt in lett it boyle with the chi-
na. Casually, and close stopp'd, with a stick of cynameon, and 2 graines of gyrose pepper, till
the strength there of be sufficiently in the broth, then take out the chicken, straine the broth
and drinke a good draught here of every morning warme, and another two hours before
supper, for the space of 9. dayes togeather, making still new broth, as need shall require, the
chicken is not unwholesome to be eaten, of such as can like the taste here of.

A Broth to keepe the back, from stynny causes, and from bleeding of the Stone.

Take a knuckle of leale, and a younge cock or pullett, laye them in water to soake out all the blood
an houre or two, and sett them on the fire, in a gallon and halfe of water, and for summe it, then
take two ounces of french barley, and wash it, in a little warme water, and seeth it by it selfe in two
waters, untill the rednes be gone, then lett the water draine from it, and cast the barley into the
broth, where the flesh is, then take an ounce of the foure greates cold seedes, and druse them
grossely in a mortar and putt them into the broth, and there with forty plums of Sebastian, and for
ty raysons of the sunn stoned, then take halfe an ounce of Apparagus rootes, the pith being taken out
and as much of fennel rootes, otherwise called, butchers brome, of persey rootes and fennell
rootes alike quantitie, the pith being taken out, of lettuce and gourdaine, of each, halfe a handfull
of burrage and buglas, leaues and flowers halfe an ounce, you must lett all these seeth togeather
untill the flesh, become from the bones, and the broth like a thinn Jellie, then take the clearest
of it and straine it through a Hyppocras bag or thinn strainer, till it be cleare, and soe putt it
upp into an earthen pott, and it will last foure dayes, when you will use it, you must take 3 or 4
spomefulls of this broth, and putt to it a spomefull and halfe of the sirrup of marshmallows
and the Juice of a Lemon, and lett it on the fire, and heate it and drinke it, when it is blood warme
the foure great cold seedes are these, Lucumers, millions, Compions, Gourdies, the foure Letter seedes are
these Lettue, Gourdaine, endee and Suicory.

A Broth to be taken every Morning, or most Mornings, Fasting
A good draught for the Stone.

Take a potherie hartie first staled, and that water cast away, a little small handfull, the
rootes of Allhea, Straped and the pith taken out, these in number, the root is all soe called the marsh
mallows roote, merwry, or if you cannot haue it, Pellitory of the wall, or for want of both, mallows
or wildet leaues one handfull, boyle all these in common cunduit water, with a chicken, or peece
of a neck of leale, or both, and make here off a broth, without thicking or salt, Take a mejs heart
putt to it Sugar att y^e best liking, and drinke it fasting for y^e break fast, Do^r Johnson.

A Broth for those that are greiued with Malancholicke

Take the knuckles of mutton and choppe them small, and putt them into a pipkin with
three pints of water, and sett them on the fire, and lett them boyle untill fater time as the broth
both smell of the meate, and allwaies as the fume both rise take it off, and then putt into
it

A Candle of Almonds, good for those that have a Weaknes in their Backes

Take a quarter of a pound of Almonds, being blanched, three Dates, grind these very small together with a little Ale, then straine them with halfe a pint of muscadell, and a pint of Ale, and putt here to of grated nutmeg, and a little Sugar, and doe boyle it, and lett the partie eate thereof as much and as often as he will and in time they shall find ease.

A Candle good for those that are troubled, with a grate Dryness

Take a pint of white wine, or of Rhenish wine, and some what more of water, putt them together and straine them with for much of oaten meale, as will make it to looke white, then boyle it the space of halfe an houre, putt thereto, a grated nutmeg, and doe much Sugar as will make it pleasant of halfe an houre, lett the partie eate thereof as much and as often, as he will, and in short time he shall find good here by.

How to make Martres, good to give to those, that be Weak

Take the braine of a cold capon or hen, that hath bene rested, shred it very small all saving the skin, then take a quarter of a pound of Almonds, being blanched, grind them in a mortar very small, with a little sack of the parties, steame be cold, or else with white wine, for much as will make them a little moist, and then noe more, then putt up meate to them, and grind them very small together, putt thereto the yolles of two eggs and three or foure Spoonfulls of redde rose water, and when you have tempered them well to gea ther, drue them through a strainer then sett it upon a chafing dish of coales, and season it with salt, and if the parties steame be cold putt thereto a little cynamome and ginger, and doe much Sugar as will make it pleasant, but if the partie be hot putt only Sugar to it, and doe boyle it until it doe come to be as thick, as Allmond butter, then give the partie there off, this will keepe good three dayes.

Broth to be used, in a Morning of those that are falling into a Consumption

Take a leg of mutton of the best that maye be gotten cutt of all the fat, and wash it very cleane, then putt it into a pott of water, in rich water must be a gallon, sett it on the fire steaming it for long, as you shall see either fat or lumm, rising thereon, this being done putt thereto, foure grate Spoonfulls of french barley, which must be ordered after this manner daye it all night in a quantitie of a quart of faire water, in the morning taking it out wash it three or three in faire water, till it be very cleane, then putt it into a pott of water, and lett it see th by it selfe until such time, as the barley be shorne to the uttermost, the barley being thus used, must be cleane taken out of the water, and putt into the liquor where of the broth is to be made, adding there unto, this heartes and rootes following, take of the rootes of fennell each of them, being not of foure rootes, of scabious, egremony, fittany, straberrine, leaves of wolett leaves, thyme, rosemary, of each of these abundance as bigg as a mans thumb, if they were bound together all, which must be putt into the pott, with a quarter of a pound of raysons, stoned and as much of currants, adosen damask prunes, A or 2 great mace, 10 or 12 corues of pepper, cutt in halfe or quartered one nutmeg cutt in thim peeces, which nutmeg must not be putt in, till the broth be almost bodden, all these must be boyled, with about six, the space of three houres in which time, the state of the meate and heartes, will be boyled out, you maye putt a little salt into it if you thinke good, this being done take out the heartes from the broth, as you maye, and straine the broth, into a faire earthen pott, and reserve it for use, it will last if it be well made two or three dayes, the best taking of it is in the morning, but howevert after y^e rising, and likewise at foure a clock in the afternoon at both which times you must take the quantitie of halfe a pint, as hot as you can suffer it, with out either bread or any other thing in it, if you cannot gett those heartes green you may have them at the Apothecaries dyed, which will stand you in as great steede.

Another waye how to distill a Cocke for those that are in an Hotte Consumption

Take a redde cock of anyeare and halfe oz being plucked, draine, chopped in peeces, all the bones broken and putt him into a penter pot of a pottle, unwashed, with the blood feet head, and all as in the former distillation, and through thereon, halfe a Spoonfull of salt, then putt there to halfe a pinte of french wine or of small claret wine, of borage water halfe a pinte, and as much of buglas water, then take 40 raysons of the sunn, the stones being taken out, two Spoonfulls of currants, three dates and one nutmeg, shred all these together, and putt them into y^e pot, then take of endive, borage and buglas of each of this six leaves, and laye the one halfe of them, under y^e cock in the pot, and the other halfe on high upon y^e cock, and putt there into y^e pot, then take of endive, borage and buglas of each of this six leaves, and laye the Spoonfull of currants, three dates and one nutmeg, shred all these together, and putt them into y^e pot, then take of endive, borage and buglas of each of this six leaves, and laye the one halfe of them, under y^e cock in the pot, and the other halfe on high upon y^e cock, and putt there to one Spoonfull of good wine vinegar, and for much sugar as the topp of y^e thimble, then putt the lower of y^e pot downe, and find it as close as you can, sett it in a Kettle of water, seething upp to the neck, and sett it boyle continually the space of 12 howres, and as the water in the Kettle both wast, fill it upp againe with hot water, then take it off the fire and straine it as in the former distillation, then putt it upp and give there of to the partie warmed, three or foure Spoonfulls at a time, and lett him continue it as you shall see cause, and untill you shall find it very effectuall, you shall have as much liquor when it is strained, as you did putt in y^e pot.

The waye how to distill a Cock good for those that are Weake and fainte, and yett not sick, but many times distempered with heate.

Take a pig of 12 daies old, or thereabouts, being seald, garbed, and washed, and take the foure quarters, and the feet, there of and wash them in a pinte of whit wine, one after another, and lett them soake a little in the wine, then drye them with a drye cloth, and rubb them over with a Spoonfull of salt, then putt them in a penter pot of a pottle, and laye halfe a handfull of sage, under them in the pot, then putt there a pinte of white wine, as much of faire water, an ounce of ynnamom, being broken in small peeces, two Spoonfulls of wine vinegar, and as much of sugar as a good apple, putt all these together, into y^e pot, and laye halfe a handfull of sage on high, upon the topp of all, then stopp upp y^e pot close as in the distillation, going before, and sett it in a Kettle of seething water, upp to the neck, and sett it boyle continually the space of 14 howres, and as the water wast, fill it upp againe with hot water, and when it hath boyled for long, porent it into a strainer, and lett it runn without stirring, untill it be runn drye, then keepe it and give the partie here of warmed: 5. or 6. Spoonfulls at a time, and lett them take it as often as they will, and continue it as long as they list, and they shall find ease thereby.

A water or distillation good for those that are brought Weake, with an aque or such like Sickness.

Take a young cock of a quarter of being plucked, draine and washed, chop him very small, the bones leggs, with the head and all, then putt it into a penter bottle, and sett it with in y^e still, and putt thereto a quart of milke warme from the cowe, six Spoonfulls of redde rose water, and of egremony, labdanus, borage, and red rose leaves, of each of these halfe a handfull, and for distill them, all together, and keepe the water for y^e use, and give the party here of in his broth, candie, or the berrie, 4. or 5. Spoonfulls at a time, and sometimes lett him drinke therof alone with a little sugar, ife this and you shall finde it very nourishing, and a pource good to putt a waye Malancholly.

A Speciall good water, for those that are in a burning feaver.

Take a quart of red wine, and a quart of milke, distill them together, and lett the part he drunk of the water, there of, as much and as often as he will, and it will kill the feate, and bring there boddyes into good temper.

So make a broth for those that be catrined into a consumption, and will
Preserve them from it, if it be taken in time, and continued for long as you feel occasion

Take the sign bone of beefe, from the knee upwards to the next bonynt of the foreleg, choppe the
flesh and bones together, and boyle it in two gallons of water, and when it is cleane summed, let
it stand upon a soft fire, the space of two howeres, then putt there to, the hinder quarter of a old
coney, three or foure knuckle bones of mutton, and a young cock of a quarter old, the bones of them all
being broken, putt this into a cloth, and let it stand in a hower more, then take borage
buglas, endive, egremorie and some trustles, of each of this, an handfull, and of hyeme and pestyke
of each alike, the quantity of halfe a handfull in all, putt all these into a cloth, and let it stand in
a hower more, then take a pound of greate raysons the stones being taken out, halfe a pound of currants
and a quarter of a pound of currants, and eight dates, shred all these together, and putt there
to a few whole mace, putt all these in a cloth, and let it stand in a hower, and an halfe more, then sea
son it with salt and straine it with a strainer, wring it not but lett it run cleare, for long as
there will any moisture come from it, then putt it into such a vessel as you doe meane to keepe
it in, and when you give there of to the partie, take for much of it as you doe meane to give him at
one time, and when it is warme straine it with 20 Atmonds, being ground small, and doe give it to
the partie as warme as he shall like to take it, this will keepe good a while.

So make a good broth for those that are in a consumption, butt espe
cially for those that enter into a consumption, after a hott feaver.

Take a hinder quarter of good large weather mutton, and roast it with a soft fire until it be
more then halfe enough, then take it and prick it with two knives, being upon the spit, and
make hast whilst it is hot, and let the grasse run out into a platter, as much as you can
get of it, then set it upon a chaffin dish of coales, and summe the fat as cleane off as you can,
with a spoone, then season it with salt, and putt there to halfe a pint of green wine, and if you
can have none of that, then putt there to halfe a pint of the smallest claret you can get, and
halfe a pint of red rose water, and a stick of cinnamon of the length of y hand, being broken in
to small peeces, and let it boyle halfe an hower upon the coales, then putt there to one spoonfull
of wine vinegar, and for much sugar as will make it pleasant, then putt it upp all together
unto such a thing as you doe meane to keepe it in, and give there of to the partie to drinke
warmed three times the daye, and 4 or 5 spoonfulls at a time, doe this for long as you shall
find occasion, and it will heale.

A very comfortable receipt for those that have paine in their backes, it
will staye y body, if it be troubled with any kind of flux, or wast of nature.

Take a red cock of a hewe and halfe old, being plucked and drawne, choppe him in peeces and bruse
the bones well, then putt him into a penter pot, of a pottle un washed, with the blood, geete heade and
all, and shred here in halfe a spoonfull of salt, then putt there to a pint of muskadel, halfe a
pinte of red rose water, 6 dates being cutt in peeces, and three or foure maces shoke all these well
together in y pot, you maye putt there to, what godd you please, more or less, butt the more you
doe putt in the more effectually it will worke, then putt there the cover of y pot, and tye a
cloth for close about it, that noe ayre goe either in or out, then set it into a kettie or pot
of seething water, upp to the neck, and for lett it boyle continually the space of 24 howeres, and
as the water wast fill upp the kettie againe, with hott water, and when it hath boyled
thus long, take out y pot, and pour it into a strainer, and lett the liquor run into a vessel
for long as it will run, butt wringe it not, then putt it upp as you will keepe it, and give
the partie there of warmed, three or foure spoonfulls at a time, and continue it as you
shall see cause, and you shall find ease, you shall have as much liquor when it is strain
ed, as you did putt into y pot, this is called the distilling of a cocke.

And soe lett it boyle very deasurably the space of three howres more untill the broth be consumed to
a quart or there aboute, but sturr not up brothe in any wise, for breaking the capon, then season
it with salt, and a little bruised pepper, and having thus done, take it from the fire, and
poure up brothe as cleane as you can from the capon into such a thing as you doe meane to keepe it
and when it is cold it will be like a yellow Jelly, then you maye give it warmed to the party as you
shall see cause, but warme noe more there of at tyme then you doe meane to spend at one tyme, you maye
estreme up capon at y^e pleasure

**To make a broth for those that have a great weakness in there back, which
cometh with an exstremie stonring it will strengthen the body and
staye any kind of sores or flux**

Take a good leg of mutton and being doyned, putt it into a pot with a gallon and halfe of water, and
when it hath boyled and is cleane consumed lett it lymber upon a soft fire, the space of two howres, then
putt thereto an old coney, being chopped in three or foure peeces, and the bones broken all having the
head, and when it hath boyled againe being cleane consumed, then lett it lymber one howre more, putt
thereto three handfulls of bayle mints, or of spearmints, or of white mints, and when you have putt these
thereto, lett it boyle a litle after, stirring, it well together then putt thereto a pint of rye being
boyled, as it weare for potage, an an ounce of cynameon being broken in sticke, then sturr it well together
and soe lett it on the embers, the space of two howres, and sturr it often as it both boyle the last two
howres, then season it with salt, and a litle grese pepper, and soe sturme it through a wullender
into such a vessel as you doe meane to keepe it in, and give it warmed to the party as you shall see
occasion, this broth will keepe good five or six dayes

Another broth for the same Purposes

Take a red cock of a yearre and halfe old, pluck him alive, and beate him with a rod untill the blood
doe appeare, through the skin, then breake his neck and draine him, choppe him in peeces, and soe putt
him unwashed, blood and all into a pykin, with a gallon of water the legs and head being cutt off
and when it both boyle sum it cleane, and lett it lymber upon a very soft fire the space of
an howre an halfe, then putt thereto of egremone, scabius, burrage, buglas, neppe, clary, comfrey
and white archangel, of each of these halfe a handfull, and soe lett it lymber an howre more
then putt thereto a quarter of a pound of warrants, halfe a pound of ruyons of the same, stand
halfe a pound of perwines, and two nutmegs being cutt in small peeces, putt all these into y^e broth, and
soe lett it lymber three howres more untill the broth be consumed to a pint and an halfe, season
it with salt, and sturme it through a wullender, sturme all that remaine in the wullender
very small, and sturme it with the broth, through a strainer, into a bagon, then sett it upon
a chaffing dish of coales, untill it be ready to boyle, stirring it well to gether, give thereto
to the party, where it needfulls at tyme being warmed, this will keepe good a seavght

To make a broth, called gwell good for those that have the greivous spleene
Take foure good peeces of the better end of of a neck of mutton, and boyle it in a pykin with
a reasonable quantity of water, and when it is cleane consumed lett it lymber upon a soft fire
the space of one howre, then putt thereto a peece of a fennell roote, and two perely rootes being pi
ced, and of burrage buglas of each an handfull, as much of pennyroyall, binde all these together
and putt them into y^e broth, and lett it lymber one howre more, then take up y^e heartes and
sturring them ever up broth, then putt into y^e broth doe much of bruised noate meale, that hath
beene steeped in water, an howre before, as will serve to thicken it, withall and lett it lymber
an howre more and when it hath the done season it with salt, and putt thereto a litle bru
sed pepper and a gen cloues and mace, with the mutton Jaffron as will a litle change the
colour of it then sturr it well together and soe putt it up into a vessel and give there
of to the party warmed, and lett him eate there of at his pleasure, and untill he shall finde ease

Drinks - - - Cullises - - - Pills - - -

A Broth for those that are Sick of a hot Fever - - -

Take the Knuckle of veale, and the Knuckle bones of mutton, being chopped, boyle this in a pypkin, in a gallon of water, and after they be cleane stummed, sett them cimber upon a soft gear, the space of an houre, then putt thereto a good gennell roote, and three or foure perversley rootes, being cleane scraped and picked, and of widd leaves, strawberrie leaves, endue, borragge and buglas, of each of this a like quantitie, and of curants a quarter of a pound, the like quantitie of raysons, the stones being taken out, chop all this fruite together, and putt it allsoe into y^e broth, and add thereto the bottom of a manchet, and for lett it cimber upon a very soft gear, the space of two houres, then season it with salt, and putt thereto halfe apint of greenish wine, if you have it, with a little sugar, if not then putt there to three spoonfulls of winegar, being made som what pleasant with sugar, and the powder of an nutmeg, or a little mace or pepper, which the partie best likest, or none of them if he doe like it without then sett it cimber a while after all these be heven in, then take it from the fire, and straine it through a cullender, then take the bones from that which stayeth in the cullender, and stamp all the rest in a mortar together, and straine it with some of the broth, then warme all the rest of the broth upon coales, and blend together, and for putt it up, as you will keepe it, and when it is cold it will be like a belly, in the winter it will keepe a weeke, and in the summer three or foure dayes, and you must allwayes warme it, when you give it to the partie - - -

To make a Cullis for those that be Weake to be taken - - - as oft as there Stomacke will serve - - -

Take the foure knuckle bones of a mutton, being chopped and boyle them in a pypkin with three pints of water, and when it is cleane stummed, sett it boyle easely the space of an houre, and an halfe then putt thereto, a little thyme and perversley, bound in a bunch, not bigger then y^e little finger, then take a chicken and putt perversley in the belly of it with three or foure whole mace, and doe putt it into the broth, with the head, feet, liver, gibberne, and doe lett it boyle a game, untill the chicken be tender, and season it with salt, then take forty Almonds and grind them in a mortar with a little of the broth, untill they be very small, then putt y^e chicken and all y^e herbes thereto, and doe stamp bones and all together, untill the chick be very small, then straine it with all the broth into a pletter, and doe sett it on a chafing dish of coales, to warme, and putt thereto three spoonfulls of redde rose water with a little sugar, and doe give it to the partie, it will continue good but 24 houre - - -

To make a Sharpe broth for those that be Sick of any Disease - - -

Take a chine of mutton, or some other bones, such as be not fatt, choppe them small and boyle them in faire water, and when it is cleane stummed, sett it cimber upon a soft gear the space of an houre, and when it hath for done, putt thereto of perversley, endue, borragge, buglas, and a branch of thyme being all bound in a soft gear, then lett it boyle a game the space of an houre and an halfe and when it hath for done, season it with salt, and putt thereto either gooseberrie, barberrie, grapes as the time of the yeare shall serve, then thrik it with the yolkes of two eggs, being strained with a little verges, or winegar, with a little sugar, putt into y^e broth and strin it well, but lett it not see the after you have putt in such spice, as is most fitt for the sickness, and you maye boyle a chicken therein with the mutton for the partie to eate if you please - - -

To make a broth for those that be Weake with Sickness - - -

Take a good cagon of two yeares old being well sleighed, butt not very fatt, dress him as you would doe to boyle leaving the head and the leggs at the body, then fill the belly full of curants - blended with an ounce of mace, and doe serve up the belly, you must have a pypkin on the fire with a gallon of water and when it hath for done putt in y^e cagon with the breast bonemarrow, and when it is cleane stummed, sett it cimber upon a very soft gear the space of two houres then putt thereto a branch of rosemary, two burrage, being sliced, and a good crust of manchet - - - and for

For a Scartian Age. Do Gristin

Take of Sarsaparilla, one ounce, of Lynque Gole, centaury, mayden haire, St Johns wort, redmay
 of each of them, an handfull, of liquor six drams, of mace the weight of ten pence, of faire run
 ning water three pints, leech all with a soft glasse an hour, straine it and lett the patient drinke
 a good draught thereof, three hours before dinner, and a lesser draught two hours before supper.
Aspetiall good drinke to be taken often in any contagious, or burning fevers.
 Take a pottle of faire water, two handfulls of balsme, as much of radious as much of wood sorrell
 as much of stramberrie leaves, and a pretty quantity of liquorish, scraped, and brused boyle all to
 gether to a quart, straine it and lett the patient drinke often thereof, either cold or warme warme

Take 2 pound of pitik, as much of rofen as much of frankincenfe each finely beaten and feared feauerally, one pound of Jaffron, one ounce of Jaffron, 2 ounces of cloves, as much of mafe, halfe a pound of unmin, and 3 ounces of Jaffron, beaten and deuiced, all this must be gotten the fpace of an houre, the pitik must be putt in firtt alone, after wards the reft and when it is fotten, make it in fonge roalls and keepe it, when you will ufe it take fine, tawed fheeps leather and there of cutt foales to conuer yf teete, and fprind of the aforefaide playfter, upon them and weare them next yf teete, with in yf ftokes the fpace of a month or untill they gall off, and ufe them for long as you fhall find occasion.

For the Gout

Dose of the Beal-Sally, South, St. Martin, Sartan, F. & L. (Take
of each fifteen grains, for a weak body ten grains, Infuse all these
in about a quart of a pint of white wine, strain
it, & take it early in the morning, once a month for 3 months
together, & once in 3 months all the year after.
Not to be taken until it is upon you.

A Medicine against the Plague

Take rorie and worme wood of each an handfull chop or bruse them, then putt them into a quart of winegar, straine the liquor and use it, taking a good Spoonfull or more if you please every morning fasting, this cleaueseth the stomack from all crude humors, apt to inflame or putrefie the blood and resist the infection of the plague

Another ordinary receipt Dr Kinge

Take hie or three handfulls of cyromony, brused and steeped 24. hores in good white winegar take there of iiii. Spoonfulls in a morning fasting this tempereth the blood and portendues from contagion, this from Dr Thomas Barkeley, whoe a firmel, that many shutt upp in houses infected escaped all danger by using this familiar remedye

A Preservative against the Plague

Take a handfull of sage a handfull of rue a handfull of elai. leaves, a handfull of red ramble leaves and a handfull of Angelico, and straine them together, and straine them through a cloth with a quart of ro hit wine, then take a Spoonfull of ginger and mingle them altogether, and drinke there of every morning and evening 2. Spoonfulls for a iiij. dayes together

Doctor Balianus direction against the Plague, much practised in Italy
Take three pintes of malmesey, or muscadine, and boyle therein one handfull of rorie one of sage untill a pinte be wasted, then straine it and sett it over the fire againe, putt into it one pennyworth of long pepper, halfe an ounce of ginger, one quarter of an ounce of nutmegg, of saffron beaten to gearher, sett all these boyle a little, then putt to it one ounce of methurdate, halfe an ounce of treacle a quarter of a pinte of Angellico water, take of this morning and evening, one Spoonfull, Searves both times, equally deuised, keepe this rare secret, as thy life, before any northerly treasure, under god trust to this, it neuer itt deceived any, itt is good against the measles, small pox, spotted feauer, or any disease in like nature.

Keep your stomache hungrye but not empty, eatinge thre adaye short meales, fteape herbe grace
 in all ye drinke and sometime rosmary or balmie, or lost many of worme wood, every morning
 eat either raysons with butter and worme seeds, or a few leaues of heart grace or of sage
 or figgs with the like. Alsoe for a change use figgs or raysons with white saffron perfume
 up house below with tar, pitch and winegar up chamber above with olibanum and storax
 anoynt wth best oyle of shick

the generall to be ordinarily observed in contagious time

Do Gulstone direction for the ordering of Diet in

with the oyle of poppies

measurably after the takinge thereof if the sick person can take noe rest, then anoynt the temples
 fect, then one or twoe in a weeke is sufficient, halfe a spoonfull at a time use sweating in
 there of at a time like warme, if you be conversant with such as be infected, and you not in
 it for use, if you thinke the sick partie be infected, take morning and evening one spoonfull
 in of good methridate one ounce of good triacle 2 ounces of aqua wit a quarter of a pint, and hope
 into powder of these three, but one ounce, let it boyle a while, then take it from the fire, put there
 straine it sett it to the fire againe, and put thereto of long pepper ginger and nutmegg, made
 take 3 pints of malmsiey boyle it in a hattfull of rene as much of sage, untill one pint be consumed

Mr John Rendall of Acton, his receipt for the Plague

you staye casting, then goe to bed and sweate if you can, and be very careful, not to take cold
 and make it blood warme, and drinke it and if you cast, take as much, and doe continue till
 gills of faire water, and 3 spoonfulls of wine winegar, grate the root I made mingle all together
 take the rootes of setruell to the bignes of the top of y^e thombe, a spoonfull of rene triacle, 3 spoon
 Alldecime for the Plague to be taken, as you seele y^e selfe sicke

malmsiey drinke it in a morning, and it is preservative

 are infected already and are taken with the pestilence, if they drinke of it but one spoonfull
 be sure from all evil, infections of corrupt ayres, and contagious, all the daye after, but when that
 this electuary is of the great vertue in them that doe receive it once in 24 houres that they maye
 for that he maye live as long as is possible, for with out doubt it will prove a present remedy

A Medicine to trye whether there will live or dye
that have the Plauge come out upon them

Take a quicke called galbanum, and dissolve it with the Juice of Seid Vases, then spread it
upon the flesh side of glower leather, but lett the plaster be not broader, then the soare is
discovered, then laye it upon the soare and bound it on with y^e hand, the space of a quarter
of an houre, and if then it both cleave, the party will live without all doubt, if not he will dye
and if it doe cleave it will ripen the soare and breake it, in 24 houre, and that before it become

Another Medicine to ripen, breake and draine the core of the Plauge sore

Take a great red onion, and rest it in the fire untill it be like halfe rosted then wringe
out the core of it, and laye the hollow place thereof right upon the toppe of the soare as
warne as the partie can well endure it, and hold it lightly upon with y^e hand the
space of halfe an houre, then bind it on with a cloth and lett it lye soe the space of 24 houre
and if it be not broken by that time then laye on another, in the like sort, this will both
breake it and draine out the core, and then dress it with good draining salve that hath there in no

So make a Soare good to preserve the beaver from the Plauge

Take the quantity of a good apple of yellow wax, a good poundfull of tart, and give or fix poundfulls
of good wine vinegar, and then putt thereto, the mutch of the pondar of wood as will make
it very thicke, and when it is not stirred together, take it of the fire, and being cold make
it up in balls, and make a hole through one of them, and with a string weave it about y^e neck
in time of sickness, and by good grace it will preserve you from infection

Universal Medicine for the Pestilence

Take the dried blood of a roge, and of a kid, ren, fennell seed, the seed of com
common, fill and of wild raps or garden raps, or raps of every one three drames, the roots of gentian
treigle, quina tum, frankensence, roses dried, of each 3 drames, white pepper, long costivarian
pallorian, Amis cinnamon, of each two drams, murche, made of each, 6 drames, benjamin, Agborum
guin Armawacke of each 3 drames, Almones, Agorick of each two drames, cartholiban, 20 grames
yeter, Jaxon, rubarbe, and renpoutuk, quiper mastic, of each one dram, Stindos, 5 drames
make a fine powder of all these and with 4 times as much of clarified honey mingle all together
and keepe it in a stiller, heyl all or glasse close stopp'd it is an high treasure in such a case
the dose of it is two drames in wine or water of Jorrell

An Electuary of a wonderful virtue in the time of Pestilence

Take cinnamon, elect one ounce, terrazigilla, 6 drames, fine murche, 3 drames, unioines horne one
dram, the seed and rind of cytron, roots of dytame, burth or turpentine, redd one, redd corall of
each two drames, yellow Saunders 4 scruples, redd Saunders 2 scruples, white beeme and redd
glentars of many gods, of each one dram, Jewry rawe Scabions, 2 scruples, Jujube, seed of baill
the bone of a stag heart, Jaxon of each 2 scruples, make a fine powder and add unto it of
Sole armonacke prepare 2 ounces white sugar 3 pound, and with a strong of Acetofati -
cetri, make a stovange, electuary, and keepe it in a glass, if the pestilence come in y^e great
excess of heate, drinke a Spoonfull thereof upon rose water and Winegar, but if the patient
feele any cold lett him take it in a draught of wine, and cover him with clothes -

Sweale Water.

Take an ounce of Hart's Horn Shaves & boils in 3 quarts of Spring water till it comes to a quart. Then take y^e Roots of Licampane, Jewell, Gentian, ^{Red} Thistle, Anglica Root, Cyrrils, & Sormenitil, of each one ounce; (brown Sines one ounce) When take one pound of the Grease of the bear & distill it in 3 Sints of white wine, & 3 quints of Red Rose water; Infuse it also gathered for 24 hours, then still it in a Cote still! you may add Rosemary flowers, Rosebush flowers, Mary-golds & English flowers of each 2 ounces.

Take of chake finely scraped a handfull, putt it as it were dough with the white of an egg as much as will make two pretty cakes, bake one of them, upon the hearth, and when it is baked laye it to the wall, as hott as you can suffer it, when that is cold bake the other and applye it in the same sorte, thus doe still with fresh cakes untill it be stayed.

## Another medicine to stave any Flux.

Take halfe a spoonefull of the feedes of redreses, dryed in the gutt season of the yeare, putt it into an Ale beere, or milke boyled, with Glower, take thereto, twice or thrice aday, and it will help you.

## Another medicine to stave any kind of Fluxes.

Take of the red leaves that growe upon the young springes of an oake, that hath bene lopped distill from and take 4 or 5. spoonefulls of the water, there of, if it be for a child, take but 2 or 3. spoonefull putt it into an Ale beere, or such like, and lett the partie take here of once or twice aday, as there dyscase is and it will help you.

A medicine to stave the Scouring that proceeds from sickness in the Backe. Take a platte of stone pish and laye it to y<sup>e</sup> backe, take of comfrey nepp and clay of each alike quantitie, shred them very small, beate them with two or three eggs, and make a tangle thereof when it is baked putt a little weyes to it and steepe it over with sugar, eat here of every morning so longe as you shall find occasion, it is good for anye weaknes or bruiise in the backe.

will halfe be consumed, the with an ounce of blanch'd almonds and sugar, make a pound mung  
where of Lett the patient, take halfe apint in the morning and as much at the same  
houre at night when he goeth to rest, and the other halfe pint the next morning mung  
ing, with each draught, one ounce of the Surrupp of marsh mallons of Mr. Rich.

### A good water for the Stone.

Take the young cropps of brime, gently pearce stone which groweth on barly land and spreadeth  
on the ground, elcar flower, and aspart of each one handfull, bruse them and lett them, laye  
all night in a pottle of white wine, close stopp'd, distill them in a limbeck with a gentle fire, keepe  
this water close stopp'd, and as occasion serveth use this with sugar, and putt therof into y<sup>e</sup>  
drinke or broth, with some distilled milke, or Mr. gnatill.

### A Powder for the Stone.

Take elcar flowers, drye them gentle over a gentle fire, pound them in a mortar, and searce them  
through a fine lanne, when you make use of them, the best time being at the new and full of the  
moone, take as much of the powder, as will lye heaped, in a sicke, in putting into a draught  
of white wine or strong ale, take fasting, and make an houre after if you can -  
it maye be taken at anye time, it is good for the stone and nidd in the ste make powder of elcar flowers

### For the Stone.

Of Surrup of Allhea one ounce and a halfe, Syceus electuarius Sythion trien one Surrup, cyle  
of witherill 3 droppes, take this with a good draught of Saxifrage water, allet new milke hott from  
the cowe, three mornings, to greater, one a month, then make hott from the cowe, in may or June  
like honey, drinke a morning, is good for the stone.

### For the Stone.

Take a drame of the Indian root called Lignum Niphrivium, beaten to powder or cutt in small  
pieces, putt unto it halfe a drinking glass of sape water, lett it steeke there in a whole night  
in the morning the water will be dyed of a blewish colour, pound out this the water  
and putt thereto as much renish wine, drinke it off and walke upon it, at night you maye  
putt as much sape water againe, in the morning pound it off as before, and drinke it munged -  
with as much renish wine, thus you maye continue for long, as you see the water, having  
the root in it, is coloured, by it when it is not more coloured, it is a signe, the water is all steeke  
out, then must a fresh drame, be steeped, in water as before continue thus, you shall find great ease  
and remedie.

### For the Stone, Stranguie, Winde, and Stopping.

Take herbe mercurie, mallons, philipendula, ransons, pellitorie, chinars, ashen leaves, ra  
dish, brime greenell, sonage, in each persey, alus Saxifrage, water creghus, and brooklime  
of each, two or three handfulls, throw them small, putt to them, two pound of Lenten, gys, in  
rants and ransons of the sun, of each two pound, one pound of dates, the stones govt taken out  
putt all these into one pottle of white wine, and as much Ale, distill all these together in a reise  
still, add, then to it two pound of white sugarandy, and melt it in the water, drinke there of, mor  
nings and evnngs, a wine glass at a time, some of the yeare, 3 or 4 times, a weeke as you see and finde  
the operation, and see cause.

### To Procure Urine, Dr. Moore.

Take of the tops, or flowers, of laundier, a good handfull, as much of the flowers, of marie gold, both alike  
dryed, in a shadowed place, a handfull of the berries, of saunders, brused, putt these into a glass bottle of  
a quart, or 3 pints, with malmsy, the wine, sake, or good muscadine, lett the glass stopp'd in the sun,  
where is no reflection from any wall, when the strength of the flower, is extracted into the  
wine, keepe it for use, it will help the witting, taking about 2 Spoonfulls at a time, when you  
sent that infirmity, it will all for open the passages and procure urine.

About one hour after it hath bene ministered, and hath bene working for as the stone  
 may be empty, take 7 Spoonfulls of her Ladyships water, see waters, for the stone, and 7  
 Spoonfulls of white wine, halfe an ounce of sirup of marshmallows, or as much of sirup  
 of woad, such of these sirups, shall, like the patient, mix all well together, make  
 it like warme, and drinke it off during the time the patient shalbe in himselfe, ill of the  
 stone, this water may be taken three dayes, at 8 in the morning and at 4 in the after  
 noon, at other times, to prevent it is good, to take the gylster, and the water, so prepared  
 once a fortnight.

### Lady's Toucher Medicine for the Stone.

Take a gallon of new milke of a red cow, of wild thyme of Savoyage of pulitory of the wall  
 of philypandula of each one handfull, of pearly her handfulls, and 2 or 3 radish rootes ~  
 sliced, Steepe all these in the milke all night, in the morning distill the milke and the heads  
 with a moderate fire, the best time to doe this is about the end of maye, when you  
 use it, take of this water 6 Spoonfulls, and as much of reynish wine or white wine, a  
 little sugar, and some sliced, with megg, make it like warme, and drinke it, fast after it: 3.  
 However, using some temperate exercise, take this 2 mornings and two nights, together, when  
 you rise and when you goe to bed: as need shall require, this medicine was approved by one  
 Mr. Farren, sometime gentler, to his estate who having bene by the space of 30 yeares ~  
 troubled exceedingly with the stone, was by the use thereof not only eased, and freed, but  
 alioe, to his trienge daye, for preserved, from that disease, as being opposed after his  
 disease, there was not found, for much as any there of the stone in any part of his body  
 since, which time many have used it to, there great comfort, preservation.

### An outward Medicine for the Stone, Prescribed into Sr Horatio, Paulo, Vicina: by Mr Butler of Cambridge.

Take Smalage, Louage, Stonecrop, pulitory of the wall, Gunetory and Savoyage of each a handfull  
 two grates of stone powder, so you shall have, at the apothecaries, or in steade thereof, the  
 weight of, twelve pence of the powder of a stone, taken out of an ox gauld, boye all these together  
 in a pottle of the best white wine, untill the one halfe be consumed, then take two linnen bags as  
 reach from the huckle bone, of that part, which is not pained, to the place greened, set the same  
 bag so over the haull of the patient, being well filled, with some of the harts, for to be  
 applied, to the bare skin, as hott as the patient can endure it, and ever as the harts  
 the bag abate, take the other, bag, and applye it as before, and if the patient have not  
 present ease, in case the whole liquor be consumed, put more white wine, to the harted bag, as be  
 fore, with in one houre, the paine will cease, and neuer paine you more, and for as much as the  
 medicine both, owde, the stone with great speede, to the end it maye be more easily, avoided  
 Take this best drinke following, to carrie the grawl the more easily, there of drinke, it  
 berally, and begin to drinke, before the application of the medicine, and after ward, the more  
 the better, make a pottle of the best white wine, when the last is taken a maye, put therein  
 the rootes of mothe thyme, of pearly of philypandula, and of marshmallows, the pills  
 of them all cleane taken awaye, and very thin, sliced, lett them, boye, well in the pottle of wine, and  
 take it as before.

An Almond oil like good, to be used, in anye, extremity of the Stone.  
 Take french barley, well washed and cleansed, 2 Spoonfulls, of the seeds of pearly, muskallion  
 cucumber and pumpon of each, three drams well drused, of the rootes of pearly fernell and  
 mallons, washed and the pith, taken out, three in number, boye all these with a little chicken  
 or a peece of mutton or weale, which you like best, in three pintes of faire water on a gentle fire  
 till.

For the Strangurie of Mr. Burgem.

Take of red cow milke hott from the udder, putt to it a pugill of bettony leaues dryed, if it be greene it will curle, the milke, boyle, then, and straine it, and drinke it in the morning, fast  
ing, some dayes together, and fast 2. hower after it, at night take hott red cow milke, with  
a little white sugarcandy, if the collicke humor, be not quite expelled, with this medicine.  
then take in mornynge, this medicine, wash uenue tupeutine in rose water or endue wa  
ter, then take powder of liquorish, and mastike, puluerisid, make little pills of the washed fur  
gentine, and pondar, give 3 or 5 of them to the patient, once a weeke in the morning fasting  
it is good for those that are troubled with this dysase, to eat for Janue, to rest meat, the  
Juce of mallones, puerlin, wioletts, and cucumbers, beede mingled, together.

A Soueraigne medicine for the Stone.

Take the rootes of white Saxifrage of perstley, break stone and ashen keyes of each a hand  
full, of aring rootes, two handfulls, bruse them well together, in a mortar, and turn them  
up in a bagg, in six gallons of Ale, wort, or beere wort, drinke of it when it is fortrought  
euery morning fasting, halfe a pint, and fast an hower after, the white, Saxifrage  
beareth a white flower, and bloweth in the beginning of maye, the rootes are red, about  
the bigness of a pease, and growne together, the best time is to dye them in Aprill, with the perstley  
the hearbe, and rootes together, they are to be had, in cheape price, the drye, aringo  
break stone, to keepe for all the yeare, they are to be had, in cheape price, the drye, aringo  
are best to be had, at the dryest, for tenpence a pounce, the perstley break stone is not  
easily knowne, but by the credit of the seller, it becometh somthing like yarrow, ashen keyes  
maye be kept all the yeare.

For the Collicke. Lady Wintour.

Quitt some small quantitie of cotton to a linnen cloth, the same being moderately warme or  
hot, take as much aquavite, in a pottenger plate or sawer, as maye wet the extremities  
of the cotton, lett the aquavite, be a little heated, that it growe not before, the cotton be drenched  
or touched in it, there neede noe great quantity of aquavite, three spoonfull is enough  
the cloth, to which the cotton is, strightly quilted, maye be only of a handfull and halfe  
in breadth, and a handfull or little more in length, it is to be applyed to the navel, and if  
you find greete paine, to the stomake for a time, but it maye not be longe, for it will growe  
adull paine, and trouble, in it, but placed on y<sup>e</sup> navel, it will ingallibly in 5 small time take  
awaye the paine, it being, used some 2 or 3 dayes at the navel, below the stomake, it will  
deassen, the wind at the stomake, it is sufficient that you wet it with one for 3 dayes.  
but for the collicke it selfe it will dysperse, the humor of it presently, and be much more na  
turally, in aquarter of an hower then other remedies in a yeare, one which had the collicke  
six monthes, all most continually, for 3 or 4 times a daye, before he took this remedy, since  
heuar, had it, and hath recovered, his stomake, which, before, he had absolutely lost.

Sadie Shelle. her direction for the Stone.

...

**A Medicine for those that have a Canker in their Mouth**  
 Take a pint of white wine, and as much of fair water, then take of the little Symp of Symary  
 of white grass, other wise called rue, and of sage, of each of these make a handfull, and  
 of roodewine leaves, and plantaine leaves, of each of these an handfull, and when y<sup>e</sup> liquor  
 both boyle, then put in all these cankers, being cleane washed, and for the then boyle -  
 softye, untill the heartes begin to looke yellow, then put thereto as much allome  
 as will make the liquor to tast very sharpe, or rough: upon y<sup>e</sup> tounge, end, then putt  
 there to as much honey, as will make it looke yellow, and to tast very sweet, then  
 Shum

Take a sprinckle root, scrape it cleane, then take a slice of the inner part of it, of a good thickness  
 and putt it under the parties tounge, then annoynte the bodie of his head, the nape  
 the nape of his neck, and about his eares, and shanes, with the oyntment for the halley  
 you shall finde the reuite heart after in this booke, chage it well, and lapp a cloth in a  
 cloth about it, being but warmed at the fire, and for lapp it app close with sufficient  
 clothes, to keepe it warme, presse him thus one in 12 hours, and continue it as you  
 shall see occasion, to much heat of the fire is hurtfull, to those that have the halley, but  
 warmth is good

**A Medicine for those that have lost their Speech**  
 Either by Sickness, feare or otherwise

Take of corall, and of amber, being finely beaten, of each alike quantitie, then blend them  
 with as much honey, as will serve to make it like a conserve, temper these well together  
 then putt them into a glass, and keepe it for y<sup>e</sup> use, and when you doe use it, take a little  
 of it on a coarse cloth, and rubb y<sup>e</sup> teeth therewith, as much as a barley corne will serve for all y<sup>e</sup>  
 teeth

**A Medicine to Strengthen the teeth: it make them cleane, and strong**  
 and to preserve them from pynninge, dringe, cold, hotte, or thine a while

Take an hundreth root, forage it, and wash it cleane, then stee it, and boyle it in a good  
 good quantitie of wine whey, and three spoonfulls of rose water, boyle these together  
 upon a chafing dish of coales, in a splatter, untill the wine growe to a conserve, that it will  
 scarce cover the rootes, then take it of, and take one of the slices, and hold it betwixt  
 y<sup>e</sup> teeth, somewhat warme, upon the tooth that both ake, and take a little of the liquor in  
 y<sup>e</sup> mouth warme, and lapp on that side y<sup>e</sup> greite is inn, and after that you have  
 holden it in y<sup>e</sup> mouth, for the space of halfe an houre, having changed hote or colde in  
 that time, then putt it out, doe this as you shall have occasion and you shall finde ease perstatum

**Another Medicine for the toothache**

Take a spoonfull of the powder of galls, and as much of the powder of rose mary, being  
 being dryed, take halfe as much of dried pepper, and the like quantitie of the powder of  
 allome, then take as much honey, as will serve to temper it well together, like a conserve  
 and putt it upp in a pot, or box, and keepe it for y<sup>e</sup> use, and when you doe use it, take a  
 little of it, and make it in a ball, and if y<sup>e</sup> tooth be hollow, putt it there in, if not  
 hold it betwixt y<sup>e</sup> teeth, and right upon the tooth that ake, and let the water  
 as it falleth, runn out of y<sup>e</sup> mouth, this will drive some the Rheume, if it be a Rheume  
 it will kill it, and it will drive upp the matter, if this as you have occasion and it will  
 help you

**A Medicine for the toothach**  
 Teeth

## A Medicine for the Effortment

Take the roots of Bryony, still them: drye them in an oven, then turne them to ashes, in a fire  
thowell: take the ashes there of, and the meale of beanes, alittle cake of Crumstone, and alittle  
white winegre, and putt all these things into stilled water, of elder flowers, and at  
the first mungling of them, stirr all together, and with a little cloth dipped in this  
water, wet where the morten is come out.

they have scoured them selves, take them out of there shells: putt  
them into a Cold Still, and the leaves of about: twenty white  
Lillies: Sprinkle: them well with sack: take: two ounces of good  
mirt: bruse it: and putt it amongst: the Raines: and Lillies:  
Stir it with a gentle stir, it will be two dayes a stilling: doe  
putt in a quart of beane blossoms, and a pint of sack.

## For Gallonness of the skinne

Putt as pooregall of mustarde. Seede into one pint of whittine.  
the yokes of 3: new daye eggs, that are roasted hard: you must use  
it night only: and not tudd: the skinne: but ripe it with a nett  
cloth: of cherry sack: make a posset of new milke, and the Juice  
of two Lemons: wash the face: the next day with:

## The Sake Water

Take 4. ounces of white Benjamin: putt it into the receiver of this  
following still: take one pound of sake, one pound of bitter  
almonds: blanchd: and beaten: one quart of white duen Hayes, the best  
some of white Lillies: beanes: and rosemary: of each: one handfull: putt  
all these together in a still: with new milk: till you are still:

A medicine to cure a face that is Red  
and full of pimples.

Take heering worth of quick silver, put it in a little glass, and put there to for much fasting spirit, as will serve to fill it, then shake them well together, the quick silver when it is killed will look like dust, then take such a stone as painters use to grind their colors upon, being clean washed, and take of the eye of dayes the quantity of a good apple, grind it quick silver and it together upon the stone and temper it still with weddinge water, and for grinde it until the ointment doe looke very graye, then put it in a box, and ancynto yf face there with, every evening and morning, for the space of 14 dayes, keeping yf selfe close in yf chamber all that time, and using the drinke following, one weike before you applye the ointment, all the time you doe applye it, and one weike after, take a quantity of new beere, and to every ten gallons, take halfe apound of madder, stirr these well together, and put them in a vessel, and when they be stale, drinke thereof both morning, and evening, and drinke times in a daye, these being used as is a forebode, will by godd help heale, but for a space of a fortnight yf face will beke worse then before, until such time as the humor be killed, that is behoveth the steps and the skin.

A medicine for those that have a flushing in their faces  
and to cleare their faces of Wormes and such like things.

Take a great handfull of speck flowers, and of wild baylie flowers, and of the whitest roses, of each of these the like quantity, put all these in a peevier basin, and put there to a quart of new milke, from the cowe, then sett it within yf still, and when you have straked it, put the water there of into a glass, and keep it for yf use - it will keepe good all the yeare, and when you have occasion to use, take 3 or 5 spoonfulls thereof, and put there to, of the clearest allome, as much as a great beane and wet there in a cloth, then wet the face, and laye the wet cloth upon it when you goe to bed, and lett it lye at it all night, and in the morning, take of it wash all the face with the same water, without allome, and for 2 dayes it with a cloth, sett the partie doe this as they shall have occasion, and it will heale them but withall they must drinke a good draught of this water following, both in the morning fasting, and at 9 oore of the clock in the afternoon, take three pint of pure spring water, or of running water, and when it hath boyled a good while, putt there to as much sugar of white bread, and when it hath boyled a good while, putt there to as much sugar as will make it pleasant, then take it off, and put it in an earthen pott cover it close and use it as after ward, this is good yf the flushing proceed of heat in the liver or lungs, but yf it proceed of cold in the stomack, with both commonly come of quor much difference, for as when warme meat cometh to the stomack, it streweth and - causeth the flushing in the face, then lett the partie use after there meat, to take continually a sopp of a test, steeped in any kind of wine, then steape yf test in ale and when it is steeped, straine upon it the powder of ginger, dynamon, and sugar first, before it be gone to hart.

## For Remalls about the Eares

Take a quart of beere, a good handfull of red rose leaves, and boyle them all together, till it come to a pinte, then putt doe mulla of the cruines of cowse leaven, or ycebread there to, as will make itt fitt for a putter, when it is almost boyled, putt there to two spoonfulls of honey: spread itt upon a cloth, and applye itt warme to the place and remove it once or twice in twenty foure houers

## A Medicine for the Singing in the Eares

Take barley flower and take a loafe of itt, and when you have draven itt out of the Oven - Bewde itt in the nest, and strene upon itt the powder of nutmegg, and as hott as you can suffer itt, hold itt to y<sup>e</sup> eares, and thus doe oftentimes and you shall find ease, if hath been approved

## Another medicine for the Singing in the Eares

Take a quart of sacke, and putt thereto an handfull of ground baye, and as much of penny royal, and lett them boyle well together, and as hott as you can suffer itt, lett itt steeme thre of goe into y<sup>e</sup> eares, by a tunnell that will close cover the poth, use itt in the morning and when you goe to bedd, and keep y<sup>e</sup> selfe warme

## Another Medicine for the same griefe

Take a great onyon, and cutt off around pece of the crowne, make an hollow place within itt and putt into itt a little myrrhidate, a little red sallett oyle, and a spoonfull of aquaviv and close itt with the pece you cutt off the crowne, and topp itt in paper, and rest itt in the embers, and when itt is very soft, take itt out of the fier, and bruse itt all together and laye itt in a cloth, and as hott as you can suffer itt, hold itt to youre eare

## A Medicine for Deafnes that cometh with noyse in the Heade

Take oyle of silkes, some 5 or 6: dropys, as much strong angelico water, halfe as much oyle of bitter almonds, teate these together untill itt looke very white, then make itt somewhat warme, but not to hott, and droppe some 5 or 6 dropys into the eare, then take some blackwood and dipp in the same, and teate the wood against the fier, untill itt be warme, then stop the eare with some of itt, and laye some of the same wood on the topp of the eare, every night the eare with some of itt, and laye some of the same wood on the topp of the eare, every night to bedward, the quantitie of the oyle is thus small, because the oftner itt is made itt is of stronger force

## To Recover Hearinge In Weston

Take thyme, rosemarie, bayes, cammomill, and sage, of each an handfull, boyle them in water, untill the water be very strange of the heates, then puer the water, seething hott into a narrow mouth bottle, the penter bottles have the narrowest mouthes and putt a tunnell in to the mouth of the bottle, and lett itt be held close to the eare that akeeth this must be done often

A medicine for those that are Deafe and to recover hearing

Take halfe a pint of malmaſey, and halfe an ounce of cloves, put it into an earthen pot, and ſett it upon the embers, and lett it boyle feawday, untill a quarter of it be conſumed, awayne, then putt all together in an arrowe mouthed bottle or cupp, and ſee laye y<sup>e</sup> eare to the mouth of a tunnall, putt in to the ſame cupp that the ſteame maye goe into y<sup>e</sup> eare, and couer y<sup>e</sup> head cloſe with aſſet, but lett not the ſteame be to hott, this continue for the ſpace of halfe an houre, at a time: ſe it this for the ſpace of a ſenight, both evening, and morning, and every daye putt a little more malmaſey to the cloſe, and after the firſt time doe not make it ſo aſſequent warmth, to caſt aſteame, ſitt for y<sup>e</sup> taking: and after every time that you doe take it, take of the liquor before ſett downe, that is made with neate footyle and droppe of it into y<sup>e</sup> eare, with blackewood, laying the wood upon y<sup>e</sup> eare inſide, ſett as is formerly written, in the medicine for wounde in the head, and when you have layd this to y<sup>e</sup> eare, have aquill made with black wood, ſawing ſett on the out ſide to keepe out winde, and linnen cloth on the inner ſide keepe this cloſe to y<sup>e</sup> eare, untill you have eare waxe in y<sup>e</sup> eare, and lett thoſe that will procure theſe hearing, take heed that they pick not their eares.

A medicine to Drive out an Impoſtume

that is bred in the eare:

Take a toſt of ripe leavened bread, that is ſharpe of the leaven, lett it be ſomewhat thick and take the thicker ſide, and ſett the inner ſide of it in winegre, and laye it to y<sup>e</sup> eare as hott as you can, and ſee lett lett it lye as hott as you can for the ſpace of 12 houres and in three or foure dayes, it will drive out the bagg, and when it is come out, if it be not broke off it ſelfe, then lanne it, and when it is broken, make atent of lint and dreſſe it with the oylment of ſtewins wort, and putt it into y<sup>e</sup> eare, then make a playſter of the ſame oylment, and laye it upon y<sup>e</sup> eare, dreſſe it thus once in 24 houres, untill it be well, if you have none of this oylment, you may take any other ſoft ſalue, and dreſſe it as with the other, but keep y<sup>e</sup> eare warme that you take not cold after it.

A medicine to Drive an Eare wick out of y<sup>e</sup> eare

Take a ſweet apple and roſt it in the fire, untill it be halfe roſted, then take of the ſoſteſt of it, and dreſſe it with thick upon linnen cloth, and laye it to y<sup>e</sup> eare, as hott as you can ſuffer it, and lye upon the ſame ſide, and when you doe ſeele it ſtir, you muſt lye very ſtill, untill it be come to the apple, and then you muſt ſuddenly pluck it a waye, laſt the eare wick returne, into y<sup>e</sup> eare againe, and if you doe thinke thered be any more kaye a new playſter

A very good medicine for any Impoſtume in the Eares

and is good for the megrims

Take a pint of malmaſey, and 4 or 5 ſcops of roſemary, and a ſpurnell or two of communice, and boyle them all together, in the malmaſey, and when they have boyled a good while, that it is ſtrong, putt it in a poſt, that you maye couer cloſe with a tunnall, putt the ſmall end of the tunnall into the eare of the patient, and keep his head, and neck very warme, with aſſet and lett the breath of the medicine goe in at the eare, or both the eares, one after another, whicheſt the patient is being thus, you maye laye of the heartes and ſeeds, on the neck, being for kept warme.

# Another Drinke to Clear the Sight

12

Take a good handfull of pimpernell, three great Spoonfulls of medlic  
otherwife called dories, stamp these together, and straine it, with a pint of  
ale. keepe it for y<sup>e</sup> use, and drinke this at two draughts, in the morning  
and at foure of the cloke in the afternoon, use this for one whole weeke, making  
new drinke for every day, and at the quarters end, leave it off for the space of an  
other weeke, and then if you feele y<sup>e</sup> selfe not well, use it againe, for another  
weeke, and this soe as long as you shall have neede, but use it not more then to  
greater, not when the signe is in the head. This drinke shall consume the cause  
rike in the eye, or any other greife with in the ball of the eye, you shall know  
the catarrhe by this, if dimmed in the sight at the beginning, the eye looking  
very faire, the blacke of the eye some after will wax greater and greater.  
and some of them will rise like the blacke pearle, in the blacke of the eye, and there  
is not water will help them, not any thing else except these drinke doe heale.

## A Playster to be applyed to the Temples

For to staye the humors that feed the  
catarrhe and is to be applyed when these drinckes are in taking

Take a quantity of bettany leaves, and choppe them w<sup>th</sup> small mangle it w<sup>th</sup> the  
yeake of an egg, and a little honey, and put as much whiten flower to it, as will  
make it stiff to spread on a cloth, then cut three little playsters of Holland: or  
lotion, that is new, and spread this upon them somewhat thick, and laye on  
each temple one, and the third in the middle of the browe, even with the  
lower part of the browe, and when these playsters doe fall off, laye a new upon  
and not before, and eat three or foure times in the daye of conserves of bettany.  
for it is good for that greife.

## A Speciall good water for the Eyes

Take of aloes surcetive, the quantity of a walnutt, shred it small, and put it in  
to halfe apint of red rose water, in a viall glasse, and lett it distill upon the ember  
helle houres, when it is cold, drop it often into y<sup>e</sup>ore eyes.

## A Medicine for sore Eyes

Take three leaue graffe, with white speckles, and w<sup>th</sup> doggie w<sup>th</sup>tes, beat them  
a little, and boyle them in faire water, till they have lost there colour, then  
putt in soe much: allome, as will make it take rough upon y<sup>e</sup> tongue, and as  
much some as will make it some what sweet: after straine it, and there w<sup>th</sup> dregg y<sup>e</sup> eyes  
morning and evening

## A Medicine for itches in the Eyes

Take a quene apple, and choppe it w<sup>th</sup> very small, the like quantity of grated manchett  
and a little soft wood, brused, boyle all these together in faire running water  
untill it be soe thick that it maye spread upon a playster, and when you get to bed  
w<sup>th</sup> it and apply it to the eye.

# A Special Good Water for the Clearing of the Eye: and to preserve the Sight.

Take one handfull of redwell, and as much of Salsaparilla, the like quantity  
of Sorell, as as much heart grass, and two good spoonfulls of eye bright, and  
the like quantity of Rousick, and three handfulls of redwell, and as  
much of white rose leaves, and the like quantity of woodbine, flowers, and  
as much of white flowers of the three leaved grass, and put all these together  
and still them, and put the water in a glass, and keep it for use, this water  
is alioe good, for the pain and webb in the eye: if it be taken at the first  
beginning of it, and used as followeth, take foure spoonfulls of the water, and  
put there in a peece of Alome, as big as a great pease, and let it drop it out of  
the Spout into y<sup>e</sup> eye, evening, and morning, this water is likewise good  
for the Rheume in y<sup>e</sup> eye.

# A Medicine to extort out Brinde Flesh. growing within the Cover of the Eye.

Take of the hardest of the Honey, and mingle it with a little Saffron, and drop  
a little of it, at night when you goe to bed, upon the place greene, and let  
not the party shut his eye to close, for squeezing it out, and let him in the  
morning, and howe or thre in the daye, drop of the water that is first  
written, into the eye, dropping three or foure drops at a time, staying and  
closing his eye only a little space, betwixt every drop.

# Another Medicine to take awaye the Sin and Webb in the Eye or a in the Eye growing from the corner of the Eye to the blacke And is like a little gutt.

Take of fine white sugar, as much as a wallnut, and a peece of Sanguis Draconis  
as big as a bean, and beat them together, with fine, and steare it through a  
pau of lane, and put a little of this powder into y<sup>e</sup> eye, evening and morning  
and at midday, and slumber a little after, and by gods help it shall cure you.

# A Medicine for aburne in the eye by fire or Gunpowder.

Take halfe a handfull of ale house, and wash them cleane, drye them in a cloth, stamp them  
and put thereto, three spoonfulls of thick and sweet creame, stamp them together, and  
straine them, and drop of the liquor into y<sup>e</sup> eye, often times both by day and night, and  
anoynt of the same about y<sup>e</sup> eye, with a feather, this moughte made every day in the summer  
and every two dayes in the winter.

# A Drink to Clear the Sight.

Take an handfull of rye maly, and a great handfull of balme, stamp them together  
and straine them with a quart of ale, and drinke of it in the morning fasting, and  
three of the clocke in the afternoon, and at night going to bed, and you shall find  
ease, this drinke both consume the vapors, that coming from the braine, both hurt the  
(Sight)

## A Medicine for the Bruiſe in the Eye

10

Take the white of one new-layd egg, and beat it very well, till all be of a froth then put there to, two Spoonfulls of red wine water, and make little balls of glass, and wet them in the aforeſaid liquor, and ſtuff it morning, and evening, and if the humors come much to the eye, take the white of one egg being beaten, and put it into a good quantity of ſolar-mack, and laye it to the forehead upon a Linen Cloth, this will keepe by humors from coming downe

## A Medicine for Rednes in the Eyes

the which: proceſſe: onlye of hot humors

Take a new-layd egg, and break a ſmall hole in the topp of it, then putt out all the meat, and fill it full of the Juice of ſourſh, otherwiſe cald ſelyterne and ſet it in the embers, when it hath boyle, ſtraine it, untill it be cleane and cleare, then putt into it as much white coppars, as a great barley corne and ſet it boyle, untill the coppars be moulten, then ſtraine it through a cleane cloth, and putt it into a glaſſe, and when you doe uſe it, keepe y<sup>e</sup> eye cloſe with a piece of ſilke, you muſt take it when you goe to bed, and one houre before you ariſe, if you putt in y<sup>e</sup> coppars, before the water be cleane it will make the water to looke black, but it will be medicinable without ſtanding

## Avery good Medicine to comfort a Weak Eye: or to: Stealep thoſe: that have had the ſmall Pox or Measles in there Eyes

Take a new-layd egg, and ret it faire, and hard, in the fire, then pill it cleane, and as hot as you can cut it in ſunder, and take out the yeaſke, with great ſpeede fill up the holes where the yeaſke was, with the powder of white ſugar candy finely beaten, and for cleap the two ſides to gether, the hotter they be the better then putt them into a fine cloth, of Linen, and tie the cloth cloſe about it putting the egg in the miſt of the cloth, and hang it up by the ends, and ſet it drop into a ſaucer, as allmond butter doth, untill it will drop noe longer, then take the water, and putt it in a glaſſe, and uſe it evening and morning when you have ocaſion

## A Medicine for rednes of the Eyes Without Salve

Take pieces of fine manick tread, of an ſuch thick, being the breadth of y<sup>e</sup> eye or finger, and cut ſlices, in the miſt of them, then drye them before the fire they be ſoft, laye them upon y<sup>e</sup> eyes, the hollow ſide being towards y<sup>e</sup> eye, and after it hath layen an houre, bind them faſt to y<sup>e</sup> eye, with a cloth, this muſt be done, when you goe to bed, and in the morning, waſh y<sup>e</sup> eyes with faire water, and the ſtill an houre after

# A Medicine for a Swell or any other sore Eye

Take one handfull of trevillane grass, that is most spotted with white -  
gather it close to the root as much of wild bayle roger, stamp them all  
in a wooden dish, a boye them in one pint of water, in a cleane brasse skillet  
with a very soft fire, when it is steamed put in for water allome as  
will make the water fast rough, on y<sup>e</sup> Teding after put in .iij. matts.  
Home, as will make it looke yellow, and tast very sweet, when it hath boyled  
a pretty while and is cleane steamed, straine it into a cleare vessel, and when  
it is cold, powder the clearest into a glass, and keepe it in a cold place, and it will  
last three weekes in winter, and 14 dayes in summer, the water is to be applyed  
to the eyes, one houre before they rise, and when they goe to bed: if the eye be  
very sore, drigle it at hve of the clock in the afternoon, and sleep after if they can

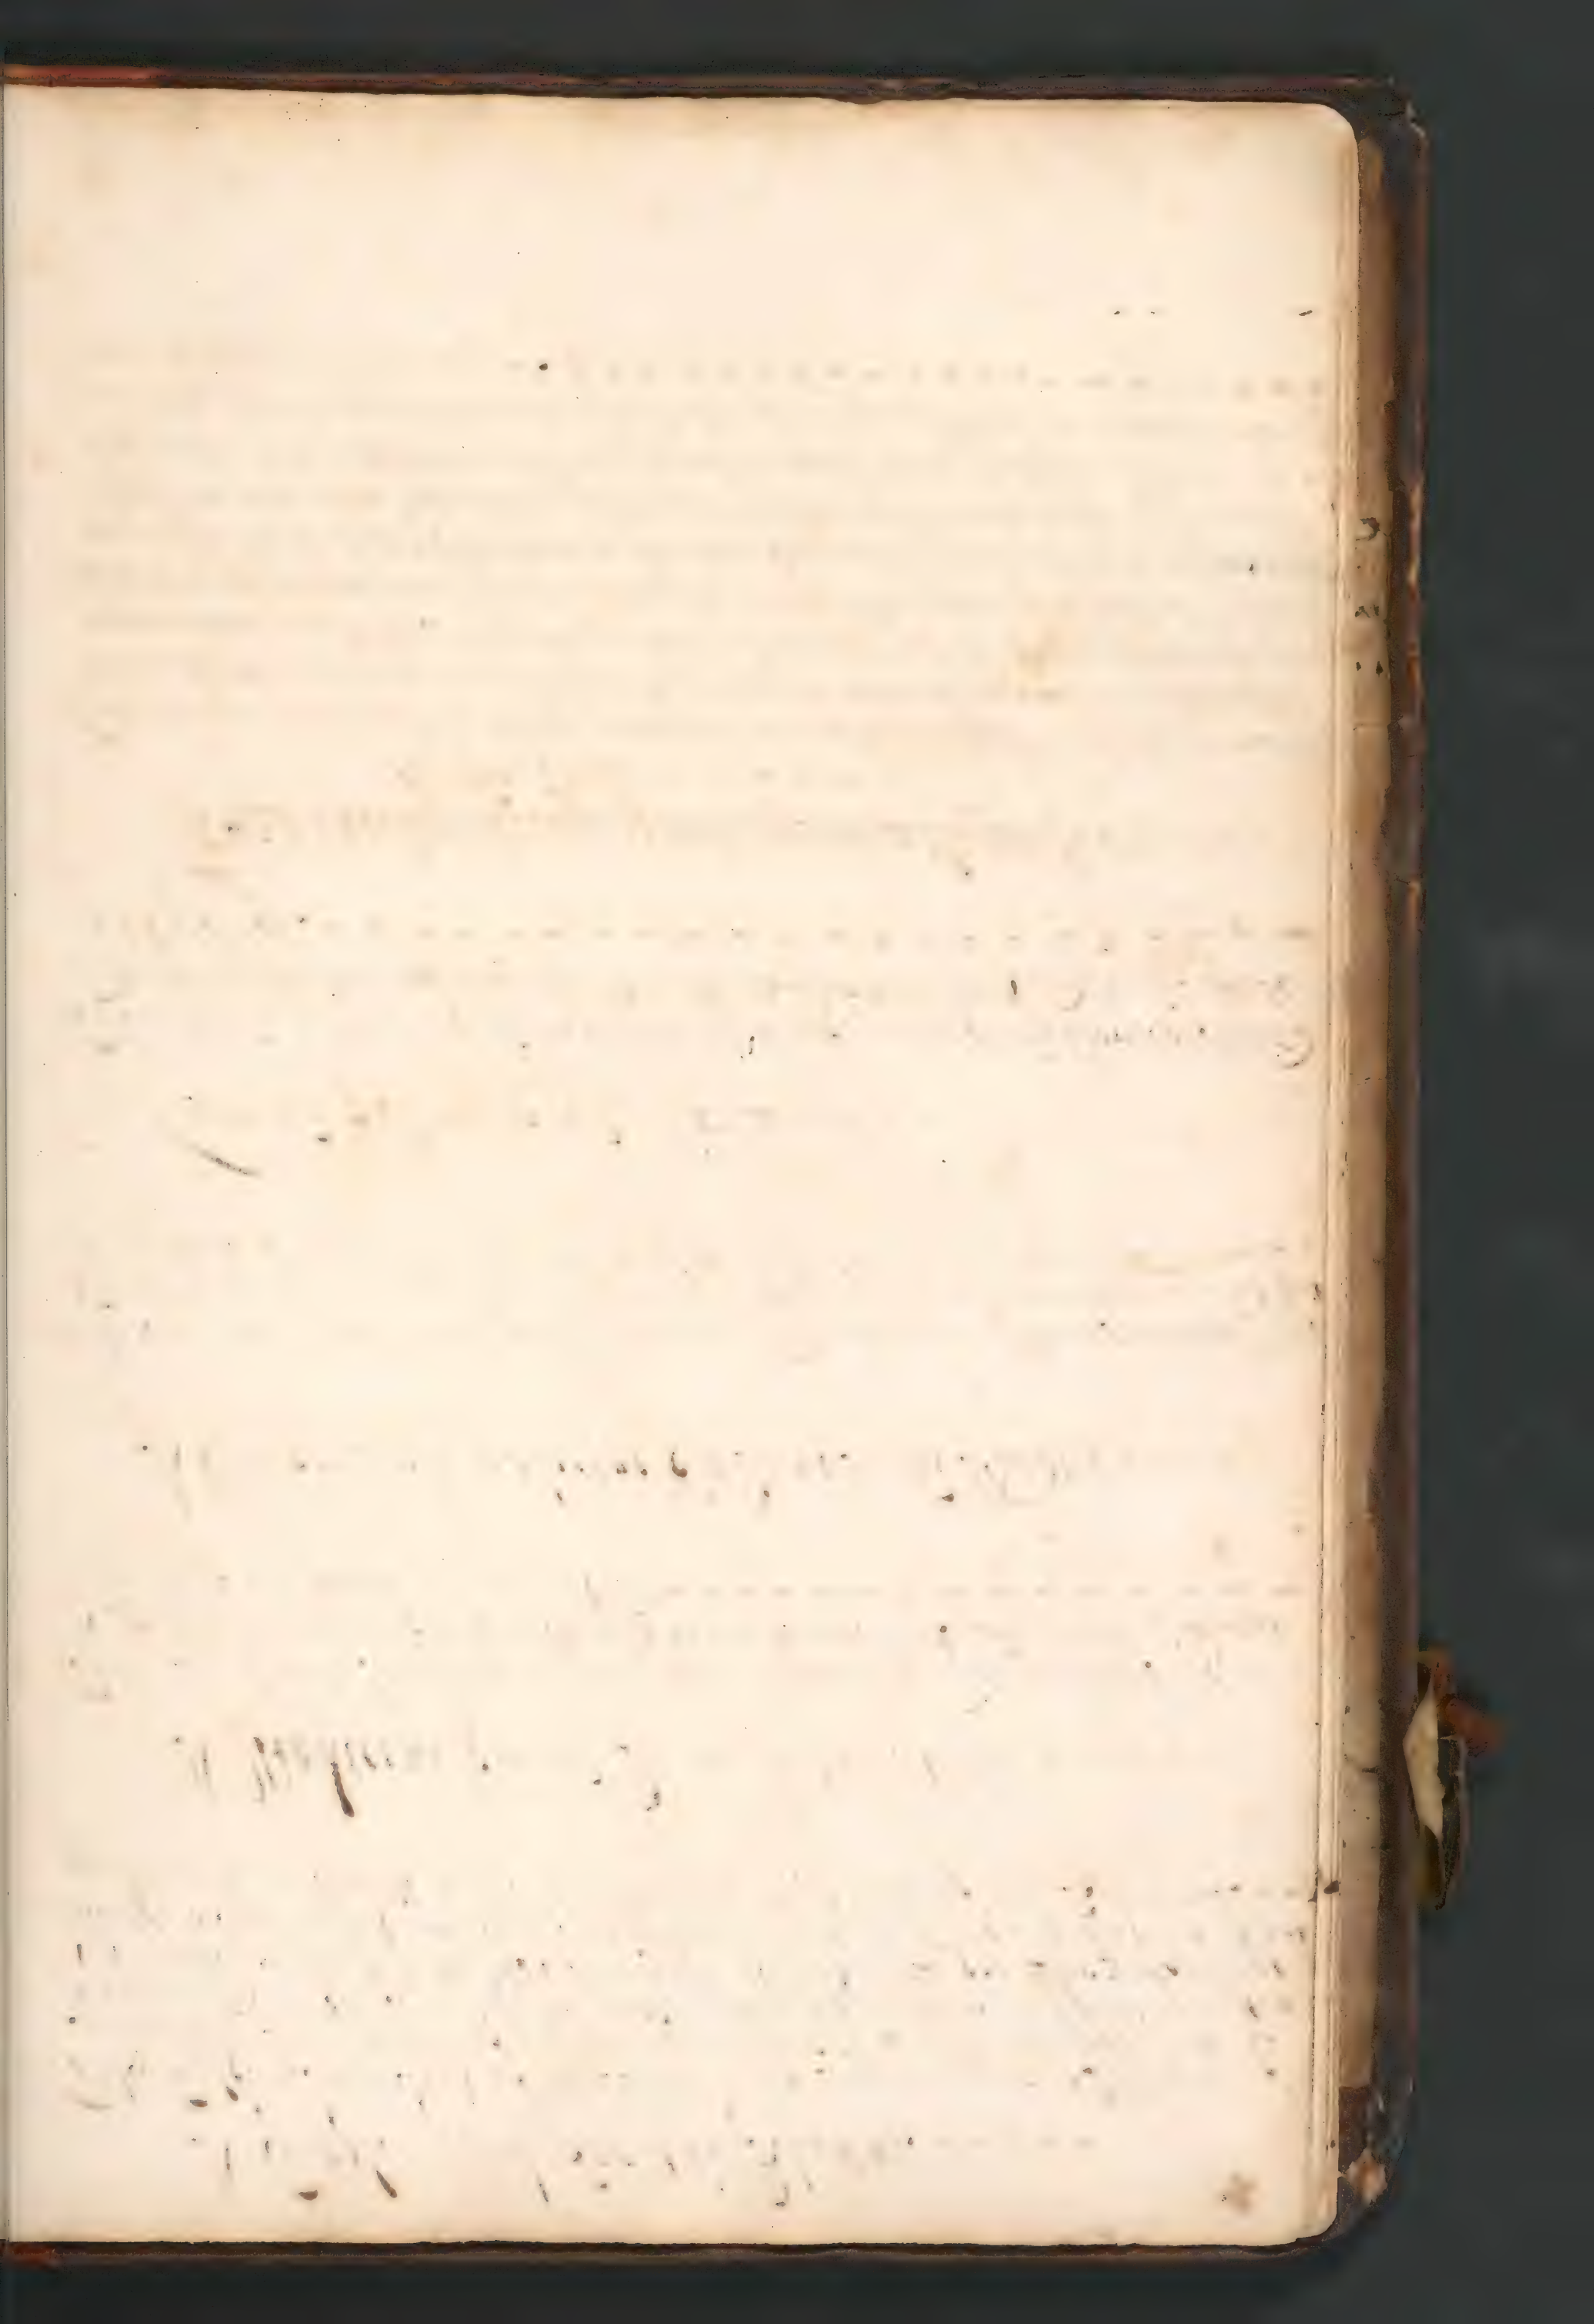

## A Powder to take awaye the tearle in the Eye

Take the whitest of Reins Tung, that you can gett, and drye it, and beat it into  
fine powder, and seale it through lane, and to one spoonfull of that powder, take  
three spoonfulls of sugar candy finely beaten, and as much powder of the best  
ginger, as will lye on a great then seale them all together in a piece of fine cleane  
laine and att night put into the eye a little powder, and in the morning use  
the water before written, only keep y<sup>e</sup> powder very drye, and it will last long  
and this is alsoe very good for any kind of stas that groweth upon the eye

## A Medicine to staye the humors from falling so the Eyes and good for the Meagre me.

Take one handfull of wild bayle rotes, and wash: and drye them in a cleane cloth  
then three hand, and take seven great earth wormes, and stampe them well  
together, put to all this as much as a pretty apple, of tharpe leaven, beat  
all well together, and mingle all with the white of an egg, and spread it upon  
a double linnen cloth, for large as the fore head is, that it maye come even to  
the browes, and cover the temples, lett the party lye on his back, one houre  
after the medicine is layd on, after find it with a kerchiefe, and doe lett it lye  
fill it be all loose of it selfe, when you use this medicine, make a bagg of drye  
sage, for large as will cover from the middle of the head, to the nape of the neck  
and take a pretty quantity of greke pitia, and melt it alone, in a litta earthen  
pott, and spread it with a flat stick upon the left side, of the best above  
feather, and cut y<sup>e</sup> playster for large for large, as it maye lye between the  
shoulders, and up to wards the nape of the neck, and lett it lye for longe as  
it cleave: it is very good for the patient to sterre much butter, or  
any thing where in gauluk, Onyons, or any suches be used

# A gargle good for the Rheume

Take halfe a Spoonfull of Mustard seed, of long pepper, of Collicery of spaine, and strow ake, of each two penny weight, and one Spoonfull of honey, with three Spoonfull of Winegrece, boyle them in a pint of water till halfe be consumed, then straine it, and take for 2 or 3 morning take a Spoonfull at once, somewhat warme, in y<sup>e</sup> mouth, but lett it not goe downe, this will cause exceeding a voydande of the Rheume.

## A Medicine for the Paine in the Head

Take the Heart: Shill, or ale worth, or there nise wale ground drye, laye it to the crowne of the head, and to ward the neck, and it will give ease and help the paine in the head.

## A Comfortable medicine for Paine in the Head

Mlake a little small wine of fine leuone, and wet it in good red water, dippe the topp of it in the powder of nutmegg, finely beaten, or beaten, and put it in both y<sup>e</sup> nostrills, but not to high, and it will give ease.

## For the falling of the Scuda

Take of the powder of the root of pollicery of spaine, finely beaten, or beaten and of the powder of ginger, and rubb the place there with, and it will cause it to goe up.

## A most excellent medicine against an old greife or paine in the Head

Take of baye salt, stamped by it selfe, as much coming seed stamped by it selfe, as much browne greenell, then straine them all together, then with as much pure winegar, and a little rose water, mix, and stir them all together, in a dish ouer a chafing dish of hott coales, then laye some of the same, hott on a cloth, and applye it, to the hinder parte of the head at night, and tye it fast hether, that it gall not awaye, and allowe daye another plaister, hether to the next night and doe soe nine nights together, one after another, and it will not only heale the same, per haps within three or foure times, for doing, but alsoe it will cleare the sight, and strow the yeowmors, cleare awaye, that run out of the head into the eyes, and drye the same, this medicine neuer failes for it is precious.

## A Medicine to Put up the Wuola

Make a fire of small very hot on the fire, and laye there on a pretty quantity of rice, and white salt, and when it is very drye, make it into powder, and mingle it well together, and there with all putt up the Wuola. The hearte called Wuola, or althorpes, or ground lunge being laye to the forme of the head, and towards the neck is very good for that disease, and will staye the Rheume.

## A Medicine for the Stoppage of the Head

Take a quart of new milke, a handfull of camomile, flowers, as much of red rose leaves, a little quantity of sage, and as much of red marj, and a nutmeg grated, boyle all to a poynt, and take the steame, and keepe up head warme.

## A Medicine for the Megreume

Take a handfull of wild baylie, leaves and all to the roots, twenty great wormes, of the earth, stampe them together, small, add thereunto the quantity of an apple of the softest leaven, stampe it with the other untill it be like dough, then putt in the white of an egg, mingle it with the other, and soe spread it on a cloth, and laye it all over the forehead to the browes and temples, neuer try it untill it fall off in each place of itselfe.

## A Medicine for the falling of the Wuola

Take a pretty quantity of wheaten leaven, and <sup>make</sup> little cakes, there of, make them upon a brick, or an hearth, that they only may be through warme, and then strent upon them the powder of white amber, and applye one cake to the munde of the head and the other to the nape of the neck through warme and no more.

## To Make very good Balls to Staye the Rheume

Take four ounces of liquore scraped and finely seared, 5 or 6 handfulls of the tops of thop, a handfull of good roots, and a good handfull of rose marj, stampe all these hearted in a stone mortar, straine them with halfe a pint of thop water, or faire water, then beat the whites of five or three eggs, and when the stumme is well boyled up, then stumme it cleane, and clarify it three with the whites of eggs, then putt to it 3 or 4 ounces of red sugarcandy and when that is moulten and skummed thaine y<sup>e</sup> liquor, and then through in y<sup>e</sup> liquor, and stir it continually, for it will be apt to burne, if great heed be not taken, and when it is soe much boyled as the whole masse will stir with the staffe from the panne bottom, then make it up in round balls or in what fashion you please, you must keepe it neare the fire for it will be apt to growe soft, a very small quantity will staye the sickling & Rheume.

Take a quart of Spring water, let it boyle a little on the fire, then take  
 of Symplicke, of cullenbinder, of plantaine, of stringe, leaves, of  
 each an handful, give siggs cutt in peeces halfe an ounce of Quince  
 seed, if it be a cold reume lett there be a little sage, or else not, when  
 it is halfe boyled putt to it as much clarified honey as will, boyle  
 after the cooler of it, when it hath boyled a little together, take  
 it upp, and straine it, then take of it evening and morning, or  
 sturwite, as they shall see cause, being gargled. Item that stott.

## A Gargle for a Sore Throat. . . . .

Take a peece of fine linnen cloth, cutt it round as bigg as the mouth of the  
 head, laye fine flax all over it, not very thick, then take Riggella, ymama.  
 nutmeggs, and cornm, and beat them all together, to powder, and laye of  
 that powder all over the flax as before, then take baye salt and drye it  
 as drye as you can, and beat it into small powder, and laye it all over  
 upon y<sup>e</sup> flax, cutt around peece of cloth as before, and quit all these together  
 that the powder runn not abroad, giving a speciall marke to that side  
 the salt is on. laye this quit to the mouth of the head, very hott, the  
 salt side uppermost from the head, and when it waereth mayst, upon  
 the head, as it will drye the same on a dish upon a chafing dish of  
 of coales, applying the same as often as you have cause. . . . .

## A Medicine for the Falling of the Uvula. . . . .

Take a Spoonfull of neats foot oyle, and as much of malmedy, or of  
 white wine, put these into a canner, and lett them boyle on the coales  
 and when it hath boyled, cutt there to the powder of halfe a nutmegg  
 and lett it boyle, untill it be somewhat thick, then take black well  
 and wet it in the liquor, and drop it into y<sup>e</sup> eare, and lay upon the  
 contrary side, for the space of halfe an houre, after, that the liquor  
 maye sink into y<sup>e</sup> head, lett the liquor be like warme and after the  
 dropping, stop the well lightly into y<sup>e</sup> eare, and lett the well lye  
 bound to y<sup>e</sup> eare from one dropping to another, and keep y<sup>e</sup> eare  
 very warme this 2 or evening and morning. . . . .

## Another Medicine for the same Griefe. . . . . @ Printed Recently after you have the former. . . . .

5  
A Medicine to Cleanse the Braine and to Heale  
: those that have a stinking ayre at there noses and to  
Cleanse the Lungs of such greivous Humours as are distilled  
Downe from the Nutriciall Stead.

Take a good quantitie of rosmary leaves, and chew them lightlie in  
y<sup>e</sup> mouth, that the ayre maye affeere unto y<sup>e</sup> head, and as you thus, note  
or this for the space of halfe an houre, at a time, chaunging the  
leaves as you shall see occasion, for this in the morning fasting, and  
two houre before you goe to supper, and at every time after you have  
taken this eat presently: the quantitie of two mallons of this recit.  
Following take a good quantitie of pennyngall, shred it very small  
mingled it with the best honey, and beat them together untill they be  
like a conserve, then keepe it for y<sup>e</sup> use, and eat of it as is afore said.  
See you this as you shall find occasion, and when you have made an end  
of these you must have teeth to put up into y<sup>e</sup> nose to open the nostrils.  
and to drawe downe the corrupt matter that offeended you, make y<sup>e</sup> tents  
of fine linnen cloth, small at the upper end, sett these tents in the Que  
of pumpe leaves, and a little clarified butter to make them to stop: put  
these upp into y<sup>e</sup> nose and lett them staye there a pretty while, then take  
them out and sett them againe in the Que chyl, and put them in as  
before, this doe for the space of halfe an houre, at a time, use this  
for a good space, and it will heale you of y<sup>e</sup> good Stead.

### A Medicine for those that are troubled With winds in there Stades

Take a peece of fraye leaven dough, as big as an apple, put thereto  
halfe an ounce of commised, finely beaten, worke it upp in the  
dough, and make it in a little loafe, then bake it upp on the crumme  
and when it is well baked, open the loafe, and moysten the crumme  
alittle, either with malmee, or aquawite, then take two prettye  
peece of the crumme and putt them betweene the sides of a linnen  
cloth and for fasten them somewhat warme to y<sup>e</sup> eares and lett  
them staye there for the space of twelve houres and then take new  
this doe five or six times and keep y<sup>e</sup> eares and y<sup>e</sup> head very  
warme both att the time and after, and it will help y<sup>e</sup> good still.

Take of ramme mil, rosinary, and sage, of each alike quantity, Dye them well, then putt them within the hole of an hankercher, and laye it for as it maye come round y<sup>e</sup> head, then bind it fast, and lett it lye a daye and a night, and you shall find sage, lett those that are troubled with coic in there heads, take of the oylt most of lavender and anyoyle there with there temples, about there eares, the napp of there neck, and there middle, or any other place of there head, there coic is to be taken.

Medicine for the Paine in the Head. . . . .  
That cometh of cold Humors. . . . .

Take of white poppy seed one Spoonfull, beat it to powder then put thereto  
a little poppet all made with violets, strawberries and brynkfoyle  
Drinke three of harrne and it will procure you to sleep - - - - -

Another Medicine to procure Sleep. . . . .

Another Medicine to procure Sleep - - -

Take a Spoon full of the Juice of Houzelleek, as much of wortmans Oil like  
the like quantity of Red rosethwater, a little good wine vinegar, and a little  
of the yolk or oment of red roseth, warme all these together upon  
a chaffing dish of coales, then cutt three peeces of a red rose cake  
and laye them in the liquor, laying the upper side of the cake  
downwards in the dish and when they be warme, laye two of  
them to y<sup>e</sup> temples, and the third in the middelt of y<sup>e</sup> sore head: When  
with the lower part of y<sup>e</sup> fingers, and doe bind them on and they  
will procure y<sup>e</sup> Scape if God please.

A medicine for those that cannot Sleep: ~ ~ ~ ~ ~

Another laye of sage, and flax, over all, as you did at first, and the  
 east it between two foldes of linnen cloth, being made first to cover  
 y<sup>e</sup> head from the moude unto the nape, there it will lower down  
 lenseme, and laye it to y<sup>e</sup> head, when you got to bed, and sett  
 it every daye where you maye have y<sup>e</sup> ayre of the fier, and thus  
 use doe long as you shall find occasion, this will continue good  
 five or six weeks, it must be ayred over frankensme, every time  
 you laye it to y<sup>e</sup> head

The cause whereof many of the paines of the head: - - -  
 Doe proceede now you shall know these paines and the: - - -

Remedyes for them: - - -

One of the principall causes whereof many of the paines of the  
 head doe proceede, is by opening of the head, the which hath happen  
 commonly by one of these three meanes, By overmuch indigestion  
 being about the braine, by sudden jump or fall, Or by vehement  
 riding or such like. The meanes whereby you shall know when y<sup>e</sup>  
 head is open, is this, some downe the end of y<sup>e</sup> thum, and if you  
 cannot receive the space that is betwixt the two joynts, between y<sup>e</sup> teeth  
 the upper joynt being towards y<sup>e</sup> upper teeth, and the lower joynt  
 to y<sup>e</sup> lower teeth, then y<sup>e</sup> head is opened, If by the space you have  
 and by this experiment you doe find y<sup>e</sup> head to be open, then doe  
 you thus, leane y<sup>e</sup> selfe upon y<sup>e</sup> elbowes with y<sup>e</sup> head somewhat low  
 our estate putting y<sup>e</sup> face between y<sup>e</sup> hands, setting y<sup>e</sup> thums under  
 the moude of y<sup>e</sup> head, gather y<sup>e</sup> face into y<sup>e</sup> hands, leaning somewhat hard  
 and drawing y<sup>e</sup> face and the temples of y<sup>e</sup> head together, lett y<sup>e</sup> fingers  
 meet above y<sup>e</sup> head, and thus continue for the space of halfe an houre, att  
 a time, using thus to doe often, doe long as you shall find occasion  
 you shall know when y<sup>e</sup> head is closed, as by y<sup>e</sup> thum, aforesaid.  
 and as you doe thus to close y<sup>e</sup> head amongst y<sup>e</sup> temples about  
 about the eares, and the noddle of y<sup>e</sup> head, and doe come to the nape  
 of y<sup>e</sup> neck, with the ointment of lavender, or with the ointment for  
 the palsy, you shall find these ointments hereafter in this booke  
 amongst the rest of the ointments, and with all which you doe use  
 these ointments as is aforesaid, you maye take a quart of milke from  
 the cow, putt there to a handfull of salem, three greene of dyed  
 and as much of rosemary, boyle all these together over a soft fire  
 and when they doe boyle, putt there a little of nutmegg, being grated  
 and take it off the fier, and putt it altogether in a lute pot, and  
 drinke of it, as hott as you can, holding it in y<sup>e</sup> mouth, that the  
 ayre maye ascende into y<sup>e</sup> head, you must drinke a quart of it every  
 daye, but if you cannot gett of these ointments take the milke alone  
 being used as is aforesaid, and holding y<sup>e</sup> head as is before sett downe, and  
 it will heale you if you be pleased

*A yargas or Medicine for the Malignancy in the Head.*

Take Sage, rosemary, and of pellitory of spaine, the rootes of each of these, alike quantitie, and boyle them in a pint of vinegar upon a (basting dish of coales, untill halfe be consumed, then put in two good spoonfulls of mustard, being made with good vinegar and see lett it boyle awhile, and then take a little of it as hott as you can suffer, and hold it in your mouth, as you shall see occasion after awhile. Pitt it out, and take more, and this doe 5 or 6 times every morning, soe long as you shall see cause or feele your selfe greived.

*A Plaster for the same greife to be applied after you have taken yargas*  
Take six spoonfulls of the galle of an oxe, or ewe, putt thereto two spoonfulls of the powder of long wormes, of the earth, and of the powder of halfe a nutmeg, being grated, boyle all these together upon a (basting dish of coales, untill it be thicke as you may spread it upon a cloth, then take a quide linen cloth, and cutt it fitt for yorehead, and as it maye cover the temples, spread the upon it, and laye it to your forehead, take warme, and lett it lye untill it fall off of it selfe, you shall know the meane time, by this, it lyeth in the one side of your head, or in the trenche, or in the nodd of your head.

*For the Head:*  
*A Medicine for the Scurvy Scurf:*

Take an ounce of Lemn, and beat it into powder, mingle it with the whites of two new layd Eggs, spread it betwixt two fildes of brown paper, and make it fitt to cover from the midst of your forehead unto the crowne of your head, with a kercher, and lett it lye soe 24 hours, and it will help if god will.

*A newther Medicine for the same greife.*

Take a new layd Egg, and roast it very hard, and cleave it into two, take out the yelke, and fill the hollow places with the powder of cornu in seed, putt them betwixt two fildes of a handkercher, and laye it to the nape of your necke, make it fitt, and lett it lye all night, soe thus ad opte do you shall have need, and god willing you shall find ease.

*Do Make a gullt to stage the turne.*  
*of what kind for ever it be.*

Take two good handfulls of stage, made very drye, then take a small handfull of bayesalt, dryed very well, and as much of very sweete wheaten bran, in like manner dryed, then take the ax of it, and cover y stage with salt and brann mingled together, then make
